

**PUBLIC OVERSIGHT HEARING  
COUNCIL OF THE DISTRICT OF COLUMBIA  
THE HONORABLE MARY CHEH, CHAIRPERSON  
COMMITTEE ON TRANSPORTATION AND THE ENVIRONMENT**

**TESTIMONY OF GEORGE S. HAWKINS, ESQ.  
CHIEF EXECUTIVE OFFICER AND GENERAL MANAGER  
DISTRICT OF COLUMBIA WATER AND SEWER AUTHORITY**

**TUESDAY, FEBRUARY 28, 2017 AT 11 A.M.  
JOHN A. WILSON BUILDING  
1350 PENNSYLVANIA AVENUE NW, ROOM 500**

## **OPENING**

Good morning Chairperson Cheh and members of the DC Council Committee on Transportation and the Environment. My name is George Hawkins, and I am proud to be in my eighth year as the CEO and General Manager of DC Water. I'm excited to have this opportunity to update you on the exciting things we've accomplished during the last year and I remain grateful for your continued support of our mission.

Although we are here to give you a summary of our Fiscal Year (FY) 2017 performance and preview our proposed FY 2018 budget, it's my hope that we can also talk about some of DC Water's most exciting initiatives.

We value our relationship with our customers and our stakeholders and constantly strive to be among the most transparent and open utilities in the country. In fact, I'd be remiss if I did not point out right now that we recently overhauled our entire website to make it easier to navigate – both on computers and on cell phones and other mobile devices.

We think that the look and feel of [www.dcwater.com](http://www.dcwater.com) is modern and in keeping with our mission and I encourage you and others watching this hearing on DC Cable Channel 13 to visit our website.

## **OVERVIEW**

DC Water provides more than 681,000 residents and 21.3 million annual visitors in the District of Columbia with retail water and sewer services. Our total service area is 725 square miles and includes wastewater treatment for 1.6 million people living in Montgomery and Prince George's counties in Maryland, and Fairfax and Loudoun counties in Virginia. So although our primary focus is DC, we are actually a regional utility and see our mission very broadly.

As you know, our drinking water comes from the Potomac River and is treated on our behalf by the U.S. Army Corps of Engineers' Washington Aqueduct. After treatment, drinking water travels through 1,350 miles of interconnected pipes, four pumping stations, five reservoirs, three elevated water tanks and nearly 44,000 valves. We maintain 9,510 fire hydrants and constantly strive to keep every one of them in excellent working order.

The median age of the District's water mains is 79 years old and 9 percent of this infrastructure dates back to the period between the Civil War and the 1890s. This is an important fact – most of the critical infrastructure in this city was built before World War II and in fact some of it dates back to the 1800's.

Nearly all of that construction pre-dates home rule. So we do what we can by upgrading about 1 percent a year – triple the rate when I got here - but the system is massive and we see this as a long-term journey, not something that will change overnight.

We have the ability to store 61 million gallons of water throughout the city at eight separate facilities based on pressure and elevation. After that drinking water is used by our customers across the city, it is transported through our 1,900 miles of sewer system to the 150 acre Blue Plains resource recovery facility at the southern tip of the District.

There we treat an average of 290 million gallons of wastewater per day though we have the ability to treat more. After the water is treated it is returned to the Potomac River and I am proud to say that the quality of the water going back into the river is more clear and pure than the water we pull out upriver. In fact, here is what the treated water looks like (AT THIS POINT YOU HOLD UP THE JAR OF TREATED EFFLUENT).

Since 1996, DC Water has operated as an independent authority of the District of Columbia. If you do the math, that makes up 20 years old this year! So we are very proud of that milestone and how far we have come since the early days but most especially the progress we have made in the last two decades.

We are governed by a Board of Directors with 11 principal members and 11 alternates. The entire board, including the chairman, is appointed by the Mayor of the District of Columbia.

I am joined today by our chairman, Matthew Brown, who has the unusual distinction of being both an employee of the District and a fantastic leader of our board. His vision and attention to detail is a key part of our success and I am grateful for his presence on the board. Thank you Matt and to all of our board members.

In addition to our DC residents, we have five principal suburban board members and five alternates. Suburban members do not vote on issues that exclusively affect the District such as setting retail water and sewer rates.

And what I'm about to say now is one of the most important things I will say today: unlike other utilities, DC Water is a not-for-profit so we operate strictly for the benefit of the public we serve.

## **2016/2017 HIGHLIGHTS**

Chairperson Cheh, I know you have visited our facility at Blue Plains and we encourage others to come take a tour. We are always eager to show off our great work and help customers and stakeholders understand our mission. Motorists driving by on Interstate 295 can see all the cranes and construction equipment on our property. We are investing on behalf of our customers and we are excited about the results.

We built the first thermal hydrolysis facility in North America and the largest in the world. The Bailey Bioenergy Facility – commissioned in 2015 - has fast proven its value, producing 10 megawatts of clean, green electricity from treating wastewater – enough to power a third of Blue Plains - saving DC Water millions in energy and biosolids hauling costs.

The energy is created by using technology that's never been used in this country. This special process uses intense, high heat to pressure-cook the solids left over at the end of the wastewater

treatment process. That process produces methane, which powers three large turbines and produces electricity.

Besides generating electricity, the solids at the end of the process are certified by the U.S. Environmental Protection Agency (EPA) to be Class A exceptional quality, which means they can be used like compost and applied in everything from back-yard gardens to strawberry farms. We're calling this product "Bloom" and we are hoping to dramatically expand marketing it this year as a soil amendment, with a giant free giveaway at RFK coming sometime this spring.

This ground breaking resource recovery program has been closely watched by our peers around the world and earned DC Water the prestigious US Water Prize from the US Water Alliance in 2016.

This is also a very productive time for our \$2.6 billion DC Clean Rivers Project. Last fall, we completed our third deep tunnel. The tunnel boring machine "Nannie" – named for local civil rights activist and educator Nannie Helen Burroughs – completed her 2.4 mile dig from RFK Stadium to Poplar Point. There, her tunnel connects to the tunnel mined earlier by "Lady Bird".

Together, these tunnels will start capturing combined sewer overflows early next year and convey millions of gallons of sewage and stormwater to Blue Plains for treatment. Those tunnels generally snake underground 100 feet below the surface, beneath the Metro, the rivers and everything else.

We have also completed a tunnel under First Street, NW to provide 3 million gallons of stormwater storage to help prevent flooding in the Bloomingdale and LeDroit Park neighborhoods. Finally, we are preparing now for our next big tunnel project, the Northeast Boundary Tunnel, which will connect all of these tunnels together and complete our effort to reduce combined sewer overflows to the Anacostia River by 98 percent.

However, we're not just building tunnels. Another big push this year will be our Green Infrastructure Initiative, in which we substitute sustainable solutions to catch stormwater run-off from "gray" ones built with asphalt and cement. We are already planning the first projects in the Potomac River sewershed with innovative GI technologies including bioretention, permeable pavement and downspout disconnections.

Simultaneously, we are always thinking about how we can help put more District residents to work. We recently launched our permanent DC Water Works program and we are aggressively partnering with our contractors and other agencies to train D.C. residents on everything from getting their commercial driver's licenses to maintaining that same green infrastructure I mentioned a minute ago.

We're also hopeful that 2017 is the year that DC starts work on the biggest solar site in the District. We are working on a proposal to generate 10.5 megawatts of energy from installing roughly 40 acres worth of solar panels over the top of some of our treatment tanks. This highly visible solar farm would put us in the forefront of this movement and makes excellent sense for our customers and the authority itself.

The last building project that I'll mention here today is our new headquarters in Southeast near the Navy Yard. Our new building will use sustainable, state of the art technology, will be one of the greenest buildings in the city with LEED Platinum status and will allow us to help with the revitalization of the neighborhood along the Anacostia River.

More immediately, it will make ourselves more accessible to our customers, consolidate our administrative offices, improve our efficiency and allow us to make better use of the increasingly packed space we have out at Blue Plains. The building should be complete later this year or early next year and we'll be moving into it around this time in 2018.

Lastly, each one of us at DC Water is aware that the cost of water is a big issue for many of our customers. That's one reason why our board voted last year to expand the Customer Assistance Program (CAP), providing more relief to low income customers. We essentially trimmed an additional \$11.12 off the average monthly bill for CAP customers, meaning many of those water users are saving up to \$38 a month.

## **OUR FINANCES**

DC Water is also breaking new ground in the financial sector as well. This past September we issued the nation's first Environmental Impact Bond (EIB). The \$25 million, tax-exempt bond will fund the initial green infrastructure project in the Clean Rivers Project. The EIB employs an innovative financing technique whereby the costs of installing the green infrastructure are paid for by DC Water, but the performance risk of the green infrastructure in managing stormwater runoff is shared amongst DC Water and the investors.

At this time last year, Standard & Poor's upgraded DC Water's credit rating to "AAA," the first time in history that the Authority has achieved the highest rating available by a rating agency. In addition, our unbroken track record of clean audit opinions on our financial statements continues, something we are extremely proud of.

We are always looking for ways to reduce the burden on our ratepayers. To that end, DC Water has launched a nonprofit affiliate called Blue Drop. Blue Drop will market products and services on DC Water's behalf, using the revenue to benefit retail and wholesale ratepayers. Initial service offerings will be peer-to-peer utility consulting and the sale of Bloom.

Our approved budget increases to \$562 million in fiscal year 2018 from \$536 million in 2017. Our revenue is projected to increase to \$617 million, from \$595 million last fiscal year. Our budget focuses on controlling both operating and capital expenditures while maintaining the Authority's high level of customer service. It provides the necessary resources to balance the need to maintain DC Water's critical infrastructure with rates that are reasonable, fair and affordable.

## **CONCLUSION**

Our long term vision for DC Water is spelled out in our Blue Horizon 2020 Strategic Plan. We have it prominently displayed on our website and I can provide copies to the committee. This document is our blueprint for achieving a vision to be a world-class water utility.

Blue Horizon represents a disciplined process for making fundamental decisions and shaping DC Water's future, including the appropriate allocation of funding. To achieve the goals in the plan, the Authority is embracing a culture premised on strategy and performance.

My daily goal as CEO and General Manager is being able to provide the very best services to our customers while also being able to raise the funds necessary to support our ambitious operations and capital program. It's a balancing act and I believe that we are meeting the challenge each day.

While we continue to face long-term costs that will require significant investments, we are also finding new and creative ways to raise new revenue and lower our costs.

Going forward, we hope to expand on the success that's made us one of the most admired water companies in the country while continuing to be partners with District residents, with you and with the rest of our stakeholders.

Thanks you for the opportunity to provide these remarks and I am happy to answer questions from the Committee.

**Performance Oversight Questions**  
**DC Water**

**A. ORGANIZATION AND OPERATIONS**

1. Please provide a complete, up-to-date **organizational chart** for the agency and each division within the agency. Please include an explanation of the roles and responsibilities for each division and subdivision within the agency.
  - Please include a list of the employees (name and title) for each subdivision and the number of vacant positions.
  - Has the agency made any organizational changes in the last year? If so, please explain.
  - (Please see attachment)
  
2. Please list each **new program** implemented by the agency during FY 2016. For each initiative please provide:
  - A description of the initiative.
  - The funding required to implement the initiative.
  - Any documented results of the initiative.(See testimony)
  
3. Please provide a complete, up-to-date **position listing** for your agency, which includes the following information for each position:
  - Title of position.
  - Name of employee or statement that the position is vacant, unfunded, or proposed.
  - Date employee began in position.
  - Salary and fringe benefits, including the specific grade, series, and step of position.
  - Job status (continuing/term/temporary/contract).*Please list this information by program and activity*  
*(See attachment)*
  
4. Does the agency conduct annual **performance evaluations** of all of its employees? Who conducts such evaluations? What steps are taken to ensure that all agency employees are meeting individual job requirements?  
(Yes, see attachment)
  
5. Please provide the Committee with:

- A list of all employees who receive cellphones, personal digital assistants, or similar communications devices at agency expense.
- A list of all vehicles owned, leased, or otherwise used by the agency and to whom the vehicle is assigned.
- A list of employee bonuses or special award pay granted in FY 2016 and FY 2017, to date.

**Overtime Payments**

<b>FY 2016</b> (10/01/15 - 09/30/16)	<b>\$ 6,884,249</b>	104% of the FY 2016 overtime budget
<b>FY 2017</b> (10/01/16 - 1/31/17)	<b>\$ 2,640,554</b>	39% of the FY 2017 overtime budget

**Workers' Compensation**

<b>FY 2016</b> (10/1/15 - 9/30/16)	<b>\$ 1,835,611</b>	medical, indemnity, vocational rehabilitation and expenses
<b>FY 2017</b> (10/1/16 - 1/31/17)	<b>\$ 329,156</b>	medical, indemnity, vocational rehabilitation and expenses

- A list of travel expenses, arranged by employee.
- A list of the total overtime and worker's compensation payments paid in FY 2016 and FY 2017, to date. A detailed description of the information tracked within each system.
- Fleetwave- simplifies every part of fleet, asset and workforce management – from the financial overview of vehicles and equipment, to policy and supervision of drivers, technicians and workshops.
- Geotab- is a GPS fleet management and vehicle tracking system that provides end-to-end, hardware and software, solutions that are entirely scalable.
- The age of the system and any discussion of substantial upgrades that have been made or are planned to the system.
- Fleetwave- was implemented mid 2012 that requires regular upgrades of new features to the system
- Geotab- 2013 as of now no upgrades have been made to the system
- Whether the public can be granted access to all or part of each system: No we cannot grant public access to the system.

6. Please identify all **electronic databases** maintained by your agency, including the following:

- A detailed description of the information tracked within each system.
- The age of the system and any discussion of substantial upgrades that have been made or are planned to the system.
- Whether the public can be granted access to all or part of each system.

(See attachments)

7. What has the agency done in the past year to make the activities of the agency more **transparent** to the public? In addition, please identify ways in which the activities of the agency and information retained by the agency could be made more transparent.

DC Water published a new lead service map to share information about service material with the public. The map can be found here:

<https://geo.dcwater.com/Lead/> DC Water has also contracted with Socrata for their content management system as part of our Open Data initiative. The first file to be shared is the meter change file. Additional files to be shared include: CIP projects, SSO's, CSO's water main breaks among other information.

8. How does the agency solicit **feedback** from customers? Please describe.

- What is the nature of comments received? Please describe.
- How has the agency changed its practices as a result of such feedback?

DC Water is continually meeting with the community, with stakeholders and other agencies to gather input and feedback. In addition, DC Water maintains a very active and engaged social media portfolio, which we use to take feedback and act on it. In most cases the feedback is about immediate construction issues.

9. How has the agency tried to reduce agency **energy use** in FY 2016?

Yes. The combustion turbine generators installed at Blue Plains use digester gas to generate approximately 8 MW of power. As a result, the Authority's dependence on electricity procured from PEPCO's grid has declined by approximately a third.

In addition, progress was made in FY 2016 to complete the construction of a project that provides a facility to treat a waste stream with high nitrogen content. These waste stream is currently treated using the plant's conventional nitrogen removal process that requires use of energy to supply air. This novel side stream treatment process, will be the largest of its kind in the world when the facility is commissioned during the current fiscal year. The process represents a major breakthrough in nitrogen removal because it does not require the addition of methanol, uses 60 percent less energy than mainstream treatment and has the lowest greenhouse gas emissions of all the processes considered for this project.

**B. BUDGET AND FINANCE**

10. Please provide a chart showing your agency's **approved budget and actual spending**, by division, for FY 2016 and FY 2017, to date. In addition, please describe any variance between fiscal year appropriations and actual expenditures.

FY 2016 Operating Budget

The Approved FY 2016 budget of \$541.6 million was adopted by the Board of Directors on February 5, 2015

	(\$000's)		
	<u>Approved Budget</u>	<u>Actual Results</u>	<u>Fav/(Unfav)</u>
WWT Process Engineering	\$ 8,291	\$ 6,921	\$ 1,370
Maintenance Services	20,549	18,563	1,986
Water Services	22,574	23,449	(875)
Sewer Services	15,267	14,944	323
Clean Rivers	2,996	2,835	161
Engineering and Technical Services	24,069	24,054	15
Permit Operations	2,214	2,049	166
Wastewater Treatment Operations	86,972	65,106	21,866
Customer Service	17,500	17,677	(177)
Distribution and Conveyance Systems	50,954	45,305	5,650
<b>Total Operations</b>	<b>251,385</b>	<b>220,901</b>	<b>30,484</b>
General Manager	3,683	3,844	(161)
Office of the Board Secretary	614	526	88
Internal Audit	872	997	(125)
General Counsel	5,733	9,003	(3,270)
External Affairs	2,203	2,146	57
Information Technology	10,530	10,992	(462)
Finance, Accounting and Budget	13,465	13,141	324
AGM Support Services	367	473	(106)
Human Capital Management	6,733	7,780	(1,047)
Facilities Management	8,276	8,013	263
Procurement	4,603	4,608	(5)
Occupational Safety and Health	1,694	1,556	138
Department of Security	6,562	6,545	17
Fleet Management	5,732	5,365	367
<b>Total Administration</b>	<b>71,066</b>	<b>74,987</b>	<b>(3,921)</b>
<b>Subtotal O&amp;M Expenditures</b>	<b>322,451</b>	<b>295,888</b>	<b>26,563</b>
Debt Service	174,766	149,781	24,985
Payment in Lieu of Taxes	15,644	15,644	-
Right of Way	5,100	5,100	-
Cash financed Capital improvements	23,644	23,475	169
<b>Total Operating Expenditures</b>	<b>\$ 541,605</b>	<b>\$ 489,888</b>	<b>\$ 51,717</b>
Personnel Services charged to Capital Projects	(18,993)	(17,648)	(1,345)
<b>Total Net Operating Expenditures</b>	<b>\$ 522,612</b>	<b>\$ 472,240</b>	<b>\$ 50,372</b>

**FY 2016 Approved Budget to Actual Variance Explanation:**

**Wastewater Treatment – Process Engineering:** Underspensing primarily in personnel services due to vacancies and lower than anticipated issuances from the warehouse for spare parts.

**Maintenance:** Underspending in personnel services due to vacancies. Additional underspending due to the non-operation of the old Post Lime Dewatering and Lime Stabilization Facilities, as well as increased use of in-house staff in lieu of the electrical power distribution equipment and utilization controls and system contracts.

**Wastewater Treatment:** Underspending mainly attributable to the operational impact of the Digesters (lower production and hauling costs of biosolids) and Combined Heat and Power (lower electricity cost due to onsite generation) projects. Additional underspending also in chemicals due to lower unit prices for methanol and the use of safer and less expensive chemicals as a main source to control alkalinity and pH balance. There was also lower than anticipated payment on the operations and maintenance contract for the Combined Heat and Power (CHP) facility due to delays in the startup and commissioning.

**Water Services:** Departmental variance was the result of reorganization and position transfers for the creation of Construction Contract Management group. Overall, the Customer Care & Operations cluster group had a favorable expenditure by year-end.

**Distribution and Conveyance Systems:** Underspending primarily due to lower than anticipated spending in water purchases and various professional and maintenance contracts.

**General Counsel:** Overspending is primarily in the areas of environmental matters attributable to significant cases and other legal contingencies.

**Human Capital Management:** Overspending primarily for the Authority's Workers Compensation Claims program consistent with historical spending trends.

**Debt Service:** Underspending is primarily due to lower than anticipated interest rates on existing debt and refinanced debt. In addition, there was no new debt issuance in FY 2016.

## FY 2017 Operating Budget

There were no revisions to the Approved FY 2017 budget of \$535.8 million that was adopted by the Board of Directors on December 3, 2015.

At the end of January 2017, operating expenditures (including debt service and the right of way PILOT fees) totaled \$160.8 million or 30% of the approved budget. Total operating expenditures were in line with expectation for the first quarter of fiscal year 2017. These numbers include estimated, incurred but unpaid, invoices and are subject to revision in subsequent months.

The following provides DC Water's comparative expenditure by major object areas through January 31, 2017 of the fiscal year.

**Comparative Statement of Expenditure**  
As of January 31, 2017  
(\$000's)

	FY 2017		
	Approved Budget	Actual (YTD) as of 01/31/2017	Percent of Budget
Personnel Services	\$ 144,761	\$ 49,372	34.1%
Contractual Services	82,760	25,224	30.5%
Water Purchases	29,278	8,897	30.4%
Chemicals and Supplies	34,709	10,237	29.5%
Utilities	28,670	8,674	30.3%
Small Equipment	1,230	260	21.1%
<b>Subtotal O &amp; M Expenditures</b>	<b>321,408</b>	<b>102,664</b>	<b>31.9%</b>
Debt Service	169,346	51,089	30.2%
Cash Financed Capital Improvements	24,014	-	0.0%
Payment in Lieu of Taxes	15,957	5,319	33.3%
Right of Way	5,100	1,700	33.3%
<b>Total Operating Expenditures</b>	<b>\$ 535,825</b>	<b>\$ 160,772</b>	<b>30.0%</b>
Personnel Services Charged to Capital Projects	(21,934)	(5,565)	25.4%
<b>Total Net Operating Expenditures</b>	<b>\$ 513,891</b>	<b>\$ 155,207</b>	<b>30.2%</b>

11. Please list any **reprogrammings**, in, out, or within, related to FY 2016 or FY 2017 funds. For each reprogramming, please list the total amount of the reprogramming, the original purposes for which the funds were dedicated, and the reprogrammed use of funds.

During FY 2016, a total of \$17.6 million was reprogrammed to meet operational and maintenance needs within the Authority's approved operating budget as follows:

a) Personnel Services (\$6.8 million):

Interdepartmental reprogrammings were effected within personnel services as a result of increased hiring efforts, departmental restructurings, wage adjustments, higher overtime associated with infrastructure repairs costs during the extreme cold season, and year-end estimates for employee related costs.

b) Non-Personnel Services (\$10.8 million):

Interdepartmental reprogrammings were effected using savings from within the O&M budget, as follows:

- meet required funding for alignment of functions arising from departmental restructurings (\$5.0 million)
  - To rightsize the Workers Compensation program due to funding funding shortfall (\$1.5 million)
  - Incorporation of Risk Management functions within the Finance, Accounting & Budget department (\$3.5 million)
- provide funding to support the customer satisfaction survey program and credit card transaction fees (\$0.3 million)
- fund the higher than anticipated costs for legal matters and year-end contingencies (\$3.6 million)
- cover various capital expenses reclassified to operating consistent with the Authority's capitalization policy (\$1.5 million)
- meet other various shortfalls for items such as underfunded software maintenance, partial implementation of the local hiring program "DC Water Works", and other operational needs throughout the Authority (\$0.4 million)

### **FY 2017 Reprogramming**

As of January 2017, there have been no interdepartmental reprogrammings.

12. Please provide a list of all projects for which your agency currently has **capital funds** available. Please include the following:

- A description of each project, including any projects to replace aging infrastructure (e.g., water mains and pipes).
- The amount of capital funds available for each project.
- A status report on each project, including a timeframe for completion.
- Planned remaining spending on the project.

The Capital programs section of the document is a brief summary of the major activities followed by the detailed project listing by service area. A brief summary of the major activities and a detailed listing for each project in DC Water's Approved FY 2017 - FY 2026 Capital Improvement Program is found in Section V of the FY 2018 Approved Budget Book.

Below is a link to the document:

<https://www.dewater.com/sites/default/files/finance/Section%20V%20All%20Pages.pdf>

13. Please provide a complete accounting of all **federal grants** received for FY 2016 and FY 2017, to date.

No federal grants have been received for FY 2016 neither for FY 2017 as of February 13, 2017.

As noted in the FY 2015 Performance Oversight responses, DC Water received \$14 million in federal appropriations to be used for the DC Clean Rivers Project; as of February 13, 2017 no federal appropriations have been received for FY 2017.

**DC Water**  
**Federal Grants Received for FY 2016**

<b>FY 2016</b>	<b>Name</b>	<b>Award Date</b>	<b>Federal Grant Award Amount</b>
None			
<b>Total</b>			\$ -

14. Please list each contract, procurement, lease, and grant (“**contract**”) awarded, entered into, extended and option years exercised, by your agency during FY 2016 and FY 2017, to date. For each contract, please provide the following information, where applicable:

- The name of the contracting party.
- The nature of the contract, including the end product or service.
- The dollar amount of the contract, including budgeted amount and actually spent.
- The term of the contract.
- Whether the contract was competitively bid or not.
- The name of the agency’s contract monitor and the results of any monitoring activity.
- Funding source.  
(See attachments)

15. Please provide the details of any **surplus** in the agency’s budget for FY 2016, including:

- Total amount of the surplus.
- All projects and/or initiatives that contributed to the surplus.

DC Water utilizes operating cash in excess of the Board’s reserve requirement and any other significant one-time cash infusions for capital financing or for repayment of higher cost debt. In FY 2016, the projected **cash** surplus of **\$22.65 million** was disbursed as follows:

- \$22.65 million Additional Cash Balance over Target

The following items contributed to the surplus:

- The revenue receipts were higher at \$589.3 million or 101.5 percent of the FY 2016 revised budget primarily due to higher revenue of \$10.1 million for residential, commercial and multifamily categories and higher Development Contractor water and sewer service fees as compared to revised budget.

- The operating expenditures were 90.8 percent of the budget due to lower spending in utilities, contractual services, chemicals and water purchases.
- The Debt Service was lower on account of lower interest rates on existing debt.

### C. LAWS, AUDITS, AND STUDIES

16. Please identify any **legislative requirements** that the agency lacks sufficient resources to properly implement.  
None. We expect to be able to use existing resources to help raise awareness of the flushable wipes legislation in the coming year and in 2018.
17. Please identify any statutory or regulatory **impediments** to your agency's operations.  
Water and Sewer Operations Amendment Act of 2002, effective October 1, 2002 (D.C. Law 14-190, § 3902; D.C. Official Code, § 34-2107 et seq.) prohibits DC Water from charging customers the costs for treating groundwater discharged from improved real property. Revisions to this legislation would authorize DC Water to charge for these costs and address equity, compliance and budget issues. DC Water would like to work with the Council to amend this legislation.

The Public Works Act, effective May 18, 1954 (68 Stat. 104, ch. 218; D.C. Official Code 2101 et seq.) sets a 30 day period within which a DC Water customer must pay their bill before they may be charged a 10% late fee. This provision was reasonable and effective when the District/DC Water rendered water and sewer bills on a quarterly basis. Since 2002, however, DC Water has employed the use of automatic meter reading meters and changed the billing period from quarterly to monthly, before the 30 day statutory payment period has elapsed. The current statutory payment period prohibits DC Water from including the late fees on the next bill creating customer confusion on the total amount that they owe. Pursuant to 15 DCMR 305, bills rendered by District Utility, Energy Supplier, or Telecommunications Service Providers must be paid within 20 days after the date their bills are rendered. Shortening the statutory bill payment period for water and sewer bills will improve the effectiveness of DC Water billing processes consistent with DC Water current metering system and other District Utilities. DC Water would like to work with the Council to amend this statute and related legislation.

18. Please explain the impact on your agency of any **federal legislation or regulations** adopted during FY 2016 that significantly affect agency operations. NA

19. Please provide a list of all studies, research papers, and analyses (“**studies**”) the agency requested, prepared, or contracted for during FY 2016. Please state the status and purpose of each study.

Water Quality Projects

Anacostia 2nd High Water Quality Evaluation

Purpose: Conduct study on water age to improve water quality and update hydraulic model.

Status: Completed 2016

Lead Pipeloop Scoping

Purpose: Evaluation and provide options for new pipe loop designs

Status: Completed 2016

Proof of concept of premise plumbing evaluations

Purpose: Conduct study on evaluation of premise plumbing

Status: Completed 2016

Fourth High Storage Evaluation

Purpose: Conduct study on available water storage in 4th High West zone

Status: Completed 2017

Ft Stanton evaluation/business case

Purpose: Evaluate a case to decommission Ft Stanton Reservoir to improve water quality

Status: Completed 2017

Internal Cross-Connection Survey

Purpose: Perform cross connection audit on DC Water facilities

Status: Completed 2017

WRF 4677 Wastewater Water Integration

Purpose: Study to develop ways to integrate water and wastewater treatment

Status: Initiated 2016

#### WRF 4697 Cyanotoxin Risk Communication

Purpose: Evaluate, develop, proposed communications about cyanotoxins

Status: Initiated 2016

#### WRF 4663 Workforce Skills of the Future

Purpose: Provide input to industry study on future workforce skills

Status: Initiated 2016

#### WRF 4572 Guidance for Flushing Distribution Systems

Purpose: Use of case study to provide input on flushing strategies for contamination

Status: Completed 2016

#### Lead Service Line Identification Pilot

Purpose: Evaluate the use of sequential sampling to identify lead service lines

Status: Initiated 2016

#### Storage Facility Mixing Evaluation

Purpose: Evaluation of water quality before and after mixer installations

Status: Completed 2016

### Nutrient Removal Projects

#### Shortcut Nitrogen Removal (Deammonification, AvN Control):

Purpose: To study the application of Full-plant deammonification for nitrogen removal. The successful implementation of this process could lead to a significant reduction in energy consumption, methanol consumption and improved plant capacity. Two major technological concepts are applied – selective sludge wasting to retain Anammox granules using screens (a) and intermittent aeration to repress nitrite oxidizers using AvN control (b).

Status: The study including selective wasting using screens is completed. The further optimization of AvN control to achieve short-cut nitrogen removal for Blue Plains is ongoing and scheduled completion in 2018.

(2016) Strategy for Full-scale Transition into Shortcut Nitrogen Removal at Blue Plains Advanced Wastewater Treatment Plant. WEFTEC 2016, New Orleans.

WERF Study: combining bio-P and short-cut nitrogen removal

Purpose: Develop strategies to leverage denitrifying PAO activity to decrease carbon and energy needs for nitrogen removal. This concept will fit well in the development of energy neutral wastewater treatment plants

Status: This project is starting and will take 2 years.

Short-Cut N Modeling

Purpose: To develop the modeling capability DC Water's mainstream deammonification process evaluation and optimization. Model prediction will be compared with laboratory results as a means to verify parameters.

Status: Study is ongoing and scheduled completion in 2017.

#### Development of final polishing step based on anammox and partial denitrification

**Purpose:** to develop an approach to treat effluent from short-cut nitrogen removal systems, still containing ammonium residual and nitrate, to meet discharge limits with minimal of carbon needs. This technology is based on combining partial denitrification with anammox activity.

**Status:** Non-provisional patent will be submitted summer 2017. We are seeking a pilot demonstration to test technical feasibility.

#### Sidestream Deammonification

Purpose: To study approaches to detect and overcome inhibition of nitrifiers and anammox by the filtrate.

Status: All bench-scale studies are completed. Pilot demonstration is ongoing

Publications and Conference Papers:

WERF-NSF: Nitrifier Bio-Augmentation Project

Purpose: To evaluate impact of nitrifier bioaugmentation on nitrogen removal, settleability and oxygen transfer rates in secondary processes. This study is part of a WERF study in which nitrifier bioaugmentation in different forms (floc vs granule) and between different system (mainstream vs sidestream) are investigated

Status: Project is just started and will be finished by 2018

Carbon redirection – energy conservation

Aeration and Diffuser Fouling Study

Purpose: The purpose is two-fold: (1) experiments are conducted to understand the impact of the wastewater matrix on oxygen transfer rate better as well as study operational conditions that could mitigate oxygen transfer rates, and (2) fouling mitigation strategies, including acid cleaning, are tested to improve and maintain oxygen transfer rates of different diffusers that might be used for future upgrades.

Status: The experiments regarding wastewater matrix and operational conditions for secondary systems to improve oxygen transfer have been performed in the pilot system. This part of the study is scheduled to be finished by summer 2017. The second part of this study that focusses on the fouling mitigation is about to start. Design of the pilot upgrades is completed and adjustments are ongoing. The study is scheduled to start with experimental work in spring 2017.

Development of high-rate contact-stabilization concept

Purpose: Based on previous research high-rate contact stabilization was selected as a vial technology for increasing carbon redirection to digestion and thus increased energy recovery. The study focused on gaining increased knowledge on operational factors allowing for carbon redirection with contact-stabilization systems and to evaluate the applicability of this concept for Blue Plains as well as for raw wastewater treatment.

Status: Study is finalized and all publication will be finalized by summer 2017.

#### WERF Study Floc-Densification:

Purpose: To evaluate the use of external selectors such as cyclones and sieves for the selection of fast settling dense particles which will aid in improving sludge settling characteristics and increasing process capacity. In addition, sludge densification may allow us to improve process functionality by providing better means to control the various organisms associated with carbon, nitrogen and phosphorous removal. Thus we will be able to do more in less foot print. A proof of principle for the combination of external selector and high-rate contact-stabilization is tested.

Status: The study will be finished by end of 2017.

Measurement of settling limitation and optimization of clarifier models

Purpose: Prediction of effluent quality of clarifier is not feasible at the moment due to the lack of methods to measure flocculation kinetics. This study aims to develop novel settling matrices that can help identifying settling limitation and could help in optimizing clarifier models

Status: Study will be finalized by end of 2017

Publications and Conference Papers:

Mancell-Egala, WASK; Kinnear, DJ; Jones, KL; De Clippeleir, H; Takacs, I; Murthy, SN (2016) Limit of stokesian settling concentration characterizes sludge settling velocity. Water Research 90, 100-110

Anaerobic digestion and dewatering

WERF study: overcoming hydrolysis limitation within anaerobic digestion

Purpose: To study the impact of THP processes before, after or in the middle of anaerobic digestion processes and its impact on overall performance and in-situ hydrolysis rates. In addition operational conditions including co-digestion and recuperative thickening are evaluated with to focus on their impact on changing the in-situ hydrolysis rates

Status: The WERF study started in summer 2016 and will take 2 years.

#### Optimization of belt filter press dewatering

Purpose: To increase fundamental understanding of factors impacting final cake solids and polymer dose. The aim of the study is to provide guideline for selection of right polymers (including coagulants) and to produce high quality filtrate with a minimal impact on sidestream DEMON system.

Status: All bench-scale test are completed, additional full scale tests are planned in coming months

Publications and Conference Papers:

Haydee De Clippeleir, Miguel Miranda, Qi Zhang, Mahmudul Hasan, Ahmed Al-Omari, Nicholas Passarelli, Salil Kharkar, Sudhir Murthy and Chris Debarbadillo (2016) Optimization of belt filter press dewatering of thermally hydrolyzed biosolids: a Blue Plains case study on balancing desired cake solids with filtrate quality. WEFTEC 2016, New Orleans.

#### Odor Emission Detection, Prediction and Optimization

##### Development of odor prediction tool for plant optimization

Purpose: Organic sulfur compounds are being neglected right now in process models although they have very low odor thresholds. The development of a simplified calculation tool based on organic sulfur formation kinetics and state variable obtained by conventional full plant modeling is targeted. This tool can be directly linked to full plant models and allows to investigate how one can optimize the plant operation to minimize risks for the emission of organic sulfur compounds

Status: Preliminary work is finished. Full project started up fall 2016.

Publications and Conference Papers:

Adrian Romero, Haydee De Clippeleir, Manel Garrido, Christine deBarbadillo, Alba Torrents, Sudhir Murthy. Controlling ORP as the key to reduce odor emissions from secondary systems. Platform

presentation. WEFTEC 89th Technical Exhibition and Conference, New Orelans, LA, September 2016

Other topics

DC Council – Endocrine Disruptor Compounds in the Potomac River: The intent of the project is to develop a dataset which can be used to accurately quantify the relative input of various anthropogenic discharges on endocrine disruption in the Potomac River Watershed.

Status: Study is near completion.

(Also see attachments)

20. Please list and describe any ongoing **investigations**, audits, or reports on your agency or any employee of your agency, or any investigations, studies, audits, or reports on your agency or any employee of your agency that were completed during FY 2016 or FY 2017, to date.

Internal Audit Investigations Resulting From Fraud, Waste and Abuse Hotline Allegations:

In Fiscal Year 2016, Internal Audit investigated a total of 36 allegations that were received through DC Water’s Fraud, Waste and Abuse Hotline. Of the 36 claims, 7 were claims of fraud and 29 cases were classified as “other”, which includes hostile work environment claims and customer service related issues. Four allegations have been substantiated with appropriate remediation taken by DC Water, and 25 allegations were not substantiated. Seven cases are still under investigation

In Fiscal Year 2017 to-date (through January 31, 2017), Internal Audit investigated a total of five allegations that were received through DC Water’s Fraud, Waste and Abuse Hotline. All cases are still under investigation.

**INTERNAL AUDITS**

**Internal Audits Conducted during Fiscal Year 2016 and Fiscal Year 2017 to-date (through February 14, 2017):**

<b>Project</b>	<b>Report Date</b>	<b>Issue</b>
Retail Rates Implementation Progress Report	February 25, 2016	

Overtime Audit and Analysis	February 25, 2016
Contract Monitoring and Compliance Part 1	April 28, 2016
Contract Monitoring and Compliance Part 2	July 28, 2016
Training, License and Certification Internal Audit	July 28, 2016
ROCIP Savings Analysis	July 28, 2016
Enterprise Project Governance Maturity Assessment	July 28, 2016
Engineering – Contractor Management Phase 2	February 14, 2017
Blue Horizon 2020 Strategic Plan Monitoring	November 18, 2016
Incident Management and Response Review	November 18, 2016
Business Development Plan Internal Audit	February 14, 2017
Customer Billing and Collection Internal Audit	February 14, 2017

Note: Audits were conducted by outsourced internal audit service provider RSM US LLP.

### **On-Going Internal Audits**

#### FY 2016; Annual Budgeting & Planning; RSM US LLP

Our overall audit objectives were to evaluate how the Authority develops, reviews and monitors the operating and capital budget.

#### FY 2017; Automated Meter Reading Implementation

DC Water is currently in the process of replacing over 85,000 meters and MTUs. The purpose of this review is to gain an understanding of the implementation process and evaluate the implementation execution.

#### FY 2017; Maintenance Services Work Order Management

Our overall audit objectives are to obtain an understanding of the Work Order Management process for the Maintenance Services Department, including the policies and procedures, controls in place, and to determine the design effectiveness of those controls identified.

### FY 2017; Employee and Customer Privacy Review

Our overall audit objective is to understand and evaluate the Authority's Customer and Employee information privacy practices.

### FY 2017; Purchase Card Program Internal Audit

Our overall audit objectives are to obtain an understanding of the purchase card program at DC Water, including the policies and procedures, controls in place, and to determine the design effectiveness of those controls identified.

### FY 2017; Entity Level Assessment

Our overall audit objectives are to assess the effectiveness of the internal control structure across the Authority. To evaluate the entity-level controls, we will utilize the COSO framework (Committee of Sponsoring Organizations of the Treadway Commission).

The DC Water Department of Security conducted the following investigations in FY16 and up to present:

Workplace Violence Cases	14
Damage to DC Water property/assets	20
Theft of Property (Personal and/or DC Water)	20
Fraud (Time and attendance)	4
Administrative Investigation Support	15
Local/Federal Law Enforcement Assistance	17

Of significant note is the dramatic decrease in workplace violence cases to 14, down from a high of 48 in 2013, 24 in 2014, 24 in 2015.

### **D. PROGRAM-SPECIFIC QUESTIONS**

21. Please describe the agency's three biggest challenges from 2016  
DC Water has been unsuccessful in efforts to finalize a successor Master Agreement on Compensation with the unions. We are also trying to update our personnel policies. And we are attempting to implement the Advancing Blue performance management plan.

22. Please describe the agency's major goals for 2017. (See testimony)

23. Please describe any challenges that the agency has experienced in working with the District government in 2016. None of note; we have an excellent relationship with the District government and our stakeholders.
24. Please describe the status of the fire hydrant inspection and maintenance program, including:  
The current number of known mechanically defective hydrants in the District. Is DC Water currently meeting its goal of having less than 1% of fire hydrants out of service? As of February 1, 2017, a total of 9,554 publically maintained hydrants exists within the District. Of those, 44, or 0.46%, were out of service due to defects which is below the 1% target of out of service hydrants.  
The number of hydrants replaced in the District in FY 2016: 114 hydrants were replaced in FY 2016.
25. Please provide an update on the progress of the DC Clean Rivers Project to reduce combined sewer overflows (DC Water's Long Term Control Plan), including:
- A description of the Environmental Impact Bond issued in September.
  - For each Long Term Control Plan project, please provide:
    - A description.
    - The amount of capital funds available.
    - A status report, including a timeframe for completion.

## **ENVIRONMENTAL IMPACT BOND**

On September 29, 2016, the DC Water and Sewer Authority (DC Water) issued the nation's first Environmental Impact Bond (EIB) to fund the initial green infrastructure project in the DC Clean Rivers Project. This deal offers a new type of financial instrument to fund environmental capital projects.

The \$25 million, tax-exempt EIB was sold in a private placement to the Goldman Sachs Urban Investment Group and Calvert Foundation. The proceeds of the bond will be used to construct green infrastructure practices designed to mimic natural processes to absorb and slow surges of stormwater during periods of heavy rainfall, reducing the incidence and volume of combined sewer overflows (CSOs) that pollute the District's waterways. CSO reduction has become an increasingly urgent environmental challenge as a result of climate change, which has increased the frequency and severity of intense rainfall events.

The EIB allows DC Water to attract investment in green infrastructure through an innovative financing technique whereby the costs of installing the green infrastructure are paid for by DC Water, but the performance risk of the green infrastructure in managing stormwater runoff is shared amongst DC Water and the investors. As a result, payments on the EIB may vary based on the proven success of the environmental intervention as measured by a rigorous evaluation. By financing this project through the EIB, DC Water seeks to create a model funding mechanism that other municipalities can leverage to advance the use of green infrastructure to address stormwater management in their communities.

## **ANACOSTIA RIVER TUNNEL**

---

### **Description**

The Anacostia River Tunnel Project is the second in a series of four tunnels that will mitigate combined sewer overflows that are currently discharged to the Anacostia River. The 23 foot diameter tunnel is approximately 12,500 feet in length and extends from Robert F. Kennedy (RFK) Stadium in northeast DC to Poplar Point in southeast DC. In addition to the tunnel construction, DC Water has also been building surface facilities to divert the combined sewer overflows to the tunnel at various sites along the I-295 corridor, M Street SE and the Southeast Freeway. These facilities include deep shafts that range from 20 to 60 feet wide and large concrete structures to divert raw sewage from being discharged to the Anacostia River. The construction of these facilities is unparalleled in the District. Not since the construction of the original sewer system in the early 1900's and the Metro has the District seen construction of this magnitude.

The Anacostia River Tunnel will connect with the Blue Plains Tunnel at Poplar Point and deliver captured combined sewer overflows to the Blue Plains Advanced Wastewater Treatment plant for treatment prior to discharge to the Potomac River. With the Blue Plains and Anacostia River Tunnels in service, DC Water will have met a key Consent Decree milestone in the Clean Rivers Project. In March 2018, it is anticipated that upon completion of this first phase of the Clean Rivers Project, combined sewer overflows to the Anacostia River will be reduced by 81 percent.

### **Status Report**

- Mining of the Anacostia River Tunnel completed on November 5, 2016.
- Work at CSO-007 and CSO-005 occurring concurrently.
- The Design Builder was able to maintain an on-time completion on the longest path for the project.
- Work continued at the CSO 005, CSO 007, M Street, CSO 018 and CSO 019 Construction Sites – construction of shafts and diversion chambers.

Construction of the Anacostia River Tunnel Project is anticipated to be complete by **March 2018**.

## Spending

Contract Value	Billed to Date	% Billed	Remaining
\$ 253,859,999	\$ 188,537,295	74%	\$ 65,322,704

## CSO 021 DIVERSIONS

---

### Description

The CSO 021 Diversion Facilities projects consists of construction of a structure to divert flows from the existing Combined Sewer Overflow (CSO) 021 outfall, the largest CSO on the Potomac River. In order to minimize future impacts, the project is being constructed simultaneously alongside the ongoing Expansion Project at the John F. Kennedy Center for the Performing Arts. The diversion structure will ultimately be connected to the future Potomac River Tunnel, which will convey the diverted flows to the Blue Plains Advanced Wastewater Treatment Plant for treatment prior to discharge to the Potomac River.

### Status Report

- Support of excavation installation complete for the diversion structure and drop shaft.
- The Contractor is currently establishing the maintenance of flow system in order to prepare for mass excavation and construction of the underground structures.

Construction of the CSO 021 Diversions Project is anticipated to be complete by **January 2019**

### Spending

Contract Value	Billed to Date	% Billed	Remaining
\$ 33,950,000	\$ 8,119,027	24%	\$ 25,830,973

## **FIRST STREET TUNNEL**

---

### **Description**

The First Street Tunnel project is a major component of the Clean Rivers Project, designed to mitigate sewer flooding and basement backups in the District’s historic and densely populated Bloomingdale neighborhood. Bloomingdale and its surrounding neighborhoods have been historically affected by sewer flooding and were severely impacted by four storms in the summer of 2012 that caused significant damage to homes, the environment and public property. As a result, DC Water and the District accelerated the design and construction of the First Street Tunnel in order to mitigate the effect storms have on the undersized sewers serving the neighborhood. The infrastructure designed to mitigate flooding, including the tunnel, are located within the highly urbanized neighborhood – with some structures being less than ten feet from residents front door steps. The success of this extraordinary public works project in its unique location can be attributed to a well informed and supportive public. Early identification of community mitigation, working cooperatively with stakeholders and frequent dissemination of accurate information established a culture of problem solving collaboration with the community.

Between now and 2023, the First Street Tunnel will act as a large underground storage tank and, in conjunction with the other flood relief facilities constructed in Bloomingdale, the probability of flooding in any given year will be reduced from 50 to 15 percent.

### **Status Report**

- Tunnel system ready to accept flow.
- Tunnel, shafts and diversion chambers completed.
- Performing training for operation of facilities.
- Testing of mechanical systems to control air and dewater tunnel.

The construction of the First Street Tunnel was completed in December 2016. By early summer of 2016, the tunnel system could take flow. Within the last few weeks, the Contractor completed the final testing of the pumping station and testing of the bulkhead gates and stop logs for leakage.

### **Spending**

Contract Value	Billed to Date	% Billed	Remaining
----------------	----------------	----------	-----------

\$	\$	94%	\$
157,675,000	148,946,570		8,717,754

## **JOINT BASE ANACOSTIA-BOLLING OVERFLOW AND DIVERSION STRUCTURES PROJECT**

---

### **Description**

The JBAB Overflow and Diversion Structures Project, located on Joint Base Anacostia-Bolling (JBAB) military facility, includes the construction of a tunnel overflow structure and diversion chamber. The diversion chamber will divert excess combined sewer flow to the Blue Plains Tunnel where it will be stored and eventually treated at the Blue Plains Advanced Wastewater Treatment Plant prior to discharge to the Potomac River. The overflow structure will control tunnel overflows to the Potomac River when its capacity is exceeded while providing solids and floatable control. The overflow structure has been architecturally designed to serve the dual purpose of providing a scenic overlook structure and providing views of the Potomac River and surrounding areas to JBAB personnel.

### **Status Report**

- Flow from the Potomac Outfall Sewers has been diverted to a parallel gravity bypass channel and mass excavation for the underground structures is complete.
- Construction of the diversion, overflow and ventilation structures is well underway.
- All base slabs are in place, substantial progress has been made on structural walls and the Contractor is preparing to begin placing roof slabs.

Construction of the JBAB Overflow and Diversion Structures Project is anticipated to be complete by **March 2018**.

## **MAIN PUMPING STATION DIVERSIONS**

---

### **Description**

The Main Pumping Station Diversions Project is an essential component of the Clean Rivers Project. Currently, practically every time it rains, combined sewage overflows into the Anacostia River from the District's antiquated sewerage system. Two diversion chambers will be installed near Tingey Street to divert combined sewer overflows (CSOs) into the Blue Plains Tunnel by way of the Main Pumping Station Drop Shaft. The Blue Plains Tunnel will store and convey the CSOs to the Blue Plains Advanced Wastewater Treatment Plant for treatment prior to discharge to the Potomac River. Ventilation control facilities will be constructed within the Main Pumping Station Drop Shaft to regulate air flow in the tunnel system.

The project is situated directly in front of DC Water's Main Pumping Station, an historic building, originally built in the early 1900's. The above ground portions of the Main Pumping Station Diversions are being constructed within the Main Pumping Station compound. Final design of the structures has been coordinated with the District Historic Preservation Review Board (HPRB), the Commission of Fine Arts (CFA) and the National Capital Planning Commission (NCPC), ensuring compatibility with the historic Main Pumping Station building.

### **Status Report**

- Contractor completed support of excavation including 151 Four Foot Diameter Secant Piles, 18 Inch Diameter Auger Piles, liner plate shafts and limited sheet piles.
- Excavation completed for the diversion chambers and the surge tank area.
- Flume installed for CSO 012.
- Slabs and walls partially completed for CSO 009/011, CSO 012 and the surge tank.
- Decking/work platform completed for drop shaft.

Construction of the Main Pumping Station Diversion Project is anticipated to be complete by **January 2018**

### **Spending**

## NORTHEAST BOUNDARY TUNNEL UTILITY RELOCATIONS

### Description

In preparation for construction of the Northeast Boundary Tunnel Project, scheduled to start in 2017, DC Water is working to relocate existing water, sewer, gas, electric and communication services at pivotal points along the tunnel alignment. The relocation of these services along the future tunnel alignment is critical for successful completion of the project. DC Water is coordinating efforts with Washington Gas, Pepco and Verizon during the process to minimize disruptions in these services.

#### Relocation Scope of Work:

- 700 feet of Sewers
- 2,100 feet of Water Mains
- 2,400 feet of Electric Power Lines
- 1,320 feet of Gas Lines
- 420 feet of Communication Lines

### Status Report

- The Contractor has completed the sanitary sewer relocation, and about half of the communication and electrical relocations at the R Street Construction Site. Work has continued on the 48” water relocation.
- Construction has commenced at both Florida Avenue and Rhode Island Avenue Construction Sites.
- The Contractor has completed all of the water and sewer relocations and approximately half of the Pepco ductbank at the 4th Street Construction Site. The only remaining utility at 4<sup>th</sup> Street is a communication line.
- The Contractor completed the 8” water relocations and is nearing completion of the sanitary and storm relocations at the Mt. Olivet Road Construction Site. Work is starting on the 20” watermain in mid-February 2017.
- Washington Gas has completed their relocations at the Florida Avenue and 4th Street Construction Sites.

Construction of the Northeast Boundary Tunnel Utility Relocations Project anticipated to be complete by **November 2017**.

## POPLAR POINT PUMPING STATION REPLACEMENT

Construction is underway on the 55 million gallon per day Poplar Point Pumping Station (PP-PS), which is situated between South Capitol Street, Suitland Parkway and the Anacostia Freeway in southeast DC. The new Pumping Station will replace the original Poplar Point Pumping Station which has served the District since 1915. The PP-PS will handle sewage flows from much of southeast DC. Sewage will flow by gravity to the PP-PS through the existing Anacostia Main Interceptor, where it will be "lifted" and discharged into the major sewers that deliver flow to Blue Plains Advanced Wastewater Treatment Plant. At that point, sewage collected from this area of the District will be treated and discharged to the Potomac River. The PP-PS will incorporate green design elements such as photovoltaic solar panels, an extensive green roof and green infrastructure incorporated into the landscape.

## Status Report

- Below-grade concrete work at pumping station is complete.
- Discharge connection chamber is complete.
- Microtunnel to emergency overflow chamber is complete.
- Microtunnel for Barry Road Sewer is complete.
- Installation of support of excavation system for Main Outfall Sewer Diversion chamber is complete.
- Ground level slab support pile installation is complete.

Construction of the Poplar Point Pumping Station Replacement Project is anticipated to be complete by **June 2017**.

## PROJECTS IN DESIGN OR PROCUREMENT

Project	Status	Construction Start	Construction Finish
Northeast Boundary Tunnel	Procurement	9/18/2017	8/2023

The proposed Northeast Boundary Tunnel (NEBT) is a large, deep, sewer tunnel that will increase the capacity of the existing sewer system in the District, significantly mitigating sewer flooding and improving the water quality of the Anacostia River. The NEBT is the largest component of the Clean Rivers Project and will start just south of the RFK Stadium and extend north to Rhode Island Avenue and west to R Street NW. In addition to the tunnel, DC Water will be constructing diversion facilities along the tunnel alignment to capture flows from the existing sewer system and divert them to the tunnel. The NEBT will connect with the First Street Tunnel and Anacostia River Tunnel to provide a complete gravity system from Northwest DC to Blue Plains Advanced Wastewater Treatment Plant, where all flows captured by the tunnel system will be delivered for treatment prior to discharge to the Potomac River.

Completion of the NEBT in 2023 will fulfill new facility construction on the Anacostia River required by DC Water’s Consent Decree. Once the NEBT is connected to the other Clean Rivers tunnels, combined sewer overflows to the Anacostia River will be reduced by 98 percent. In addition to controlling combined sewer overflows, the construction of the Northeast Boundary Tunnel will reduce the chance of flooding in the areas it serves from approximately 50 to 7 percent in any given year.

Project	Status	Construction Start	Construction Finish
Rock Creek Green Infrastructure Project A	Procurement	2/2017	9/2018

Rock Creek Project A is the first green infrastructure project proposed to be constructed in the Rock Creek Sewershed to reduce the level of pollution to Rock Creek produced by the discharge of stormwater runoff and sanitary sewer flows, known as combined sewer overflows (CSOs).

Rock Creek Project A involves the construction of innovative GI technologies that include bioretention on planter strips and curb extensions, permeable pavement on streets and alleys and downspout disconnection (including rain barrels). These practices will manage stormwater by taking advantage of the earth's natural processes, such as allowing the water to infiltrate into the soil, evaporate into the air or be used by plants which expire it as vapor. In addition to managing stormwater, GI will contribute to beautifying the streetscape and making it safer and more welcoming for pedestrians, bicyclists and drivers.

Project	Status	Construction Start	Construction Finish
Potomac River Green Infrastructure Project A	Design	3/2018	2/2019

Potomac River Project A is the first green infrastructure project proposed to be constructed in the Potomac River Sewershed to reduce the level of pollution to the Potomac River produced by the discharge of stormwater runoff and sanitary sewer flows, known as combined sewer overflows (CSOs).

Potomac River Project A involves the construction of innovative GI technologies that include bioretention on planter strips and curb extensions, permeable pavement on streets and alleys and downspout disconnection (including rain barrels). These practices will manage stormwater by taking advantage of the earth's natural processes, such as allowing the water to infiltrate into the soil, evaporate into the air or be used by plants which expire it as vapor. In addition to managing stormwater, GI will contribute to beautifying the streetscape and making it safer and more welcoming for pedestrians, bicyclists and drivers.

Project	Status	Construction Start	Construction Finish
Potomac River Tunnel	Planning	2023	2030

The Potomac River Tunnel is a major component of the DC Clean Rivers Project. The project consists of a large deep sewer tunnel, diversion facilities and support structures. The tunnel is being planned to capture flows from the existing combined sewer overflow points along the Potomac River from the

Lincoln Memorial to Georgetown. DC Water is proposing to construct the Potomac River Tunnel primarily on National Park Service (NPS) property in the National Capital Region within the Chesapeake and Ohio Canal National Historical Park, Rock Creek Park, and the National Mall and Memorial Parks in the District.

In accordance with the National Environmental Policy Act (NEPA) of 1969, 42 U.S.C. 4332(2)(C), the National Historic Preservation Act (NHPA), and other laws, regulations and policies, DC Water and the NPS are preparing an Environmental Impact Statement (EIS), which will evaluate potential impacts of the construction of the Potomac River Tunnel on the natural, cultural and human environment. The NPS and DC Water are co-lead agencies in the development of the EIS.

## **PROJECTS COMPLETED**

---

The following projects have been completed:

- Blue Plains Tunnel
- CSO 007 Diversion Sewer
- CSO 019 Overflow Structure
- Digester Demolition at Blue Plains
- Green Infrastructure at DC Water Facilities
- Irving Street Green Infrastructure
- M Street Diversion Sewer
- Tingey Street Diversion Sewer

26. Please describe how DC Water has worked to increase its hiring of District residents during FY 2016.

- How many graduates of the DC Water Works program have been hired by DC Water? How many graduates have found other employment opportunities?
- What percentage of DC Water contracts were awarded to certified business enterprises in FY 2016?

(Please see attachments)

27. Was the First Street Tunnel project to mitigate flooding in Bloomingdale and LeDroit Park completed on schedule in late spring 2016 (the projected completion date DC Water provided in its FY 2015 pre-hearing questions)? If not, what is the status of the project? Yes

28. Please describe the status of DC Water's Thermal Hydrolysis and Anaerobic Digester Project, including:

The thermal hydrolysis (the first of its kind in North America) and digestion processes have been up and running for over 2-years, and are still considered to be in an optimization phase. Since February 2015, all solids produced at Blue Plains were - and continue to be - processed through thermal hydrolysis and digestion and stabilized to Class A exceptional quality (EQ) biosolids. Production of biosolids declined from 1,087 wet tons/day (wt/d) in fiscal year 2014, to 581 wt/d and 435 wt/d in fiscal years 2015 and 2016 respectively (by 60 percent). These reductions in biosolids production have resulted in significant savings related to the hauling of biosolids for beneficial use

- In its answers to the Committee's FY 2015 pre-hearing questions, DC Water states that its current digesters have some capacity for additional flow and that it was exploring the feasibility of accepting food waste and other organic waste from the District. Will DC Water start accepting food and organic waste for its digesters? If not, why not?
- The thermal hydrolysis (the first of its kind in North America) and digestion equipment has been up and running for 2-years, and is still considered to be in a start-up phase. This is an enormous project, with far reaching benefits for the organization and the rate payers. Operational staff has requested that we not introduce any outside organic wastes to the system until such time that we fully understand the capacity issues and operational parameters of this new equipment. While we have a model showing the costs and benefits of adding food waste, and are vetting these numbers, we will not add foodwaste until the start-up period is over. This is expected to take an additional 18 months.
  - How much energy are the digesters currently creating, and how does this contribute to DC Water's energy usage? Does DC Water plan on expanding the Digester Project to create more energy in the future?
  - Is DC Water marketing Class A biosolids produced by the digesters as soil amendments, as described in its FY 2015 pre-hearing questions? If so, how much revenue does this bring in?

Bloom is DC Water's brand name for its Class A biosolids, certified by EPA to meet Exceptional Quality (EQ) requirements. This is a new and nutrient rich soil amendment – the first in North America generated from the CAMBI thermal hydrolysis process. The Authority's strategic intent is to make Bloom, the soil amendment of choice in the mid-Atlantic region for soil blenders, commercial landscapers and government agencies, competing as an economic alternative to compost on value, performance and environmental reputation. The initial phase of this strategy, in place since fiscal year 2016, involves a three year plan to market 60,000 wet tons of Bloom at a cost savings of \$2.6 million and additional revenue of \$400,000

29. Please describe the status of the Glover-Archbold Park Sewer Rehabilitation Project. Has DC Water conducted a Public Scoping Meeting and started its detailed design for this project, as planned for FY 2016? Is the project on schedule to begin construction in 2019?

DC Water is working in cooperation with the National Park Service (NPS) to prepare an environmental assessment (EA) for the Glover-Archbold Park Sewer Rehabilitation Project as required by the National Environmental Policy Act (NEPA). A draft environmental assessment was submitted to the National Park Service on January 30, 2017 and is currently being reviewed. When the draft EA is approved by NPS, DC Water and the NPS will conduct a Public Scoping Meeting. The public will be notified of the date, time, and location so interested parties and stakeholders may attend. The project is currently on schedule but interested parties and stakeholders should be aware that the NEPA process requires input from multiple agencies and the public before a permit is issued.

30. Please describe the status of the Soapstone Sewer Rehabilitation Project.

- When does DC Water expect a draft environmental assessment will be shared with the public?
- Will the project begin construction in 2017, as planned?

The Environmental Assessment for Soapstone was submitted to NPS in July 2016. NPS requested additional information required to confirm mitigation measures are appropriate. DC Water is in the process of obtaining that information.

We plan to distribute a Public Review Draft EA for the Soapstone Valley Park Sewer Rehabilitation Project in 2017 and are planning for construction in 2018. However, as discussed previously, interested parties and

stakeholders should be aware that the NEPA process requires input from multiple agencies and the public before a permit is issued.

31. Please provide an update on DC Water's Customer Affordability Programs.

- How many customers has the Customer Assistance program assisted and how much money has the program given out?
- 76,684 CAP customers received assistance since the program's inception in 2001 totaling \$10,651,889 in assistance. In FY 2016, 4,379 customers received the CAP discount totaling \$808,797 in assistance
- How many customers received the new 100% credit for the Water System Replacement Fee?  
In FY 2016, 4,379 received the 100% discount in the Water System Replacement Fee and so far in FY 2017 3,462 customers received this discount.
- How many customers has the SPLASH program assisted and how much money has the program given out?  
3,826 customers received assistance totaling \$1,169,813 from SPLASH since the program's inception in 2002. In FY 2016, 309 customers received SPLASH assistance totaling \$104,289.
- Has DC Water created any new programs to help low income consumers pay their water bills?  
DC Water plans to extend its CAP program effective May 1, 2017 to include a 50% credit on the Impervious Area Charge (IAB) to all eligible customers.

32. Please describe the status of the construction of DC Water's Administrative Headquarters Building. When is the project scheduled to be completed? Is the project on budget to spend \$55 million in hard construction costs?

DC Water's Administrative Headquarters Building (HQO) acts as a civil landmark, expressing the current state-of-the-art in sustainable architecture consistent with DC Water's mission. Wrapping on two sides the O Street sewage pumping station, currently a 2-story brick structure, with a fluid and modern 6-story building that emulates DC Water's mission in the community and provides a much more aesthetically pleasing view from the Anacostia River. HQO demonstrates that efficient use of industrial space in a dense urban environment is not only possible, but environmentally sensitive. We have included a number of public benefits and project amenities that we believe demonstrate that industrial operations can be

aesthetically pleasing and value to the surrounding community, while keeping our critical infrastructure safe and secure.

After receiving tremendous support from our local ANCs, Ward 6 CM Allen, and the Capitol Riverfront BID, HQO was approved by NCPC in January, 2016 and the Zoning Commission in March, 2016. DC Water commenced construction this past July, and progress continues as we are digging the 250+ auger cast piles that will form the structural foundation for the building. DC Water expects to reach substantial completion in March, 2018 and move in our departments in phases throughout the spring. The project budget was increased from the 2013 estimate by \$5 million in 2016 once the design was finalized, bringing the total hard construction costs to \$60 million, which was well within the normal rate of inflation and allows us to be even more flexible by including a raised floor for all of our electrical and data wiring.

Our design strategy is to make the building welcoming once you enter and present a design that makes you want to enter it – out of civic pride, curiosity, environmental, and/or architectural interest. As the world-class, iconic, and highly sustainable headquarters for DC Water, the mission, vision and brand promise will all come together in one memorable experience. HQO will be a LEED Platinum office building employing innovative and modern technologies in a friendly and open work environment. Given DC Water’s mission and role in the community we have emphasized stormwater management and energy efficiency in the design, the details are below:

- 100% of the rainwater falling on the site will be captured and reused it for 100% of non-potable purposes on-site. Extra amounts will be used for occasional irrigation during extreme dry periods. The cistern water will be filtered and lightly treated prior to reuse in a piping system separate from potable water supplies.
- LID bioswales allow water to infiltrate on site. The heavily planted site reduces the heat island site relative to the existing paved condition.
- The techniques used in capturing and reusing rainwater on this site will be a feature of the main lobby as a teaching tool, with intermediate storage tanks on display as a luminous, translucent feature along the primary display wall.
- The building is designed to maximize daylighting and views while minimizing the use of electric lighting due to its narrow and curving form, strategic use of glass, position of interior program, and lighting control

systems that automatically dim and turn off lighting when appropriate. Overhangs on the south side of the building reduce glare.

- Demonstration of the green, alternative energy technology wastewater thermal, which will leverage the heat in the sewage being pumped through the station to heat & cool the offices.
- The steel structure has a lower carbon footprint than the equivalent construction in concrete.

The DC Water Main & O Campus - featuring HQO, the O Street Pump Station and the Historic Main Pump Station - will no longer be closed to the public. DC Water will be welcoming residents and visitors to our HQ who have DC Water business to conduct; such as attending one of our Board of Directors meetings, applying for or interviewing for a job, attending a DC Water community event or town hall meeting, procurement meetings, etc. While narrow, the main lobby has been designed to handle visiting groups - school classes or VIPs - while allowing normal daily employee and visitor traffic to access the secure elevator core. Visitors and tour groups to our new building will enter through the main lobby, which is being designed with high ceilings to capture the sun light and allow panoramic views of the river. With the grand panorama of the shorelines on both sides of the Anacostia River, the view of the bridges, topography, landscape, and boat traffic, we designed the lobby to reinforce awareness of the DC Water mission for clean rivers and a more sustainable city.

The interpretative and educational displays alternate with windows into the O Street Pump Station to create an active, colorful, and thoughtful experience demonstrating the mission and telling the story of DC Water. DC Water works with many environmental partners and the D.C. community to educate and help citizens protect our environment, and would look to build upon and expand these opportunities in the new HQ facility. DC Water is committed to being a vital member of the community we serve, especially the revitalized Anacostia Waterfront neighborhood, and as such we will leverage our public lobby and displays to share community news, advertise Yards Park or Capital Riverfront BID events, and generally contribute to the area by having 350 staff support local and expanding retail and restaurant options.

33. Please describe DC Water's progress to implement the Water Quality Assurance Amendment Act of 2012.
- Did DC Water complete the research project on endocrine disruptor compounds mandated by the Act? What were the results?

- Have DC Water and the Mayor appointed members of the Water Quality Advisory Panel? If not, when will this panel be appointed and start to meet?

Please describe DC Water’s progress to implement the Water Quality Assurance Amendment Act of 2012.

- Did DC Water complete the research project on endocrine disruptor compounds mandated by the Act? What were the results?

The research has been completed, with all data collected and analysis performed, and the draft report is currently being reviewed by the project team and DC Water staff. The next step will be to issue the report to the Mayor’s office in the April/May timeframe.

The project had two objectives: 1) Evaluate the upstream and downstream impacts from “best-in-class” nutrient control, agricultural management, stormwater management and wastewater treatment strategies and 2) Assess the relative contribution of the endocrine disruptor compounds (EDCs) from wastewater treatment plants performing biological nutrient removal.

The research has also been leveraged into receipt of an EPA STAR grant (Improving Water Reuse for a Much Healthier Potomac Watershed, [https://cfpub.epa.gov/ncer\\_abstracts/index.cfm/fuseaction/display.abstractDetail/abstract/10501/report/0](https://cfpub.epa.gov/ncer_abstracts/index.cfm/fuseaction/display.abstractDetail/abstract/10501/report/0)), which will extend the research for another 3 years. The continuation of the research will provide an opportunity to further confirm the conclusions of this work, as well as to develop a broader understanding of effective co-management of nutrients and EDCs in the Potomac Watershed.

The following summarizes the preliminary results:

- Advanced nutrient control at the two water reclamation facilities in the watershed (Blue Plains and another wastewater plant upstream of Blue Plains) resulted in lower EDCs discharged in the Effluent than were present in the background receiving streams, suggesting effective management of nutrients and EDCs in wastewater treatment.
  - Sampling through the Blue Plains plant revealed very large reductions in EDCs with advanced nitrogen control,

suggesting effective co-management of EDCs and nitrogen from WWTP point-sources.

- Agriculture runoff without best management practices (BMPs), urban runoff without best management practices and combined sewer overflows resulted in greater levels of EDCs than observed in the background data from the Potomac River.
- An annual load analysis indicated non-point sources (agriculture and urban sources) accounted for over 80% of EDC load to the Potomac Watershed, with Blue Plains contributing less than 3%.
  - Implementation of BMPs showed significant reduction in EDC inputs to the Potomac from agricultural and urban runoff. Further implementation of non-point source BMPs could effectively reduce non-point source loads of EDCs to the Potomac Watershed.
- Results from two, 30-day, sampling campaigns indicated higher levels of EDCs in the Potomac during the Spring of 2016 deployment when compared with the Fall of 2015. However, the discharge of Blue Plains Effluent correlated with reductions in observed EDC mass between Hains Point and National Harbor in both Fall 2015 and Spring 2016 deployments, suggesting highly treated wastewater can reduce levels of EDCs over extended periods.

Please describe any successes and challenges associated with the 2016 changes to DC Water's High Usage Notification service. Will DC Water make any further improvements to this service in 2017? DC Water revised the High Use Notification Application (HUNA) in April 2016 to set tighter tolerances in the analytical tool used to identify potential leaks in our customers' homes. We are delighted to report that the changes to the HUNA program more than doubled the number of alerts sent to customers to approximately 85 per day and that 22,672 alerts went out to customers in FY 2016. For comparison, during the preceding fiscal year ended September 30, 2015, we sent out 10,736 alerts from the HUNA system.

34. Please describe DC Water's progress with water system upgrades during FY 2016 and FY 2017, to date.
- Please provide a chart of how many small and large water mains have been renewed/rehabilitated in FY 2015, FY 2016, and the projected amount for FY 2017.

- SDWMR - refer to our response to Question No. 39
- Large Water mains renewed/rehabilitated -
  - FY15 – 1.5 miles
  - FY16 – 1.9 miles
  - FY17 – 0.0 miles to date/planned due to budget deferrals
- Water Main inspections (precursor to large main renewal)
  - FY15 – 8.3 miles
  - FY16 – 6.2 miles
  - FY17 – 2.3 miles to date + 4.0 miles planned
- What drinking water pumping stations were upgraded in FY 2016 and which will be upgraded in FY 2017?
 

All drinking water pump stations are recently upgraded (see below) except for Ft Reno PS whose upgrade is scheduled to be completed in 2017.

  - Bryant Street PS – major upgrades completed in 2006
  - Anacostia PS – total reconstruction completed in 2009
  - Fort Reno PS – major upgrades scheduled for completion in 2017
  - 16<sup>th</sup> & Alaska PS – major upgrades completed in 2015

35. Please describe DC Water’s programs to encourage replacement of all public and private lead service pipes in the District.

DC Water strongly encourages all customers to identify and remove sources of lead. DC Water launched an interactive map in June 2016 showing our pipe material information for service lines (<https://geo.dcwater.com/Lead/>). The outreach surrounding the new map also boosted attention to our existing lead replacement programs, information about lead sources, free lead test kits, and tips on minimizing lead in water. DC Water has a program allowing homeowners at any time to request their lead service line replaced in public space when they have the private side replaced. DC Water also coordinates lead service line replacements in conjunction with water main replacements and emergency repairs. For water main replacement projects that include service lines, DC Water installs a new service pipe to the property line and encourages homeowners to replace their portion at the regulated rate of \$500 for breakthrough into the building and \$100 per linear foot from the face of the house to the property line. DC Water sends multiple notices to homes, attends ANC meetings, and send emails to neighborhood listserves

encouraging homeowners to replace the service pipe on their private property at this time.

- What is the status of lead service pipe replacements in public space and, if available, on private property? Please provide a map, if available, or other location information by Ward, indicating areas where lead service pipe replacements in public space are still needed.

DC Water launched an interactive map in June 2016 showing our pipe material information for service lines (<https://geo.dcwater.com/Lead/>).

The tables below show our current pipe material inventory and the number of lead service line replacements (LSRs) conducted since 2003. Partial service line replacements are those where the homeowner did not elect to have the private portion replaced so DC Water replaced up to the property line.

<b>Material Type</b>	<b>Public Portion</b>	<b>Private Portion</b>
Lead	11,777	7,921
Unknown	16,214	100,594
Galvanized Iron	81	588
Brass	9,782	560
Copper	82,833	13,970
Non-lead	5,361	2,466
Other	73	22
<b>Total</b>	<b>126,121</b>	<b>126,121</b>

<b>Fiscal Year</b>	<b>Partial LSRs</b>	<b>Full LSRs</b>	<b>Fiscal Year</b>	<b>Partial LSRs</b>	<b>Full LSRs</b>
FY03	373	9	FY11	119	45
FY04	1,710	106	FY12	149	49
FY05	3,132	954	FY13	184	36
FY06	3,182	828	FY14	121	163
FY07	3,360	458	FY15	292	166
FY08	2,402	700	FY16	280	283
FY09	377	68	FY17*	123	98
FY10	214	81	<b>Total</b>	<b>16,018</b>	<b>4,044</b>

- In June 2016, Mayor Bowser announced a new lead concentration level standard of less than 1 part per billion (ppb) at DC Public Schools and DC Parks and Recreation Centers. This is also the standard endorsed by the National Academy of Pediatrics for drinking water consumed by children. Is DC Water making efforts to decrease lead concentrations in drinking water to meet the 1ppb standard?

DC Water goal is to have no lead sources in the District of Columbia and to that end we only use lead free material in all our systems that distribute potable water throughout the District. However, the major sources of lead in the District continue to be from sources beyond DC Water's sphere of influence specifically in the service lines supplying water to some homes and premise plumbing inside the home. We continue to educate customers about the dangers of lead and the potential sources but many customers still do not take advantage of our programs when we are replacing the service line in public space as evidence by the historical reference chart above.

- If a DC Water customer finds that their tap water has an elevated lead concentration level, how does DC Water respond?

DC Water conducts additional water analyses and a plumbing survey for homes that had lead levels of 15 ppb or greater. The water analyses can show where the lead spikes and therefore indicate the source of lead in the plumbing. We often work directly with homeowners to identify the lead sources and minimize their exposure.

- How does DC Water conduct outreach to homeowners and renters about their services to provide free lead testing kits and replacement of lead service pipes?

DC Water provides extensive education about lead in drinking water on our website. We also include references to lead information, free lead test kits, and service line replacement programs in outreach materials sent to homes. District residents can receive a free lead test kit annually to test their water.

36. Please describe the agency's efforts along with the Metropolitan Washington Council of Governments to raise public awareness about the impact of flushable wipes and other products that are causing problems in DC's sewer system.

We are actively engaged with the DC Department of the Environment, which will write regulations later this year. We are also reviewing a range of social media and public outreach opportunities to help the District government spread the word and educate consumers once the new law is implemented. We are also aiming to work closely with nearby local governments and the COG.

- How does DC Water plan to coordinate the Department of Energy and Environment in implementing the Nonwoven Disposable Products Act of 2016? See above

37. Please describe any progress on DC Water's plan to install solar panels over its roofs, tanks, and other property.

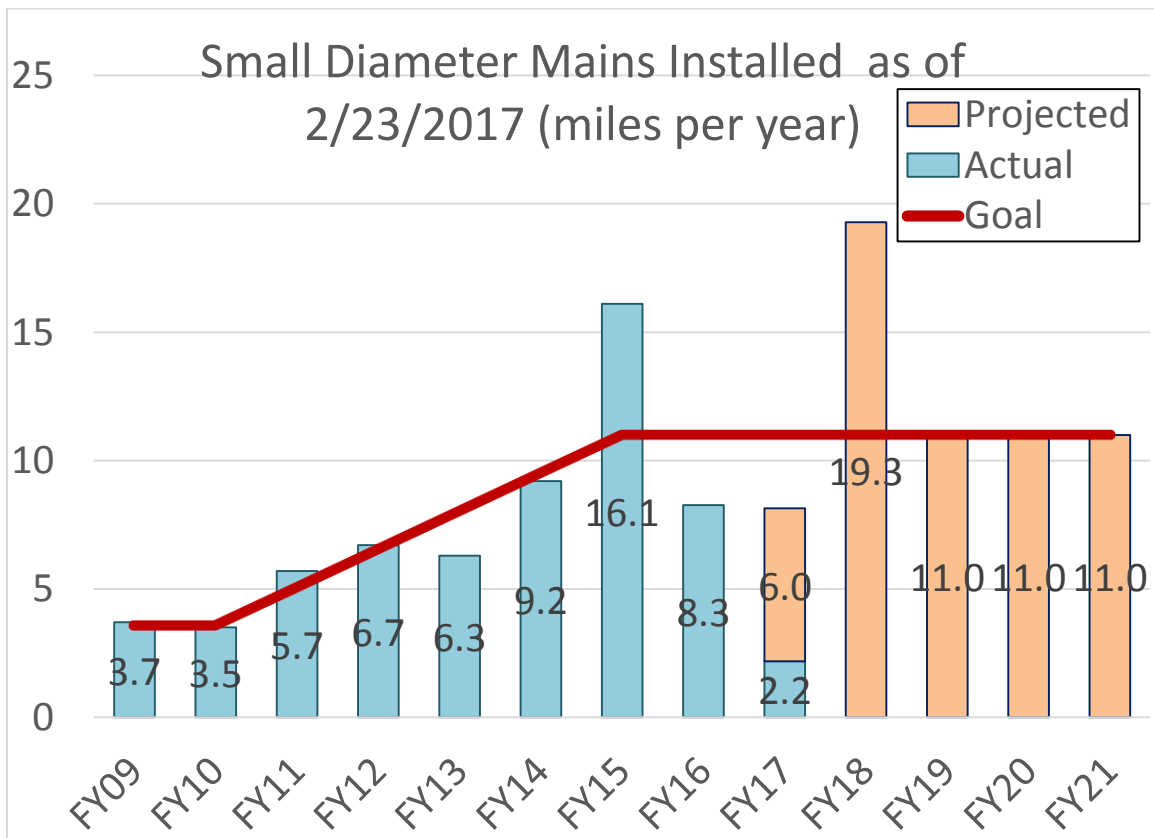

The economics of solar power in DC have changed dramatically with extension of both the SREC values and the Federal tax incentive. A study indicates that DC Water can generate approximately 8 – 10 MW of power during daylight hours, and likely for less than the unit cost for brown power off the grid. The Authority intends to develop and release an RFP to solicit qualifications for solar power providers to finance and build a solar array at Blue Plains through a power purchase agreement (PPA).

38. Please describe the status of DC Water's lawsuit against the U.S. Environmental Protection Agency for corrections to the Total Maximum Daily Load for E. coli. DC Water's 2015 E. coli TMDL complaint against U.S. Environmental Protection Agency (EPA) is still pending. On December 23, 2016, the Department of Justice/Environmental Protection Agency (DOJ/EPA) filed a Motion requesting the Court to remand the case back to EPA without vacatur to permit EPA to take an administrative action to revise the Decision Rationale by January 13, 2017. The Motion asserts that EPA's administrative action will address the issues raised in DC Water's complaint. The Motion also requests the Court to stay the proceeding for 60 days to permit the parties time to assess and respond to EPA's administrative action. On January 5, 2017, DC Water filed a Motion supporting DOJ/EPA Motion and requesting the Court to stay implementation of the E. coli TMDL concurrent with the stay of the proceedings. On January 13, 2017, the Court granted DOJ/EPA's Motion, staying the proceedings for 60 days and granting DC Water's request to stay the implementation of the E. coli TMDL for 30 days. On January 13, 2017, EPA issued its revised Decision Rationale for the District's E. coli TMDL. DC Water is evaluating the revised

Decision Rationale and will respond to the Court by March 14, 2017.  
 DC Water will provide an update, if requested.

39. Did DC Water meet or exceed its goal to replace 1% of small diameter water mains in the system in FY 2016? Is DC Water on track to meet or exceed this goal in FY 2017?

DC Water did not meet the annual 1% goal for 2016 and does not forecast achieving the goal during 2017. Based on lessons learned from the previous 5 years of Program ramp up, several adjustments were necessary to construction contract documents for several of the projects planned during these two years, which set us back in terms of achieving the annual production goal. Specifically, DC Water now produces Surface Restoration Plans which help manage the extent of surface restoration required by DDOT. Implementation of these Surface Restoration Plans created a one-time, temporary setback in delivering the 1% goal. This was done intentionally to avoid change orders, but did create a temporary dip in FY16 and FY17. However, the shortfall for these two years will be made up during FY 2018 as noted in the graph below and we anticipate sustaining the 1% goal from that point forward.

Description	Age	Public Access
Commercial system for mapping organizational goals to departmental tasks.		None
System for tracking room set-up requests for A/V.		None
Database to track DC Water user IT related incidents	10 years	None
This database is used for HCM to automatically notify employees that it is time to get their CDL Certificate renewed		None
this database is used to extract the employee's department head to send him a copy of the letter that the employee is receiving		None
this database tracks to see if the employee received their notice that their driver's license it going to expire Y72 or Y30		None
Reporting database HCM uses monthly to run custom applicant reports. This is an auto feed from Ceridian		None
Compellant Storage Database. Records information on servers and attached LUNS, as well volumes exported to servers.	1 year	None
Correspondence tracking system for Procurement's use		None
Correspondence tracking system for DC Water users		None
CPM Production Database, Gateway for VLM Interface, Staging for Vertex	2 years	None
Tracks maintenance and impact of sewer/water system components		None
IT-Ticket Application		None
IT-Ticket application workflow		None
Reporting module		None
Stores customer survey information		None

LinkoCTS - Compliance Tracking Software is designed specifically for Industrial Pretreatment compliance tracking. LinkoCTS, now in its 12th Version Release, is a mature and highly functional database software application. In accordance with EPA 40 CFR - 403 and the new pretreatment streamlining rule, LinkoCTS is an accurate and organized way for POTW's to manage activities and evaluate industrial pretreatment compliance. Because not all pretreatment programs are alike, Linko offers a variety of product configurations certain to meet your unique responsibilities. Our Add-On Modular Features allow us to meet your program's specific responsibilities.	1 year	None
Backup/Failover database for www.dewater.com	8 years	None
Citrix XenApp is the industry-leading solution for virtual application delivery, providing Windows apps as secure mobile services.	1 Year	None
Used during the 1010 walk company fitness program to track and compare teams. This is a seasonal database		None
production ivrstats database - stores IVR-related stats & data like Call Volume, Employment Opportunity Listings, etc.	10	None
Backup ivrstats database (Production is on FST-SQL)	10	
Database for the Production Kofax system. Kofax is part of the Enterprise Document Management System, used to process and release documents to Livelink.		None
Database for the Production Kofax system. Kofax is part of the Enterprise Document Management System, used to process and release documents to Livelink.		None
System for tracking lead test kit results		None
Keeps track of software purchased / Software inventory		None
administartion setup database		None
Citrix XenApp is the industry-leading solution for virtual application delivery, providing Windows apps as secure mobile services.	1 Year	None

Vertex Reporting Tool. Payment and customer information pulled from Vertex external database maintained by third party.	2 years	None
IT Purchase Order Request Tracking System		None
Used for Email Archives	12 Years	None
document management applications, and enables high volume		None
This DB is used by Facilities; currently the access is setup through SimpleK application and limited to the added users. For backend the access is based on DB Profiles	4	None
Stores Star historical data; access is via a Web Interface and DB user list based on managed roles	12	None
McAfee ePolicy Orchestrator (McAfee ePO) is the most advanced, extensible, and scalable centralized security management software in the industry.		None
This database is used for HCM to do their SQL Reprting		None
Report Manger		None
This DB is used for storing Automated Meter Readings. This data provides daily export to AMR Graph/HUNA database instances. Access to this db is through web interface (internal website) and through DB users and profiles		None
Use to test/development BI solution		None
Configuration DB for SharePOint services		None
Content DB for Project Server 2010		None
Content DB for Project Server 2010		None
Content DB for Project Server 2010		None
Content DB for Project Server 2010		None
Content DB for Project Server 2010		None
Configuration DB for SharePoint services		None
Configuration DB for SharePoint services		None

Managing All Intranet Web Applications		None

Vertex Reporting Tool. Payment and customer information pulled from Vertex external database maintained by third party.	5+ years	None
The inventory system to track IT assets	2yrs	None
Patching Software	2 Years	None
RightFax is a centralized, computer-based fax solution that provides faxing capabilities across an organization. RightFax integrates fax and document distribution with email, desktop and	1 Year	None
Used manage the Canon copiers and MFD units at Dcwater	1 Year	None
Windows Patch Management System	1 Year	None
Symantec Endpoint Protection - Blue Plains Ssite DB	1 Year	None
Symantec Endpoint Protection - Bryant Street Site DB	1 Year	None
Symantec Endpoint Protection - O Street Site DB	1 Year	None
Inventory System used by DETS for records management	1 Year	None
vSphere application used to manage vmware ESX/ESXi hosts and Virtual machines.	2 Years	None
Used to update and patch ESXi hosts and VM's	2 Years	None
vSphere application used to manage vmware ESX/ESXi hosts and Virtual machines.	3 months	None
Used to calculate usage (which is then queried for high usage, and notifications sent out). Also used by AMR Graph		The database itself is not public, there is a web AMR Graph interface that is public & displays the data in NCCS_Web to customers
Symantec Endpoint Protection - M Street Site	1 Year	None
Development Database for for elogger app	1 Year	None
Electronic logbook software replaces paper log books and disconnected systems collecting, storing and distributing real-time data about your 24 x 7 operations	3 Years	None
This database is used for HCM to do their SQL Reprting	2 Years	None

**1. Does the agency conduct annual performance evaluations of all of its employees? Who conducts such evaluations? What steps are taken to ensure that all agency employees are meeting individual job requirements?**

Yes, DC Water conducts annual performance evaluations for its entire full-time permanent employee population. Evaluations are conducted by the employee's immediate supervisor.

Employees who do not meet individual job requirements are placed on a performance improvement plan (PIP). The plan documents the areas of the employee's performance that require improvement, establishes an action plan for improvement, and includes specific time frames for the employee to improve performance and fully meet all job requirements.

**1. Program Specific Questions: Please describe the agency's three biggest challenges from 2016.**

- A. DC Water has been unsuccessful in its efforts to finalize a successor Master Agreement on Compensation with the unions.
- B. Updating Personnel Policies
- C. Implementing "Advancing Blue" performance management, supporting the strategic goal of developing and retaining a high performing workforce along with aligning individual performance to organizational goals.
