Opening Script

Every assessor in your community regardless of organization completing the VI-SPDAT should use the same introductory script. In that script you should highlight the following information:

- the name of the assessor and their affiliation (organization that employs them, volunteer as part of a Point in Time Count, etc.)
- the purpose of the VI-SPDAT being completed
- that it usually takes less than 7 minutes to complete
- that only “Yes,” “No,” or one-word answers are being sought
- that any question can be skipped or refused
- where the information is going to be stored
- that if the participant does not understand a question that clarification can be provided
- the importance of relaying accurate information to the assessor and not feeling that there is a correct or preferred answer that they need to provide, nor information they need to conceal

Appendix A: About the TAY-VI-SPDAT

The HEARTH Act and federal regulations require communities to have an assessment tool for coordinated entry - and the VI-SPDAT and SPDAT meet these requirements. Many communities have struggled to comply with this requirement, which demands an investment of considerable time, resources and expertise. Others are making it up as they go along, using “gut instincts” in lieu of solid evidence. Communities need practical, evidence-informed tools that enhance their ability to satisfy federal regulations and quickly implement an effective approach to access and assessment. The VI-SPDAT is a first-of-its-kind tool designed to fill this need, helping communities end homelessness in a quick, strategic fashion.

The VI-SPDAT

The VI-SPDAT was initially created by combining the elements of the Vulnerability Index which was created and implemented by Community Solutions broadly in the 100,000 Homes Campaign, and the SPDAT Prescreen Instrument that was part of the Service Prioritization Decision Assistance Tool. The combination of these two instruments was performed through extensive research and development, and testing. The development process included the direct voice of hundreds of persons with lived experience.

The VI-SPDAT examines factors of current vulnerability and future housing stability. It follows the structure of the SPDAT assessment tool, and is informed by the same research backbone that supports the SPDAT - almost 300 peer reviewed published journal articles, government reports, clinical and quasi-clinical assessment tools, and large data sets. The SPDAT has been independently tested, as well as internally reviewed. The data overwhelmingly shows that when the SPDAT is used properly, housing outcomes are better than when no assessment tool is used.

The VI-SPDAT is a triage tool. It highlights areas of higher acuity, thereby helping to inform the type of support and housing intervention that may be most beneficial to improve long term housing outcomes. It also helps inform the order - or priority - in which people should be served. The VI-SPDAT does not make decisions; it informs decisions. The VI-SPDAT provides data that communities, service providers, and people experiencing homelessness can use to help determine the best course of action next.

The Youth – Transition Age Youth Tool from CSH

Released in May 2013, the Corporation for Supportive Housing (CSH) partnered with Dr. Eric Rice, Assistant Professor at the University of Southern California (USC) School of Social Work, to develop a triage tool that targets homeless Transition Age Youth (TAY) for permanent supportive housing. It consists of six items associated with long-term homelessness (five or more years) among transition-aged youth (age 18-24).

Version 2 of the VI-SPDAT

Version 2 builds upon the success of Version 1 of the VI-SPDAT with some refinements. Starting in August 2014, a survey was launched of existing VI-SPDAT users to get their input on what should be amended, improved, or maintained in the tool.

Analysis was completed across all of these responses. Further research was conducted. Questions were tested and refined over several months, again including the direct voice of persons with lived experience and frontline practitioners. Input was also gathered from senior government officials that create policy and programs to help ensure alignment with guidelines and funding requirements.

The TAY-VI-SPDAT – The Next Step Tool for Homeless Youth

One piece of feedback was the growing concern that youth tended to score lower on the VI-SPDAT, since the Vulnerability Index assesses risk of mortality which is less prevalent among younger populations. So, in version 2 of the VI-SPDAT, OrgCode Consulting, Inc. and Community Solutions joined forces with CSH to combine the best parts of the TAY, the VI, and the SPDAT to create one streamlined triage tool designed specifically for youth aged 24 or younger.

If you are familiar with the VI-SPDAT, you will notice some differences in the TAY-VI-SPDAT compared to VI-SPDAT version 1. Namely:

- it is shorter, usually taking less than 7 minutes to complete;
- subjective elements through observation are now gone, which means the exact same instrument can be used over the phone or in-person;
- medical, substance use, and mental health questions are all refined;
- you can now explicitly see which component of the full SPDAT each VI-SPDAT question links to; and,
- the scoring range is slightly different (Don't worry, we can provide instructions on how these relate to results from Version 1).

Appendix B: Where the VI-SPDAT is being used in the United States

Since the VI-SPDAT is provided completely free of charge, and no training is required, any community is able to use the VI-SPDAT without the explicit permission of Community Solutions or OrgCode Consulting, Inc. As a result, the VI-SPDAT is being used in more communities than we know of. It is also being used in Canada and Australia.

HOMELESS YOUTH CENSUS 2015

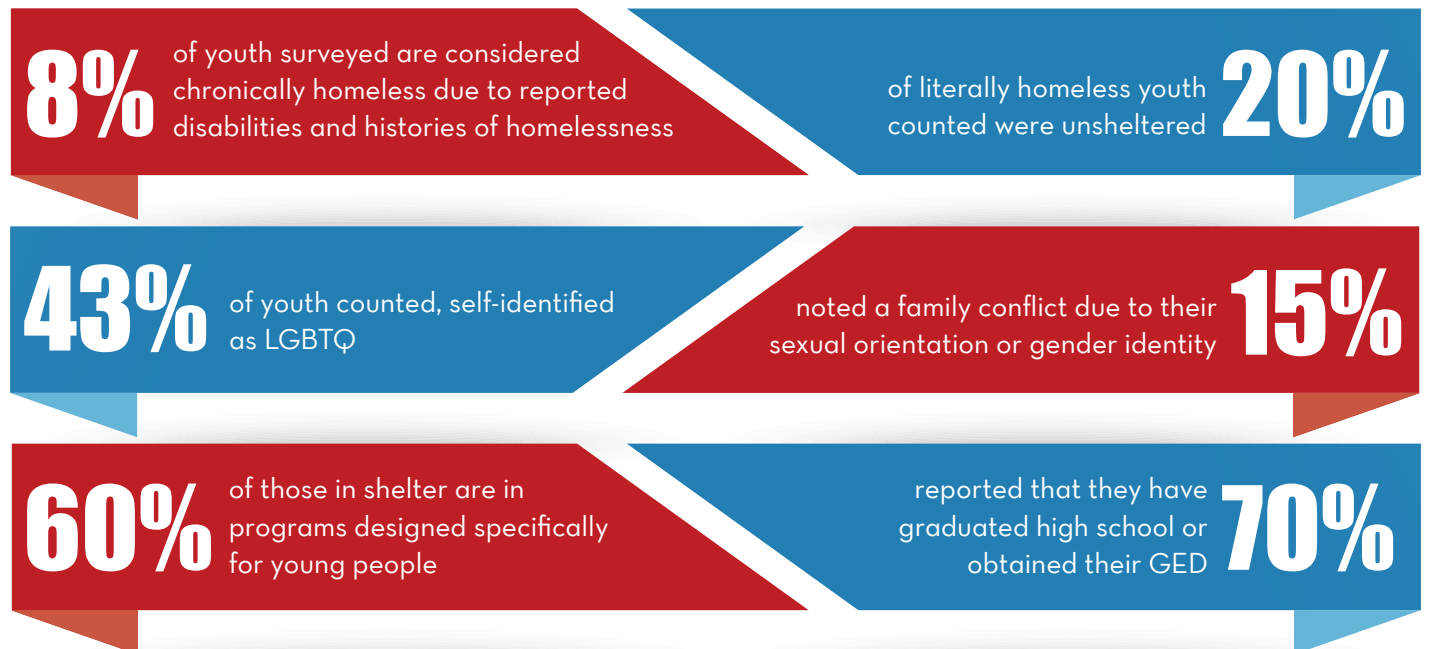

Far too many women, men and children are sleeping in shelters and on the streets in our nation's capital. To address this crisis, the District implemented Homeward DC, a comprehensive strategy to end homelessness in the District for all populations by 2020. As part of this strategy, the District invests more than \$5 million every year to implement and bring to scale solutions to end youth homelessness. This year's investment provided the necessary resources to support additional shelter and transitional housing beds, drop-in centers, street outreach, and a youth census.

The first Homeless Youth Census (HYC), a comprehensive census of youth who are experiencing homelessness, was completed in the District to capture not only the numbers of young people experiencing homelessness, but also those who are precariously housed (ages 24 and under) and their characteristics. The HYC was conducted over a nine day period at the end of August, 2015.

Benefits of HYC

- Provides understanding of the number of youth experiencing homelessness in the District
- Informs the various and complex needs of youth experiencing homelessness and help bring solutions to scale
- Educates key stakeholders of where resources should be allocated

Key Findings/Data

Next Steps

As a result of the information provided from the HYC, the Interagency Council on Homelessness (ICH) will create a plan to expand youth programs that will include outreach services, emergency and extended term housing opportunities and prevention. Additionally, the ICH will create a youth action plan that further illustrates the ICH plan to combat youth homelessness.
