

## **FY2017 and FY2018 Oversight Questions**

### **Washington Metropolitan Area Transit Authority**

#### **Agency Organization**

1. Please provide a complete, up-to-date organizational chart for WMATA including, either attached or separately, an explanation of the roles and responsibilities for each division and subdivision.

#### **Answer:**

WMATA's organizational chart can be accessed here:

[http://metroweb/Documents/metro\\_org\\_chart.pdf](http://metroweb/Documents/metro_org_chart.pdf)

**Human Resources**

2. Please provide a complete, up-to-date position listing for WMATA in Excel spreadsheet format, which includes the following information:

- Title of position;
- Name of employee or statement that the position is vacant, unfunded, or proposed;
- For each vacant position, how long it has been vacant and the status to fill the position;
- Date employee began in position;
- Salary and fringe benefits, including the specific grade, series, and step of position; and
- Job status (continuing/term/temporary/contract).

**Answer:**

(See Attachment #2)

3. What is the current vacancy rate and turnover rate?

**Answer:**

**Vacancy and Attrition as of December 31, 2016**

Note: Only budgeted positions are reported below

**Vacancy Rate**

<b>Vacant Positions</b>	<b>Total Positions</b>	<b>Vacancy Rate</b>
655	12,262	5.3%

Note: Attrition rate based on total separations divided by average employee count

**Attrition Rate**

<b>Fiscal Year</b>	<b>Total Separations</b>	<b>Average Employee Count</b>	<b>Attrition Rate</b>
FY17 to date	1447	12,261	11.8%

<b>Vacant Positions</b>	<b>Total Positions</b>	<b>Vacancy Rate</b>
655	12,262	5.3%

4. What number and percent of your employees are District residents? What number and percent of new hires in FY2017 and FY2018, to date are District residents?

**Answer:**

WMATA Employees – DC Residents as of 12/31/2017

<b>Employee Residents</b>	<b>Count of ID</b>	<b>% of Total</b>
DC Resident	1319	11%
Other Resident	10069	84%
Grand Total	12031	

New Hires – DC Residents as of 12/31/2017

<b>Employee Residents</b>	<b>Count of ID</b>	<b>% of Total</b>
DC Resident	117	17%
Other Resident	588	83%
Grand Total	705	

2017 Strategic Sourcing Partnerships with the District of Columbia

Throughout 2017, Metro’s Human Resources Office of Talent Acquisition continued to cultivate and expand strategic partnerships and outreach efforts focused on the recruitment of DC residents.

Outlined below are a few examples of 2017 initiatives:

- At the Department of Employment Services (DOES), Metro conducted multiple testing sessions for the Metro Bus Operator Trainee program at various American Job Center locations.
- Metro is a participating organization in the DC Infrastructure Academy to create mechanic, bus operator and janitorial/cleaner training curriculum to establish qualified talent pools. Through this partnership Metro has committed to supporting/participating in related job fairs and information sessions for the hands-on training.
- Metro is also partnering with DC Potomac Job Corp to develop a mechanic training curriculum to establish qualified mechanic talent pools.
- Metro premiered *MetroBeyondBarriers*, the recruitment outreach strategy for individuals with disabilities, at the Disability Outreach Commission Collaboration.
- Through an ongoing partnership with the DC Mayor’s Office on Latino Affairs, Metro positions are advertised bi-weekly in English and Spanish. Featured positions include MetroBus Operator trainee, bus mechanics and track inspectors.

Metro additionally hosted or participated in hiring and community outreach events to promote Metro’s value proposition to DC residents. Below are a few examples:

- January - NBC4 Health and Fitness Expo “Hiring our Military Heroes” - DC Convention Center

- March - Military hiring event (Hiring our Heroes) - Verizon Center
  - April - Multicultural job fair (Hispanic Outreach) - Catholic Charities
  - April – Hiring event - Greater Washington Hispanic Chamber of Commerce Workforce Development
  - July - Hiring expo - encourage D.C. veterans and spouses to apply and test for the Transit Police positions - Washington DC Armory
  - August - Hiring expo - encourage D.C. veterans and spouses to apply and test for the Metro Bus Operator positions - Washington DC Armory
  - September - Military networking reception and hiring expo hosted by the Washington Nationals Major League Baseball Team
  - September – Hiring fair - Washington, DC 100,000 Opportunities, Washington Convention Center
  - November – Career fair - Mid City/DOES highlighting the retail, security, armed services, construction, property management, transportation, hospitality, health/medical, IT, and restaurant industries
5. What efforts has WMATA taken in FY2017 and FY2018, to date to reduce overtime and “right-size” the budget?

**Answer:**

In March 2017, Metro revised its Absenteeism Policy to focus on “planned” and “unplanned” absences as a way to reduce employee absenteeism, as well as overtime required to back-fill absent staff. These efforts have already reduced the average number of sick days and is expected to result in more savings on pension and healthcare cost.

## **Budget, Audit, Contracting and Procurement**

6. Please provide your annual financial audit for FY2018.

**Answer:**

The following is a link to the FY2017 financial statements:

<https://www.wmata.com/about/records/public-records.cfm>.

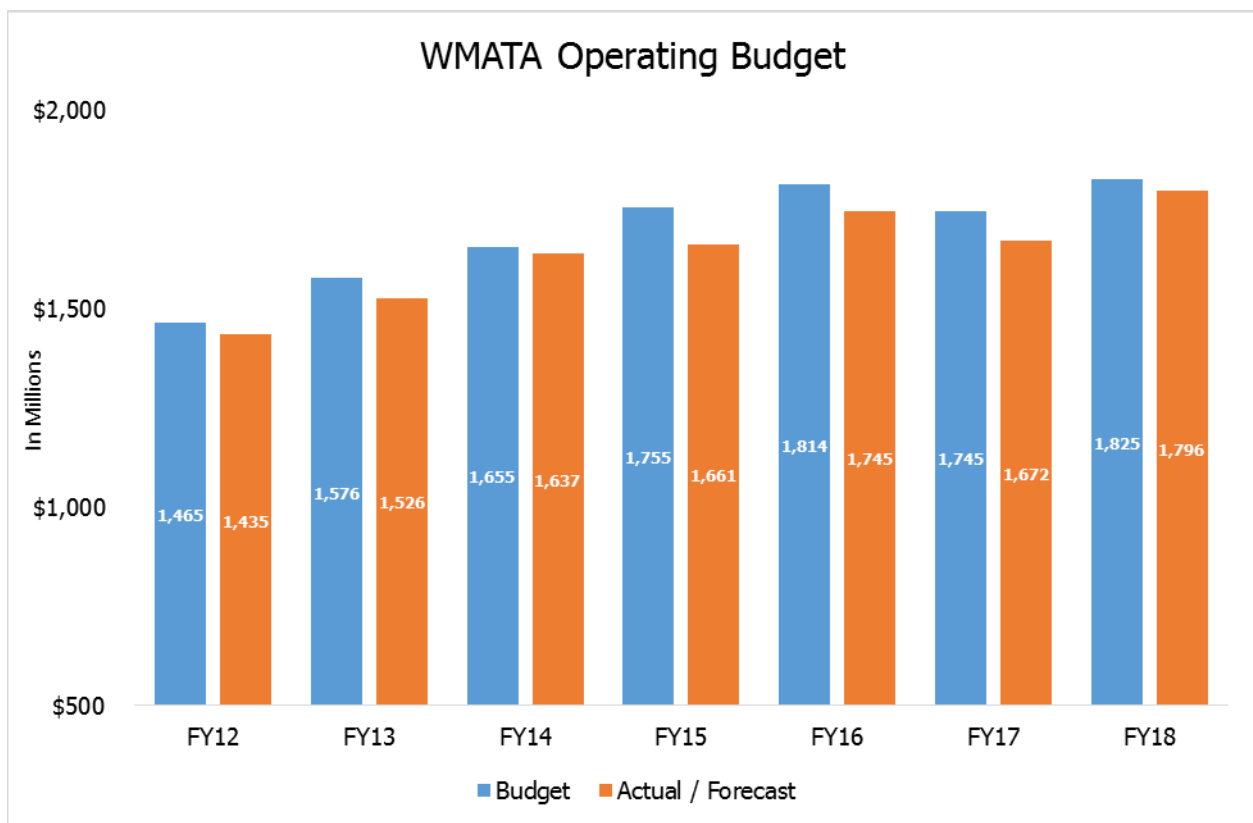

The FY2018 financial statement audit will not be completed until October 2018.

Upon completion, it will also be posted online.

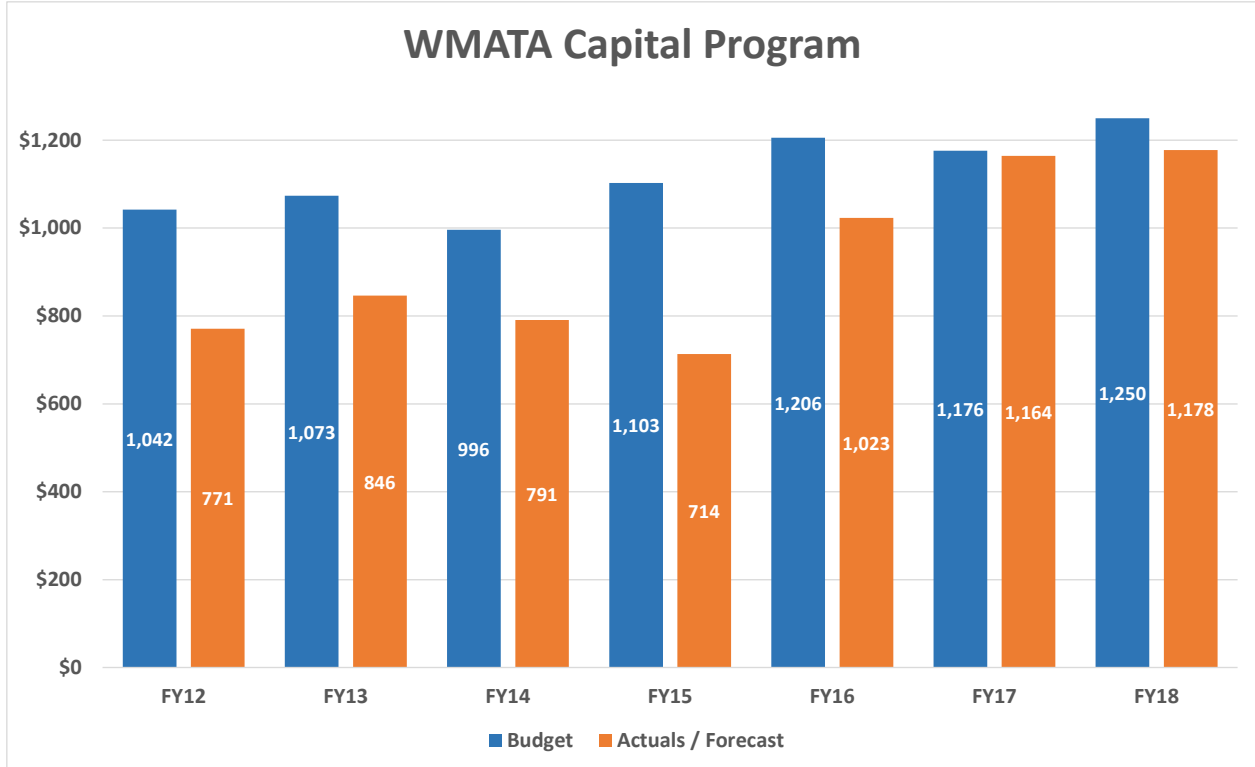

7. Please provide a chart showing WMATA's approved operating and capital budgets and actual expenditures for each fiscal year between FY2012 and FY2018.

**Answer:**

Operating Budget

Capital Budget

8. Please describe any significant variance between fiscal year appropriations and actual expenditures for FY2017 and FY2018 to date.

**Answer:**

**Operating Budget FY2017**

	FY2017	Variance		
	Actual	Budget	\$	Percent
<b>Revenue</b>	783.8	900.0	(116.3)	-12.90%
<b>Expense</b>	1,644.4	1,745.3	(101.0)	5.80%
<b>Subsidy</b>	860.6	845.3	(15.3)	-1.80%
<b>Cost Recovery</b>	47.70%	51.60%		

Metro’s FY2017 operating budget was formulated and approved prior to SafeTrack. Service disruptions resulting from the SafeTrack program significantly impacted ridership and passenger revenue. The expense savings from those actions paid for all but \$15.3 million of the revenue impact, a variance of less than two percent. Specifically, operating revenues were \$783.8 million, or \$116.3 million below budget but operating expenses were \$1.64 billion, or \$101.0 million below budget.

Operating revenue unfavorability to budget is primarily attributable to service interruptions from the SafeTrack program, but ridership continues to face other challenges stemming from service reliability, growth in alternative transportation options, low gasoline prices, and telecommuting.

The \$101.0 million favorability in operating expenses was primarily driven by management actions to reduce costs, including changes to reduce healthcare costs, the elimination of 700 positions, a hiring freeze, and a freeze on non-urgent purchases. Other savings were achieved through favorable fuel prices and decreased propulsion energy utilization because of SafeTrack service outages.

**Operating Budget FY2018**

	FY2018 Q2		Variance FY2018	
	Actual	Budget	\$	Percent
<b>Revenue</b>	410.0	419.6	(9.7)	-2.00%
<b>Expense</b>	876.0	906.7	30.7	3.00%
<b>Subsidy</b>	466.0	487.1	21.0	4.00%
<b>Cost Recovery</b>	47.00%	46.00%		

Operating revenues through the second quarter of FY2018 were \$410 million, or \$10 million below budget, while operating expenses totaled \$876 million or \$31 million below budget. The net operating position was \$21 million favorable through the second quarter.

Operating revenue unfavorability to budget is primarily attributable to a continuing decline in bus ridership and revenue versus prior year. While bus revenue was two percent lower than last year, it was 13 percent below budget through the second quarter. Ridership continues to face challenges stemming from fare increases, perceived service quality, growth in alternative transportation options, low gasoline prices, and telecommuting.

The favorability in operating expenses is primarily driven by savings in salaries and wages due to vacancies, which were \$24 million below budget, and by lower spending on services contracts, which were \$22 million below budget.

**Capital Program FY2017**

Metro’s capital investments continue to focus on improving system safety and reliability. Initially, the Board approved the FY2017 capital budget for \$950 million to repair, rehabilitate, and replace Metro's capital assets, including vehicles, stations, track and structures, power, yards and garages, business support, and other program areas. In November 2016, the FY2017 capital budget was amended and increased by \$150 million. The increased funding supported intensified efforts to address deferred maintenance – primarily through the SafeTrack initiative – as well as an increased delivery and acceptance rate for new 7000 series railcars and

the retirement of the 1000 and 4000 series railcars. An additional budget increase of \$75 million was approved in April 2017, bringing the final approved budget to \$1.175 billion.

At the close of FY2017, Metro delivered \$1.164 billion of its capital investment which represented 122 percent of the original budget of \$950 million and 99 percent of the amended budget of \$1.175 billion.

### **Capital Program FY2018**

Metro invested \$505 million in its capital program through the first two quarters of FY2018. Full year capital investment is forecasted between \$1.1 and \$1.2 billion, compared to the budget of \$1.250 million.

<b>Investment Category (\$ in millions)</b>	<b>FY18 Actual thru Q2</b>	<b>FY18 Budget thru Q2</b>	<b>FY18 Forecast</b>	<b>FY18 Budget</b>	<b>Over/(Under) Current Budget</b>
<b>Railcar</b>	\$222.3	\$260.1	\$478.7	\$508.6	(\$29.9)
<b>Rail Systems</b>	42.4	49.9	141.4	122.8	18.6
<b>Track &amp; Structures</b>	57.5	58.5	126.7	126.6	0.1
<b>Stations &amp; Passenger Facilities</b>	75.9	78.9	151.0	183.2	(32.2)
<b>Bus &amp; Paratransit</b>	77.1	94.6	188.9	206.9	(18.0)
<b>Business Support</b>	29.6	36.2	91.3	101.9	(10.6)
<b>TOTAL</b>	<b>\$504.8</b>	<b>\$578.2</b>	<b>\$1,178.0</b>	<b>\$1,250.0</b>	<b>(\$72.0)</b>

The railcars forecast reflects a delay in procurement of spare parts. Rail System improvements, including the radio and wireless infrastructure project, are ahead of the baseline budget forecast. The Stations & Passengers Facilities forecast includes a reduction for work completed in prior year originally planned to be completed in FY18. The Bus & Paratransit forecast anticipates a delay in the delivery of buses due to changes in emissions regulations. And finally, the Business Support forecast includes updates to several projects' schedules such as the storage tank replacement project change in procurement vehicle.

9. Please list, in Excel spreadsheet format, each contract, procurement, lease, and grant ("contract") awarded, entered into, extended and option years exercised, by WMATA during FY2017 and FY2018, to date. For each contract, please provide the following information, where applicable:

- The name of the contracting party;
- The nature of the contract, including the end product or service;
- The dollar amount of the contract, including budgeted amount and actually spent;
- The term of the contract;
- Whether the contract was competitively bid or not;
- The name of WMATA's contract monitor and the results of any monitoring activity; and

- Funding source.

**Answer:**

(See Attachment #9)

## **Agency Programs and Policies**

10. Please describe any initiatives WMATA implemented within FY2017 or FY2018 to date, to improve the internal operation of WMATA, reduce waste, fraud and abuse, or the interaction of WMATA with outside parties. Please describe the results, or expected results, of each initiative.

### **Answer:**

The following is a list of initiatives WMATA implemented in FY2017 and FY2018 to improve operations, mitigate waste, fraud and abuse:

- Eliminated 700 positions, excluding service reductions - \$42M
- Reduced unproductive bus service and realigned rail service frequency to current ridership demand, which included the elimination of an additional 100 positions - \$10M
- Changed management health care, decreasing WMATA's costs - \$3M
- Increased fares - \$20M
- Implemented controls on absenteeism and workers' compensation - \$6M
- Launched the Abilities-Ride program as an alternative to high cost MetroAccess service - \$4M – partial year savings in FY2018, full year savings in FY2019
- Increased fare enforcement through the Fair Share initiative
- Instituted additional controls on overtime expense - \$5M – savings expected to begin with FY2019
- Commenced parking revenue initiatives - \$6M – revenue expected to begin with FY2019
- Expanded advertising opportunities - \$2M – revenue expected to begin with FY2019

11. What has WMATA done in the past year to make the activities of WMATA more transparent to the public? Additionally, please identify ways in which the activities of WMATA and information retained by WMATA could be made more transparent.

### **Answer:**

The Office of Quality Assurance, Internal Compliance & Oversight (QICO) is an internal management function reporting to the General Manager, committed to driving improvement in Metro's processes and services through deliberate and transparent action. In 2017, QICO performed Metro's first-ever internal review of Service Delivery, Engineering & Maintenance, and Capital Program Management functions. In total, QICO completed 21 reviews, which resulted in the development of 69 internal Corrective and Preventive Actions (iCAPAs). These actions are proactive, preventive steps to improve the way we work before issues arise.

For transparency, these reports, findings, and improvement plans are available to the public through Metro's Transparency & Internal Accountability Initiative page at

[wmata.com](http://wmata.com). Posting this information demonstrates to the public that we are able to fairly assess ourselves, identifying what is good in addition to areas where we can improve and establishes a level of accountability for remediating the issue(s).

Furthermore, QICO provides detailed tracking information for progress of Corrective Action Plans (CAPs) developed in response to requirements and recommendations from the Federal Transit Administration (FTA) and the National Transportation Safety Board (NTSB). This tracking, which is also available online demonstrates to both regulators and the public WMATA's commitment to taking action and maintaining transparency in our business processes.

Continuing efforts to communicate progress to the public will promote greater transparency in the future. To this point, QICO is continuously updating WMATA's progress towards completion of corrective actions resulting from both CAPs and iCAPAs. To review, please visit Metro's Transparency & Internal Accountability Initiative page at [www.wmata.com/transparency](http://www.wmata.com/transparency).

12. Please provide an executive summary of the quarterly performance report, *Vital Signs*.

**Answer:**

Below is the link to the Metro performance report:

<https://www.wmata.com/about/board/meetings/board-pdfs/upload/3A-FY2018-Q2-Performance-Report-TO-POST.pdf>

**Key Highlights of the Metro Performance Report – Q2/FY18 Report**

The Metro Performance report compares performance fiscal year-to-date to targets that Metro aims to achieve, or where applicable, to previous fiscal year-to-date performance. As of Q2/FY18:

- Thirteen measures were at or above target, or better than last fiscal year
- Five measures were near target
- Nine measures were not met, or worse than last fiscal year

**Background and History**

In 2013, the Board of Directors adopted Metro's mission, vision and four strategic goals for building a transit system that supports a competitive region:

- Build and maintain a premier safety culture and system
- Meet or exceed expectations by consistently delivering quality service
- Improve regional mobility and connect communities
- Ensure financial stability and invest in our people and assets

Previously presented separately to the Safety Committee (Safety Report) and the Customer Service, Operations and Security Committee (Vital Signs Report), this comprehensive quarterly Metro Performance report provides Board members and customers with data and information to track progress toward these strategic goals, and supports Metro's efforts to be transparent and accountable to its customers.

Within Metro, this data is used on an ongoing basis to inform decision-making. The Department of Safety and Environmental Management (SAFE) utilizes multiple datasets to monitor safety activities that impact employees and the riding public. SAFE conducts a daily review of incidents, systematic inspections of facilities and regulatory programs and employee/contractor training to ensure a safer workplace and environment for our passengers. Within Operations, these measures are actively tracked by staff through a series of "Stat" performance review meetings that encourage data-driven analysis and decision-making. Departments develop fiscal year business plans with these and other measures and key actions that demonstrate departmental contribution to Metro's mission. These activities all contribute toward Metro's performance-based planning and programming approach.

Quarterly reporting of safety measures is required by the Board of Directors system safety policy statement as part of the approved System Safety Program Plan (SSPP). The SSPP is required under FTA Final Rule Code of Federal Regulations 49, part 659, Rail Fixed Guideway Systems: State Safety Oversight.

## **QUALITY SERVICE AND SECURITY FOCUS**

### ***Service reliability improving and crime best in a decade***

#### **MyTripTime**

Rail customer on-time performance (OTP) improved to 87 percent during the first half of FY18, thanks in large part to the implementation of a realistic schedule and the addition of new 7000 trains. Railcar delays remain the most frequent type of delay but are down almost 20 percent thanks to changes in the fleet composition and improved maintenance procedures. While Metro's rail infrastructure renewal program lowers on-time performance by about two to three percentage points in the short-run as service is reduced at nights and on weekends, overall rail infrastructure reliability is showing signs of improvement. The number of speed restrictions resulting from track inspections is down 40 percent, as are delays related to track defects. Bringing—and keeping—the system into a State of Good Repair, however, requires constant maintenance and renewal. To reflect Metro's commitment to providing quality service, Metro's rush-hour promise refunds registered SmarTrip® customer trips that are more than 15 minutes late.

#### **Rail Fleet Reliability**

Railcar performance is the best reported in eight years, reaching over 87,000 miles between delays—equivalent to about two weeks of travel. For customers, this has resulted in 47 percent fewer offloads. Better performance was primarily driven by the

addition of new 7000 series railcars to the fleet. As of the end of December 2017, the 7000 series trains represented over 40 percent of the available fleet and traveled over 121,000 miles between delays. Metro's second largest fleet, the 2000/3000 series also saw performance improvements of nine percent compared to fiscal year to date 2017. The 5000-series cars are currently the poorest performers and are slated for retirement in calendar year 2018.

## **Rail Infrastructure**

In mid-August, Metro put in place a 35 mile per hour speed restriction covering almost 23 miles of track through the downtown core of the system to reduce trains' traction power draw while Metro analyzes power optimization used to propel trains. Because most trains do not travel above 35 miles per hour on these segments, these restrictions had a minimal impact on customer on-time performance. Metro is wrapping up the study of the power draw and expects to lift the speed restriction in the downtown core next quarter (in FY18-Q3). In addition, for about two months each Fall Metro places safety-related speed restrictions at upwards of ten outdoor approaches to stations where falling leaves can lead to slippery rails. These restrictions add a few seconds to each trip, but do not significantly delay customers.

Infrastructure Availability – On average this fiscal year, about 95 percent of track has been available during revenue hours. The speed restrictions related to power consumption and fall leaves reduced availability by 3.1 percent. Unplanned single-tracking and other condition-related speed restrictions further reduced availability by 0.2 percent. Planned maintenance work during evenings and weekends, including extended shutdowns on the Red and Green lines to replace interlockings and crossovers, reduced availability by 1.7 percent. By 10 p.m. almost every weeknight, up to three Metro crews have begun working on the track to address tunnel leaks, renew rail infrastructure, and conduct preventive maintenance to ensure safe and reliable operations for customers. Metro's aggressive rail infrastructure renewal, inspection and preventive maintenance program aims to reduce unplanned single-tracking events and speed restrictions.

FTA Reportable Speed Restrictions – On average this fiscal year, about eight percent of track was under speed restriction during the FTA-mandated period of 9 a.m. the first Wednesday of each month. The majority of this was related to speed restrictions aimed at reducing power consumption in the system core. Not counting these speed restrictions, the measure falls to 1.7 percent of track under speed restriction, below Metro's target of 2.2 percent.

## **Bus On-Time Performance (OTP)**

FYTD through December, 78 percent of buses were on-time, a three percent improvement from the same period last year. OTP improved across all days of the week and during all service periods with three percent more on-time buses during the weekday and two percent more on-time buses during the weekend. Overall improvement was primarily driven by a decrease in buses running late during peak period service – AM Peak (6 a.m. to 9 a.m.) and PM Peak (3 p.m. to 7 p.m.) – with

these rush service periods improving the most. Improvements in OTP have been driven by schedule adjustments of low-performing routes, with the schedule adjustments implemented in June improving performance one percent compared to this same time last year.

### **Bus Fleet Reliability**

FYTD through December, buses on average traveled 7,504 miles between service interruptions, a seven percent decline from the same period last year with buses traveling six percent fewer miles and experiencing one percent more service interruptions. While all fleet technology types declined compared to the same period last year, fleet reliability of the fleets that provide the most service – Hybrid and CNG – declined at a slower rate compared to the performance of the older Clean Diesel and Diesel fleets. Overall bus fleet reliability performance was impacted by increased use of older, less reliable buses due to the 105 model year 2014 8000-series Hybrid buses being removed from service on September 28 along with increased service interruptions due to coolant sensor failures on the newest CNG fleet.

### **MetroAccess On-Time Performance (OTP)**

MetroAccess OTP improved to 92 percent FYTD compared to 87 percent through the same period last year. This improvement is particularly significant given that 92 percent OTP is the contractually-enforced service level agreement for OTP between WMATA and its paratransit service providers. FYTD performance is currently buoyed by strong performance this quarter – 93 percent OTP was delivered in October and November, and 94 percent in December. Improved performance is largely attributed to an operator staffing level increase to allay a previous operator shortage, and these new operators adjusting to their roles. Last year, operator staffing levels hemorrhaged due to increased marketplace competitiveness. However, WMATA provided an adjustment to its paratransit contractors to enable them to be more competitive in the market, thus rectifying the issue.

### **Elevator/Escalator Availability**

FYTD elevator availability is at 97 percent, equaling performance through the same period last year as well as FYTD 2016. Preventive Maintenance Compliance (PM Compliance) is a key driver of escalator availability; it should be noted that 100 percent PM compliance was achieved for elevators system-wide in October 2017. The Office of Elevators and Escalators (ELES) is currently undergoing a process wherein PM procedures are being tailored to address each unique asset model.

FYTD escalator availability is at 94 percent, an uptick from 93 percent escalator availability compared to the same period last year. At least 94 percent escalator availability has been achieved for each month in this fiscal year. Similar to elevator availability, PM Compliance is a key driver of escalator availability. For Q2/FY2018, an average of 97 percent PM Monthly Compliance was achieved. Metro's aggressive and expansive plan to replace a significant number of escalators across

the system remains on track. ELES has completed 12 escalator replacements for the first half of FY18 with 16 units remaining to be complete. Total units completed under this project to date are 84.

## **Crime**

The FYTD Part I crime rate decreased 19 percent compared to the same period last year. Crimes against property, accounting for 71 percent of Part I crimes, decreased 20 percent, and crimes against persons, accounting for 29 percent of Part I crimes, decreased 15 percent. The combined crime rate of 4.4 crimes per million passenger trips represents the lowest rate in recent years.

## **SAFETY FOCUS**

### ***Rail improving, bus an area of focus***

#### ***Red Signal Overruns***

Train and Equipment Operators had 70 percent fewer red signal overruns than during the first six months of FY17, with three reported incidents between July and December. When comparing calendar years, 2017 had the lowest monthly average of red signal overruns since 2012, with 0.7 violations per month. Two of the three FYTD18 violations occurred during a turnback move in single-tracking areas. Turnback operations are special moves that can involve “double-ending” a train with a second operator in the trailing car and require additional levels of communication and coordination between the two operators and the Rail Operations Control Center (ROCC). SAFE is developing corrective actions to reduce the probability of these events.

#### **Fire Incidents**

In the first half of the fiscal year, fire incidents increased by nine percent, from 47 in FYTD17 to 51 incidents through December 2017. Of the FYTD18 fire incidents, forty-one percent were related to arcing insulators, which included a monthly high of nine in July, and a low of zero in November and December. Debris-related fires decreased by eight percent over the same time period. There were two incidents related to arcing track components (i.e., not insulators) in FYTD18 that occurred at the Shady Grove Rail Yard, and were due to a stray current issue that has since been resolved.

#### **Rail Collisions**

Operational rail collisions decreased by 50 percent compared to 2017 FYTD. Of the four collisions in FYTD18, three occurred in rail yards and included contact with a bump post, striking a rail car while moving in the rail car shop, and striking a maintenance facility’s shop door. The one mainline collision involved improperly stored material on a Roadway Maintenance Machine (RMM) striking a component of the tunnel infrastructure.

## **Derailments**

Through December 2017, there have been six derailments reported. This represents a 45 percent reduction from the same period of FYTD17. All six incidents involved RMMs, including three that were hi-rail contractor pickup trucks. There were no derailments in October and November 2017. Four of the six derailments occurred in rail yards at low speeds.

## **Bus Collisions**

Despite incurring 76 fewer collisions, the bus collision rate increased by less than one percent compared to the first six months of FYTD17. This is primarily due to a six percent decrease in mileage, which resulted in a four percent increase in the preventable collision rate. Over half of the collisions were classified as sideswipes, hit while stopped, and fixed or moving object collisions.

## **Bus Pedestrian Strikes**

Compared to FYTD17, two fewer pedestrians were struck and transported from the scene during FYTD18 through December. Of the seven incidents in FYTD18, two involved bicyclists and three occurred while the bus was attempting to make a turn. There was no correlation between routes or bus divisions, as all seven incidents occurred on different routes. Four of the seven incidents occurred at an intersection.

## **Rail Customer Injuries**

One-hundred nine rail passengers were injured during the first six months of FY18. This resulted in a Customer Injury Rate (CIR) of 1.25 injuries per million passenger trips, which is a nearly eight percent decrease compared to FYTD17. The injuries were primarily driven by slips/trips/falls on escalators and station platforms. Primary causal factors that were identified included customer inattention and intoxication.

The most common locations of customer injuries were Gallery Place (13) and Metro Center (five); followed by Potomac Avenue, DuPont Circle, Southern Avenue, and Union Station (four each).

## **Bus Customer Injuries**

On Metrobus, 162 customers have been injured in FYTD18, a 29 percent increase from FYTD17. One-hundred customers were injured as a result of collisions, an increase of six compared to FYTD17. Seventy-nine of the 100 collision-related injuries were the result of non-preventable collisions. An additional 44 customers were injured as a result of slips/trips/falls. These injuries occurred primarily during hard braking or while the bus was in motion (e.g., turning, leaving a stop, stopping in traffic).

## **MetroAccess Customer Injuries**

MetroAccess continued to demonstrate a decrease in customer injuries through the second quarter of FY18, resulting in a customer injury rate of 1.97 injuries per hundred thousand passenger trips. Twenty-three MetroAccess customers experienced an injury through December, compared to 34 in the same period of FY17. The reduction in customer injuries correlates with an overall reduction in preventable and non-preventable collisions. Customer slips, trips and falls were also reduced over this period.

## **Overall Employee Injury**

Through the second quarter of FY18, 384 WMATA employees experienced an OSHA-recordable injury, which are those injuries that result in lost time, medical treatment beyond first aid, or other significant injuries. The Employee Injury Rate (EIR) of nearly seven injuries per hundred full-time employees, which is above the target of 5.1. Through the same time period of FY17, 335 employees were injured (approximately six injuries per hundred employees). For FYTD, the most common injuries were related to vehicle collisions (93 injuries), ergonomics (65 injuries), slips/trips/falls and stress/assault (64 injuries each). Ergonomic injuries involve lifting, pushing/pulling as well as repetitive motions, such as operating a bus or train.

## **Rail Employee Injuries**

The Rail EIR decreased by two percent when compared to the first six months of FY17, primarily due to decreases in injuries by the Railcar Maintenance, Traction Power Maintenance, Automatic Train Control Maintenance, and Plant Maintenance groups. While these groups performed better than last year, several other departments experienced increases in employee injuries. These include Rail Station and Train Operations (+5), Elevator and Escalator (+1), Systems Maintenance (+2), Supply Chain (+2), and Information Technology (+2). The most common injury types were slips/trips/falls, followed by ergonomic-related injuries struck by/against injuries.

## **Bus Employee Injuries**

Through the first two quarters of FY18, the BUS EIR is nearly 40 percent higher than the same period as FY17. Bus Transportation's EIR increase is primarily driven by increases in preventable collision-, ergonomic- and stress/assault-related injuries, while Bus Maintenance experienced an increase in struck by/against injuries. Fifty-two percent of Bus injuries were non-preventable.

## **FISCAL RESPONSIBILITY FOCUS**

***Balancing budget through expense management, as ridership and fare revenues lower than projected***

## ***Ridership***

Total FYTD ridership of 145.2 million is three percent below the budget forecast of 149.5 million. Rail ridership has stabilized at levels similar to last year while bus ridership has continued to decline.

- Rail ridership was 87 million, 2.1 percent below forecast. Weekday ridership averaged 604,000, a 1.8 percent increase over last year while daily weekend ridership averaged 202,000, a 0.1 percent decrease from last year.
- Bus ridership was 57 million, 4.1 percent below forecast. Weekday ridership averaged 385,000, a 7.6 percent decrease compared to last year while daily weekend ridership averaged 166,000, an 8.1 percent decrease from last year.
- MetroAccess ridership was 1.2 million, 3.5 percent below forecast, averaging 8,000 trips per weekday.

## **Operating Budget Management**

Below budget expenses exceeded revenue shortfalls, resulting in projected balanced budget:

- Expenses under budget by \$31 million, primarily due to vacant positions and lower spending on services
- Revenue below budget by \$10 million, primarily due to ridership below forecast
- Subsidy – the budget had a favorable \$21 million year-to-date; the year-end forecast projects a balanced budget

## **Capital Funds Invested**

Forty percent of capital funds invested FYTD; forecasted pace of investment to increase in Q3 and Q4

## **Metrorail**

13. Please provide an update on the *Safetrack* rail maintenance plan.

### **Answer:**

SafeTrack was the most aggressive track renewal program in Metro's history, a comprehensive maintenance effort that accelerated three years' worth of work into one year. The SafeTrack program significantly expanded maintenance time on weekends, weeknights and midday hours and included 15 "Safety Surges" – long-duration track outages for major projects in key parts of the system.

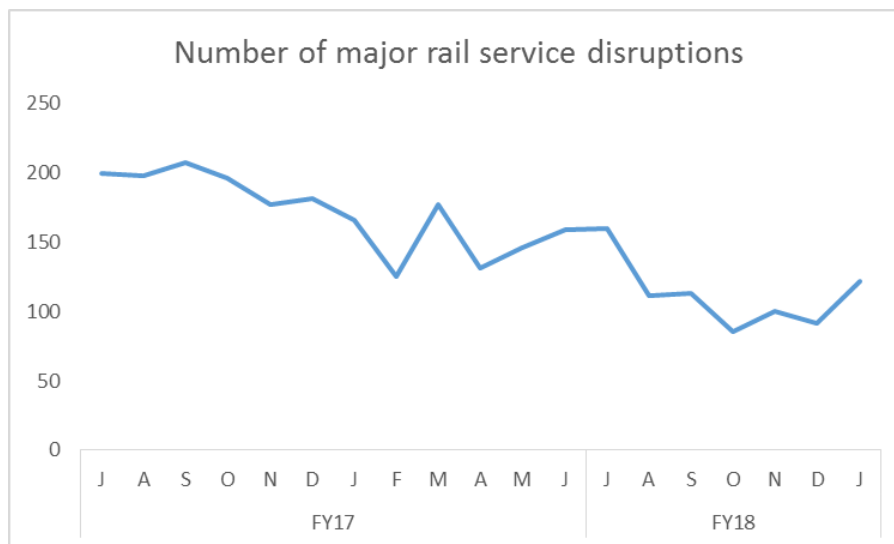

Overall, the SafeTrack program was very successful in terms of the safety performance, the work completed and the schedule achieved. The success of SafeTrack was achieved through tremendous hard work and cooperation across the region – from our employees, our riders and our stakeholders. The sustained cooperation and long duration outages enabled the work crews to significantly improve productivity, in both schedule and cost. In particular, the team focused energy on improving the way we work to achieve better quality and higher productivity than ever before achieved. WMATA executed 3.7x the normal amount of track work at a cost of ~2.4x of the typical annual budget, resulting in ~50 percent improvement in cost efficiency. Work was also completed safely, with a cumulative Employee Injury Rate (EIR) of 2.4, less than half of the WMATA overall EIR for the same time period.

The most important lesson of all from SafeTrack is how vital it is to maintain a proactive capital renewal and maintenance program. In order to sustain the gains made, we are making changes to our procedures and our organization, and most importantly to how we plan and manage work to keep the system safe and reliable. Using many of these procedures and new processes, WMATA will increase efficiency within the newly expanded maintenance windows, decrease the impact to customers due to infrastructure defects and strategically plan maintenance and capital programs to maximize efficient allocation of track access.

14. How many incidents occurred in FY2017 and FY2018 to date that required unscheduled track work, single tracking, or other major service disruptions on Metrorail? How does this number compare to previous years?

### **Answer:**

In FY 2017, customers received notification of about 2,062 major service disruptions on Metrorail. In FY 2018 to date (July 2017 – January 2018), customers have been notified of about 782 disruptions.

Source: MetroAlerts issued to notify customers of delays, with notifications related to scheduled maintenance and rebuilding efforts removed. Generally, an alert is sent anytime there is single-tracking, suspension of service, or other major delays on a line. Occasionally multiple alerts are issued for the single disruption because it may impact multiple lines.

15. Please provide monthly ridership by line for FY2017 and FY2018 to date and any causes WMATA attributes for the trends in this data.

**Answer:**

Note: Rail ridership by line is not possible to determine due to the highly interlined nature of the system. Riders often have a choice as to which line they can take (e.g. orange, blue or silver from Eastern market to Rosslyn) and riders may also transfer across lines. Instead, we report total ridership.

	FY17	FY18	% Change
JUL	15,098,254	15,195,047	0.6%
AUG	14,988,724	15,291,378	2.0%
SEP	14,829,231	14,446,237	-2.6%
OCT	15,013,972	15,760,054	5.0%
NOV	13,283,576	13,957,496	5.1%
DEC	12,860,998	12,382,372	-3.7%
JAN	14,634,341		
FEB	13,162,326		
MAR	15,764,574		
APR	15,431,113		
MAY	15,544,236		
JUN	16,360,671		

Rail ridership in the first half of FY18 has stabilized relative to FY17, up about one percent overall. Peak (rush hour) ridership has returned to near pre-SafeTrack levels, while off-peak continues to fall.

FY17 ridership was heavily impacted by SafeTrack maintenance efforts. In FY18, rail fare increases of 10-25 cents per trip, reduced frequency during rush periods (trains depart end-of-line stations every eight minutes, compared to every six in FY17), and shorter operating hours (to allow adequate maintenance time) have limited ridership growth. Further pressure on ridership comes from:

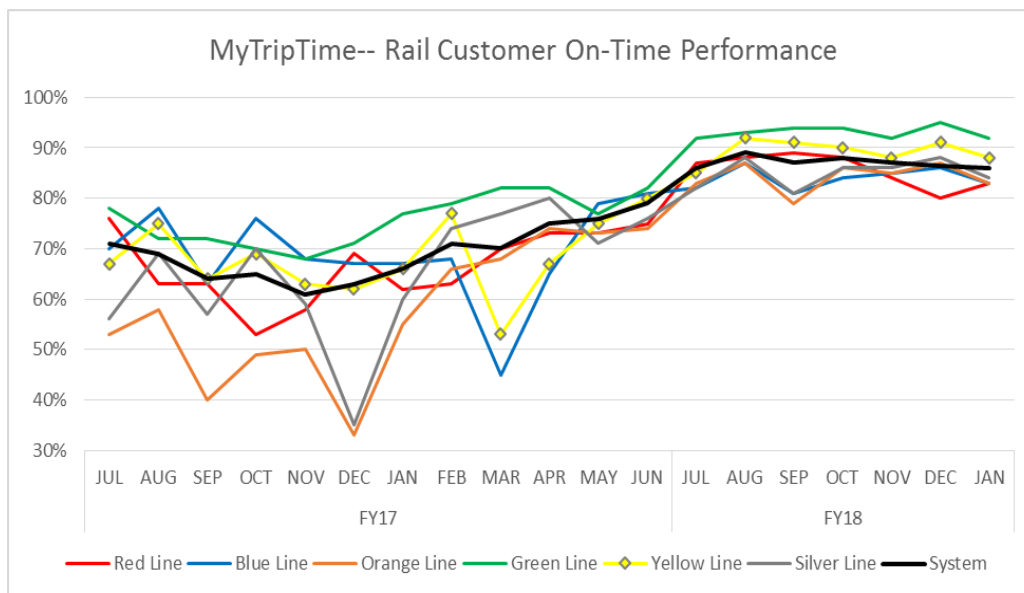

- Telework and alternate work schedules: the average customer's monthly frequency has fallen from 20 to 18 trips in recent years. Four-day-a-week commuters now outnumber five-day-a-week commuters
- Competition from Uber/Lyft/etc., particularly affects off-peak trips
- Trackwork, including early-outs on weeknights, weekend single-tracking and shutdowns, and the extended Red Line shutdown in November/December

Positive drivers of ridership in FY18 are improved service quality (on-time performance rose from 66 percent during the first half of FY17 to 87 percent during the first half of FY18) and transit-oriented development at some stations. For example, booming real estate development at Navy Yard, particularly housing, has increased AM Peak entries by over 40 percent in the past two years. Similarly, new real estate development around Federal Center SW and Waterfront has driven up PM Peak Ridership at that station.

16. Please provide monthly Rail On-time Performance data by line for FY2017 and FY2018 to date and any causes WMATA attributes for the trends in this data.

**Answer:**

		<b>Red Line</b>	<b>Blue Line</b>	<b>Orange Line</b>	<b>Green Line</b>	<b>Yellow Line</b>	<b>Silver Line</b>	<b>System</b>
FY17	JUL	76%	70%	53%	78%	67%	56%	71%

	NOV	84%	85%	85%	92%	88%	86%	87%
	DEC	80%	86%	87%	95%	91%	88%	87%
	JAN	83%	83%	83%	92%	88%	84%	86%

Rail customer OTP improved to 87 percent during the first half of FY18, thanks in large part to the implementation of a realistic schedule and improved railcar reliability. Railcar delays remain the most frequent type of delay but are down almost 20 percent thanks to changes in the fleet composition and improved maintenance procedures. Railcar performance is the best reported in eight years, reaching over 87,000 miles between delays—equivalent to about two weeks of travel. For customers, this has resulted in 47 percent fewer offloads. Better performance was primarily driven by the addition of new 7000 series railcars to the fleet. As of the end of December 2017, the 7000 series trains represented over 40 percent of the available fleet and traveled over 121,000 miles between delays. Metro's second largest fleet, the 2000/3000 series also saw performance improvements of nine percent compared to fiscal year to date 2017. The 5000 series cars are currently the poorest performers, and are slated for retirement in calendar year 2018.

Planned maintenance work during evenings and weekends, including extended shutdowns on the Green line (August), the Red line (November/December), and Orange/Blue/Silver (weekends in September) to replace interlockings and crossovers, reduced on-time performance by two to three percentage points. By 10 p.m. almost every weeknight, up to three Metro crews have begun working on the track to address tunnel leaks, renew rail infrastructure, and conduct preventive maintenance to ensure safe and reliable operations for customers. While Metro's rail infrastructure renewal program lowers on-time performance in the short-run as service is reduced at nights and on weekends, overall rail infrastructure reliability is showing signs of improvement. The number of speed restrictions resulting from track inspections is down 40 percent, as are delays related to track defects. Bringing—and keeping—the system into a State of Good Repair, however, requires constant maintenance and renewal.

17. Please provide an update on the Rush Hour Promise program.
  - a. How many riders were issued credits since the program's implementation?

- b. How many credits, in dollars, have been issued to riders since the program's implementation?
- c. How many trains arrived 15 or more minutes late since the program's implementation?
- d. How many trains arrived on time since the program's implementation?

**Answer:**

As of February 9, 2018, Rush Hour Promise credits were paid for 8,977 trips, totaling \$33,789.45. The credit is issued to customers depending upon their overall trip time as measured by SmarTrip tap in/out, not by train delays.

18. Please provide an update on the Kids Ride Free program.

**Answer:**

Some successes in the 2017-2018 school year include:

- Improved student participation, 32,000 students picked up the Kids Ride Free transit benefit compared to 25,000 last year, a 28 percent increase that resulted in weekday ridership growth on Metrorail.
- The student tap rate increased from 34 percent share in 2016 to 60 percent in 2017, as a result of increased communications, student outreach and the Fair Fare initiative.

Despite improvements in the 2017-2018 school year, challenges of the Kids Ride Free program include complex administration/fulfillment, student compliance, and geographic restrictions that result in negative balances with students "flashing" their cards or not using them at all. The lack of tapping also creates a situation in which the true number of students using the program is unknown, as is the ridership count.

One key challenge is the use of DC One Cards for transit services. In order to better meet DC student travel needs, WMATA proposes to provide pre-loaded SmarTrip® cards valid for the academic school year for students participating in DC's Kids Ride Free Program. Similar to the U-Pass, students would benefit from SmarTrip® cards that are activated for immediate use. This eliminates "double tapping," reduces the need to flash, and promotes a uniform ridership culture on Metrobus and Metrorail. The new program will maintain the current one dollar a day pricing based on the number of participating students and better serve DC's student travelers by making the availability of SmarTrip® passes timely. The proposed changes could reduce DC's annual program cost, reduce fare evasion and improve ridership counts by promoting uniform system access principles for Metrobus and Metrorail; thereby supporting WMATA's Fair Fare initiative. Staff presented a proposal to DC for consideration and subsequent meetings are planned. The goal is to introduce the new SmarTrip card and transition students prior to the 2018-2019 school year.

19. Please provide information about rail car availability, including:

- a. How many rail cars are currently in service?
- b. How many are out of service and why?
- c. How many railcars are needed to meet WMATA's expected service level?

**Answer:**

WMATA requires 866 railcars to meet weekday peak service requirements. On February 12, 2018, WMATA had 980 railcars in service (+114) and 154 out of service. Cars were out of service for the following reasons:

- Inspection: 22 cars
- Repair: 120 cars
- Parts: 10 cars
- Engineering: 2 cars

## **Metrobus**

20. Please provide a list of bus service improvements made in the District for FY2017 and FY2018 to date, including specific actions taken to support bus Priority Corridor Networks.

### **Answer:**

In collaboration with DDOT, Metro advanced a number of projects including:

Projects continuing implementation and enhancement of the Priority Corridor Network such as:

- Implementation of Rhode Island Avenue Limited Line MetroExtra G9
- Implementation of 14<sup>th</sup> Street NW Limited Line MetroExtra 59
- Extension of Metrobus 14<sup>th</sup> Street Line route 52 to serve the new District Wharf development
- Addition of new trips on Metrobus Alabama Avenue Line W4
- Restructuring and expansion of local services on 16<sup>th</sup> Street NW to include extended service hours on MetroExtra S9
- Service management and operations initiatives on Georgia Avenue 70 and Metro Extra 79 service;
  - Extensive partnering with DC Public Schools and Charter Schools to provide 30,000 student passenger trips per weekday and coordinating modifications to school schedules that impact Metrobus service
  - Completion of the Transit Signal Priority TIGER project benefiting ten corridors with 195 intersections and 144 buses serving the District
  - Continued services throughout the District of Columbia providing, in FY2017, a total of 67,691,101 passenger trips on 69 lines of service, averaging 225,409 on Weekdays, 115,113 on Saturdays and 86,587 riders on Sundays.

### **Metrobus Service Improvement June 2016 – December 2017**

#### **Priority Corridor Network Improvements:**

- Routes 30N, 30S (Friendship Heights-Southeast) – New overnight trips added. (June 2017)
- Routes 52, 54 (14th Street NW) – New overnight trips added. (June 2017) Service restructured to serve the District Wharf and compliment new limited-stop service. (December 2017)
- Route 59 (14th Street Limited) - New MetroExtra limited-stop route initiated during peak periods. (December 2017)
- Route 70 (Georgia Avenue MetroExtra) – Timetable adjustments to improve on-time performance (June 2016) New overnight trips added. (June 2017)

- Route 80 (North Capitol Street) – Timetable adjustments to improve on-time performance. (December 2016). New weekend late-night trips added. (June 2017)
- Routes 83, 86 (Rhode Island Ave.-College Park) – Timetable adjustments to improve on-time performance. (December 2016)
- Routes 90, 92 (U Street NW-Garfield) – Timetable adjustments to improve on-time performance. (December 2016) New overnight trips added. (June 2017)
- Routes A2, A6, A8 (Anacostia-Congress Heights) – Overnight service restructured to simply route network (June 2016) Additional overnight trips added. (June 2017)
- Route G8 (Rhode Island Avenue-Avondale) – Additional trips added to reduce crowding. (June 2016) New late-night short trips added between downtown and RI Ave. Station. (June 2017)
- Route G9 (Rhode Island Avenue Limited) – New MetroExtra limited-stop route initiated during peak periods. (March 2017)
- Route S1 (16th Street NW-Potomac Park) – Timetable adjustments to improve on-time performance. (June 2017)
- Routes S2, S4 (16th Street NW) – Service restructured to add more limited-stop service and reduce the number of local service trips as recommended in DDOT study. (June 2017)
- Route S9 (16th Street Limited) – Additional peak-period trip plus new midday trips as recommended in DDOT study. (June 2017)
- Route X2 (Benning Road-H Street) – New overnight trips added. (June 2017) Timetable adjustments to improve on-time performance. (December 2017)
- Route X9 (Benning Road-H Street Limited) – Timetable adjustments to improve on-time performance. (June 2016)

#### **Other Improvements:**

- Route 42 (Adams Morgan-Mt. Pleasant) – New overnight trips added. (June 2017)
- Route 60 (Fort Totten-Petworth) – Timetable adjustments to improve on-time performance (June 2016)
- Routes 62, 63 (Takoma-Petworth) – Timetable adjustments to improve on-time performance. (December 2016)
- Route 64 (Fort Totten-Petworth) – New late-night trips added. (June 2017)
- Route 96, 97 (East Capitol Street-Cardozo) – New weekend route 96 late-night trips added. (June 2017) Timetable adjustments to improve on-time performance. (December 2017)
- Route A9 (Martin Luther King, Jr. Avenue Limited) – Timetable adjustments to improve on-time performance. (December 2017)

- Route D4 (Ivy City-Franklin Square) – Route extended during peak periods to mitigate elimination of route D3, plus timetable adjustments to improve on-time performance. (June 2016)
- Route D8 (Hospital Center-Trinidad) – Timetable adjustments to improve on-time performance. (June 2017)
- Route E2 (Ivy City-Fort Totten) - Timetable adjustments to improve on-time performance. (June 2016)
- Route E4 (Military Road-Crosstown) – Timetable adjustments to improve on-time performance. (June 2016) New late-night trips added. (June 2017)
- Route E6 (Chevy Chase) – Timetable adjustments to improve on-time performance and account for DC Water project detour. (June 2017)
- Route H4 (Columbia Heights-Crosstown) – New weekend late-night trips added. (June 2017)
- Routes L1, L2 (Connecticut Avenue) – Timetable adjustments to improve on-time performance. (December 2016)
- Routes N2, N4, N6 (Massachusetts Avenue NW) – Select N4 trips extended during peak periods to mitigate elimination of route N3. (June 2016) Additional N4 trip to reduce crowding. (December 2016) Timetable adjustments to improve on-time performance. (June 2017)
- Route P6 (Anacostia-Eckington) – Additional overnight trips added to support routes A2, A6 and A8 overnight service simplification. (June 2016) Timetable adjustments to improve on-time performance. (June 2017)
- Route V1 (Benning Heights-M Street SE/SW) – Timetable adjustments to improve on-time performance. (December 2016)
- Route V2 (Capitol Heights-Minnesota Avenue) – Additional trips added to reduce crowding. (June 2016)
- Route W4 (Deanwood-Alabama Avenue) – Timetable adjustments to improve on-time performance. New late night trips added. (June 2017) Additional trips added to reduce crowding. (December 2017)

#### **Service Consolidations or Reductions:**

- Route 94 (Stanton Road) – Late-night reductions due to low ridership. (December 2016)
- Route D1 (Glover Park-Franklin Square) – Route shortened in downtown to improve efficiency. (June 2016)
- Route D2 (Glover Park-Dupont Circle) – Late-night reductions due to low ridership (December 2016)
- Route D3 (Ivy City-Dupont Circle) – Route eliminated due to low productivity and duplication with other routes. (June 2016)
- Route E2 (Ivy City-Fort Totten) – Late-night reductions due to low ridership. (December 2016)

- Route H6 (Brookland-Fort Lincoln) – Late-night reductions due to low ridership. (December 2016)
- Route N3 (Massachusetts Avenue NW) – Route eliminated due to low productivity and duplication with other routes (June 2016)
- Route U7 (Deanwood-Minnesota Avenue) – Late-night reductions due to low ridership. (December 2016)
- Route X3 (Benning Road-Ellington Bridge) – Route shortened in Woodley Park / Tenleytown to improve efficiency. (June 2016)

21. Please describe the agreement between WMATA and the District Department of Transportation to administer the DC Circulator. What actions has WMATA taken to improve its administration of the DC Circulator?

**Answer:**

The agreement between WMATA and DDOT to administer the DC Circulator contract is a document that describes the assets involved in the operation of the DC Circulator (buses and revenue collection equipment), sets the term of the agreement, and describes the roles and responsibilities of DDOT and WMATA. DDOT owns and solely funds the DC Circulator service. WMATA administers the contract, provides some direct services like revenue collection, and acts as a technical advisor to DDOT.

The agreement calls for WMATA to require the contractor to maintain and inspect buses in accordance with industry standards and keep complete maintenance records on the buses; demonstrate performance on standards established in the contract; and insure and indemnify WMATA, the District of Columbia and other parties. Additionally, it describes the WMATA staff positions who will administer the contract, and defines the expected time commitment from each. There are four staff positions dedicated full-time to contract administration and six others that are described as fractions of full-time equivalent positions. The four full-time staff are the project manager, the project analyst, and two service monitors. The six other staff positions are each generally performed by multiple people in support departments as a part of their regularly assigned duties and include revenue collection and accounting, customer service, maintenance audit, counsel, procurement, and engineering.

The agreement lists various reports that WMATA is to supply to DDOT, provides a framework for DDOT to communicate its planning for future DC Circulator service to WMATA, and describes how WMATA will bill DDOT for the costs associated with the Circulator, including both direct costs and the costs of the contract. Additionally, the MOU provides a means for terminating the agreement: either party may terminate the agreement with 180 days' written notice.

On June 15, 2017 WMATA General Manager Paul Wiedefeld sent a letter to then DDOT Director Leif Dormsjo providing notice of termination of the agreement effective July 1, 2018. Following the notice of termination, WMATA staff have met

biweekly with DDOT staff to facilitate a smooth transition of administration of the DC Circulator from WMATA to DDOT. WMATA staff have committed to work closely with DDOT staff to ensure that all details are addressed as DDOT prepares to award and administer a contract for the future operations of the DC Circulator.

Through a separate Circulator support agreement executed on June 22, 2017, WMATA has provided technical support to DDOT in the purchase of 40 new buses, 26 of which entered service in late summer 2017 and 14 of which are expected to enter service this spring. WMATA assisted by recommending certain vehicle specifications and performing final acceptance of buses.

Since October 2015, a WMATA bus maintenance staff person has been on site at the DC Circulator every day to review and report on maintenance operations. Also, as of January 2017 WMATA's Safety department has begun a periodic spot check of a random selection of DC Circulator buses. WMATA staff have met with senior management from First Transit, the contractor, to demand an improvement plan and continue to meet to push for further improvement. WMATA staff have exercised the financial disincentive provisions for poor performance in the contract where applicable.

WMATA staff have continued to work closely with DDOT staff to ensure they are well-informed about the DC Circulator contract, sharing contractor performance and findings to develop strategies to improve performance of the DC Circulator. Beginning in August 2016, WMATA and DDOT jointly established a twice-weekly meeting with the contractor to continue to cooperatively develop strategies to improve DC Circulator service. The frequency of this call was reduced to once per week in September 2017, following improvement in the contractor's maintenance performance.

## **MetroAccess**

22. Please describe WMATA's efforts to make rail and bus services more accessible and user-friendly for the disabled community in FY2017 and FY2018 to date. Please provide ridership and cost numbers for MetroAccess service in FY2017 and FY2018 to date. Has WMATA been able to document greater usage of the fixed route system by such riders as a result?

### **Answer:**

Over the past year WMATA has taken several steps to make rail and bus services more accessible and user-friendly:

- (1) Increased focus on platform edge-to-train gaps, identifying optimal boarding areas at several stations including the Rhode Island Avenue station. WMATA has supplemented the identification of these optimal boarding areas with station signage and announcements, and live announcements by train operators as they approach the stations;
- (2) Scheduled the installation of a chain-link between car barriers on all cars of the 7000-series consists, begin in March to improve the safety of all customers, but especially those with visual disabilities;

Continued to provide free travel training for people with disabilities. WMATA also provided "train the trainer" sessions, to help increase the number of individuals and organizations capable of providing travel training throughout the region.

- (3) Completion of phase one of the installation of beacons (ibeacons) at several stations including Gallery Place and Metro Center. The beacons will help customers with visual disabilities navigate their trip from start to finish.
- (4) Issued Smartrip-enabled MetroAccess ID cards to customers certified as Conditionally Eligible; those customers whose disabilities only prevent fixed route use on some trips. While these customers were already able to use rail and bus for free, as an incentive to use fixed route services over MetroAccess, having SmarTrip cards enable these customers to travel with the same level of independence when entering and exiting rail stations and bus vehicles that all other customers enjoy.

WMATA is able to document that for FY18 to date (July 17-Jan 18) MetroAccess customers and their personal care attendants have taken 2.7 million trips on WMATA's fixed route services. In addition, people with disabilities have taken more than 13 million trips on WMATA's fixed route services utilizing the Reduced Fare Program.

MetroAccess FY17 Ridership: 2.368 Million  
MetroAccess FY17 Cost: \$124.5 Million (actual)  
MetroAccess FY18 Ridership: 2.4 Million (budgeted)  
MetroAccess FY18 Cost: \$120.5 Million (budgeted)

23. What steps has WMATA taken to improve oversight of MetroAccess contractors?

**Answer:**

WMATA implemented a number of initiatives to improve oversight of MetroAccess contractors, including:

- Staff Augmentation
  - Hired a Fleet Maintenance Officer and two Field Operations Managers.
  - Improved financial support and analysis with the addition of a Financial Officer role within the Office of MetroAccess Services.
  
- Safety/Safety Oversight
  - Increased monitoring of vehicle operator behavior via DriveCam system and when needed provided additional operator training to ensure safe operations.
  - Increased use of GIS monitoring of contractors to identify excessive operator dwelling. This monitoring enhanced passenger safety by identifying excessive dwell time with passengers aboard.
  - Improved Road Supervisor performance via enhanced GIS technology that provided consistent system-wide response monitoring which improved the positioning of Road Supervisor personnel and targeted dispatch efforts.
  
- Training/Training Oversight
  - In collaboration with the Metro Transit Police Department's (MTPD), provided Inappropriate Workplace Conduct Training to over 1,300 MetroAccess operators. This training focused on the risk of inappropriate workplace behaviors and interaction/communication between vehicle operators and passengers.
  - Provided standardized and enhanced training materials to service delivery contractors. The materials focused on strategies to reduce passenger assistance injuries.
  - Monitored the contractors' MetroAccess operator training to ensure compliance with approved policies and procedures and reviewed contractor training materials
  
- Increased Presence at Contractor Facilities
  - Collaborated with Operations Control Center and Service Delivery contractors to develop a streamlined morning pull-out procedure to improve on-time performance and process efficiency.
  - MetroAccess leadership/management conducts daily on-site monitoring at contractor garages to observe adherence to daily pull-out procedures such as pre-trip safety inspections, issuing of safety messages by contractor management and overall safe yard operations.

- Other
  - Established a pilot process to review specific locations where the delivery of door-to-door service cannot be easily determined.
  - Strengthen internal controls by enhancing and increasing monthly data audits before the data archive process and final publication of operating performance metrics.
  - Improved the transparency of customer complaint resolution by integrating complaint investigation reviews into weekly operations meetings with contractor management and staff.
  
- Maintenance
  - Increased the monitoring of DriveCam downloads to a daily review of previous day DriveCam events such as an immediate slamming on of brakes or a vehicle impact with a fixed object. The daily review practice allows staff to immediately address inappropriate driver behavior and provide the necessary coaching/training.
  - Daily monitoring of Road Calls (service interruptions caused by a vehicle service failure) improved the quality of responses provided by vendors regarding maintenance decisions and findings on vehicles that were removed from service. This information provides trend analysis regarding the mean distance between failures (MDBF).
  - Improved partnership with all Service Providers to find solutions to commonly identified service problems like rivets and wheelchair strip erosion.
  - Weekly and monthly monitoring of MDBF by provider. Increased monitoring of maintenance performance when Service Delivery Providers achieve high percentages of vehicle service failures.
  - Reviewing each Service Delivery Provider's fluid logs, fuel logs, and cleaning logs to ensure procedure adherence and reduce unnecessary vehicle service failures.
  
- Upcoming Maintenance (30 to 45 days)
  - Review contracted Vehicle Maintenance Quarterly Audits that provide annual evaluations of all MetroAccess vehicles and ensure adherence to all vehicle maintenance requirements including the certification of contracted maintenance technical staff.
  - Develop a clear criteria for Pass/Fail with the MetroAccess Contracted Quality Assurance team.
  - Audit at least 10 percent of the Service Delivery Provider Inspections Records monthly.
  - Partner with Ford and Braun (vehicle manufacturer and designers) to establish clear recall review and communication process

## **Planning and Real Estate**

24. Please provide the pipeline of joint development projects being actively pursued on WMATA land, including:

- The location and size of property;
- The development team;
- The deal structure (including sale v. lease, compensation amount, and intended scope of uses);
- The WMATA staff responsible for managing each project; and
- The expected completion date for execution of the development agreement and construction (identifying multiple phases if any).

### **Answer:**

WMATA has five active joint development projects under negotiation or with approved agreements within the District of Columbia:

#### **(1) Brookland Metro Station**

Location/Size: 1.6 acres on two parcels, one parcel on either side of Bunker Hill Road NE at 10<sup>th</sup> Street NE  
Developer: Mid-Atlantic Realty Partners/CAS-Riegler  
Deal Structure: 98-year ground lease with easements for WMATA facilities  
Proposed Uses: 280 residential units, 9,000 SF retail, 445 private parking spaces, 38 Kiss & Ride spaces  
WMATA Staff: Rosalyn Doggett, Senior Real Estate Advisor  
Agreement Date: Expected to be finalized, Spring 2018  
Construction Date: No later than 3.5 years from Agreement Date

#### **(2) Congress Heights Parcel**

Location/Size: 0.94 acres around Congress Heights Metro Station south entrance on Alabama Ave. SE  
Purchaser: CityPartners  
Deal Structure: Sale for \$3 million  
Proposed Uses: Developer is assembling land that includes Metro's property and desires to build mix of office, residential and retail uses  
WMATA Staff: Steve Teitelbaum, Senior Real Estate Advisor  
Agreement Date: Purchase and Sale Agreement executed in January 2013  
Construction Date: Agreement does not require an outside construction start date

#### **(3) Fort Totten Metro Station**

The negotiations period automatically expired April 2016 because a Joint Development Agreement was not reached by the expiration date.

**(4) Navy Yard Chiller**

Location/Size: 41 L Street SE (14,100 square feet)  
Developer: Mid-Atlantic Realty Partners/CAS-Riegler  
Deal Structure: Sale with easements for WMATA facilities  
Proposed Uses: 126 residential units, 6,000 SF retail, 500 SF WMATA office  
WMATA Staff: Rosalyn Doggett, Senior Real Estate Advisor  
Agreement Date: Purchase and Sale Agreement executed in October 2016  
Construction Date: No later than two years from Agreement Date, with one year extension

**(5) Takoma Metro Station**

Location/Size: 2.9 acres at the Takoma Metro station's Kiss & Ride off Eastern Ave. NW  
Developer: EYA  
Deal Structure: Sale with easements for WMATA facilities  
Proposed Uses: 200 residential units, 114 Kiss & Ride spaces  
WMATA Staff: Rosalyn Doggett, Senior Real Estate Advisor  
Agreement Date: Joint Development Agreement executed January 2017  
Construction Date: No later than 3.3 years from Agreement Date

## **Information and Technology**

25. Please describe what actions WMATA undertook during FY2017 and FY2018 to date to utilize its website and social media to help fulfill its mission.

### **Answer:**

Over the last year, WMATA continued to use its corporate website as a major vehicle for releasing corporate information. Averaging 1.3 million unique visits a month, wmata.com serves up news, service, initiatives and more. Last year was the first full year of the website redesign and new user experience, bringing the top used features - trip planning, next bus and next train arrivals to the forefront and giving customers faster access overall to the information Metro provides on its website.

Social media is another strong avenue for corporate communications. Nearing 400,000 followers across four accounts, Twitter serves as our real time communications platform for service changes. The Social Care team in Customer Service engages and responds to Twitter and Facebook messenger inquiries weekdays, 7 a.m. to 7 p.m., and often has a response time within 30 minutes. Our corporate twitter feed also provides news stories and events around Metro.

26. What technology and information systems improvements did WMATA undertake in FY2016 and FY2017 to date to improve operations? What was the cost of these improvements? What are the expected benefits?

### **Answer:**

As part of the General Manager's Back2Good plan, the Chief Operating Officer was tasked with developing and implementing a dashboard for the COO organization in support of improving operating performance and efficiency.

The COO Dashboard is a tool that consolidates and displays the status of the Quarterly Performance Report key performance indicators (KPIs) along with additional departmental performance metrics for the COO organization.

The COO Dashboard serves as a tool to be leveraged by the Executive Management Team (EMT), Department and Office leadership, and Superintendents to monitor the KPIs along with additional departmental performance metrics helping to:

- Increase efficiency by consolidating multiple data sources to an all-in-one COO performance overview
- Instill data-driven decision making by offering a clear user interface that helps users easily understand and evaluate data
- Streamline production of various daily reports and monthly COO departmental performance meeting materials

Additional improvements are:

- PeopleSoft ELM Project – (Rail Operations ensuring certifications for Train Operators and Interlocking Operators)
- ROCC (Rail Operations Control Center) - ELM ROCC upgrade for compliance/audits, SharePoint
- IT ELM Support to place the Train Operator Certification in ELM
- IT Mobile Device Manager/ IT Security for implementation of Avoka Transact services for Rail Supervisors mobile apps
- Automatic Change Over log for ROCC
- GOTRS (General Orders/Track Rights System) upgrades
- Graphical indications that were added to AIM® (Advanced Information Management – GIS map of train movement).

#### MetroAccess Service Area Tool

MetroAccess is required to operate at all times and in all places that fixed route service operates. MetroAccess is now able to utilize a tool that automates the process of defining the MetroAccess service area in a manner that significantly reduces staff time, and the tool reduces the chance of errors. Previously (re)defining the MetroAccess service area required manual capture of all changes to all of the region's fixed route services, including Metrobus and locally operated transit service, then manually recalculating the MetroAccess service area.

There are similar applications that work with MetroAccess scheduling and management information system software, and also interface with the region's fixed route services, but none provide the geographic information system output required by Trapeze, which is used by MetroAccess. Therefore, Metro developed this application in-house at a cost of \$25,000.

#### MetroAccess Automatic Vehicle Location

The MetroAccess Automatic Vehicle Location (AVL) tool provides situational information on over 700 MetroAccess vehicles during daily operation. The tool is used by MetroAccess dispatch and management in monitoring service. The tool provides vehicle and driver information, vehicle location, passengers on board, direction, speed, and on-time performance. If the vehicle is out of service, the application will provide dwell time information and next trip information. The tool is also used to monitor vehicle deadheading. Similar applications that work with MetroAccess scheduling and management information system software is not available. Therefore, Metro developed this application in-house at a cost of \$25,000.

## Safety & Security

27. Please provide a report on the overall safety of the Metro system.

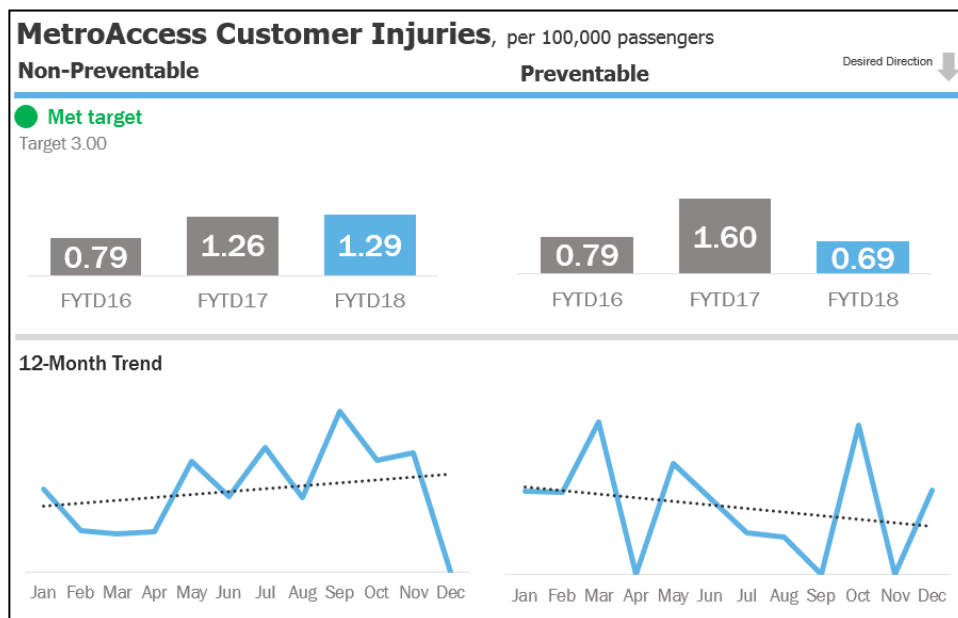

- Please compare safety statistics in FY2016, FY2017, and FY2018 to date.
- What steps did WMATA take in FY2017 and FY2018, to date to improve these statistics? (See response to questions 31 and 34)

### Answer:

The following graphs and summaries provide the comparison of the past three fiscal years of the major safety categories.

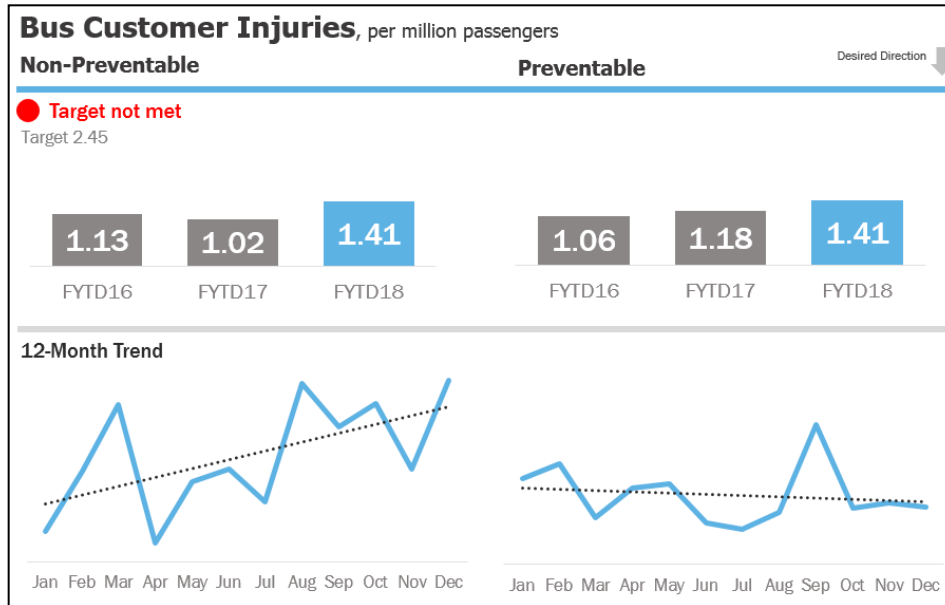

### **MetroAccess – Customer Injury Rate (CIR)**

MetroAccess continued to demonstrate a decrease in customer injuries through the second quarter of FY18, resulting in a customer injury rate (CIR) of 1.97 injuries per hundred thousand passenger trips. Twenty-three MetroAccess customers experienced an injury through December, compared to 34 in the same period of FY2017. The reduction in customer injuries correlates with an overall reduction in preventable and non-preventable collisions. Customer slips, trips and falls were also reduced over this period.

## MetroBus (CIR)

On MetroBus, 162 customers have been injured in FY2018, which results in a Fiscal Year to Date (FYTD) CIR of 2.8, a 29 percent increase from FY2017. One-hundred customers were injured as a result of collisions, an increase of six compared to FY2017. Seventy-nine of the 100 collision-related injuries were the result of non-preventable collisions. An additional 44 customers were injured as a result of slips/trips/falls. These injuries occurred primarily during hard braking or while the bus was in motion (e.g., turning, leaving a stop, stopping in traffic).

## MetroRail (CIR)

One-hundred nine rail passengers were injured during the first two quarters of FY2018. This resulted in a CIR of 1.25 injuries per million passenger trips, which is a nearly eight percent decrease compared to FY2017. The injuries were primarily driven by slips/trips/falls on station platforms and escalators. Primary causal factors that were identified included customer inattention and intoxication. The most common locations of customer injuries were Gallery Place (13) and Metro Center (five); followed by Potomac Avenue, DuPont Circle, Southern Avenue, and Union Station (four each).

## Rail Customer Injuries, per million passengers

Desired Direction ↓

**Non-Preventable**

**Preventable**

● **Met target**

Target 1.75

Non-Preventable			Preventable		
0.00	0.00	0.00	1.07	1.36	1.25
FYTD16	FYTD17	FYTD18	FYTD16	FYTD17	FYTD18

### 12-Month Trend

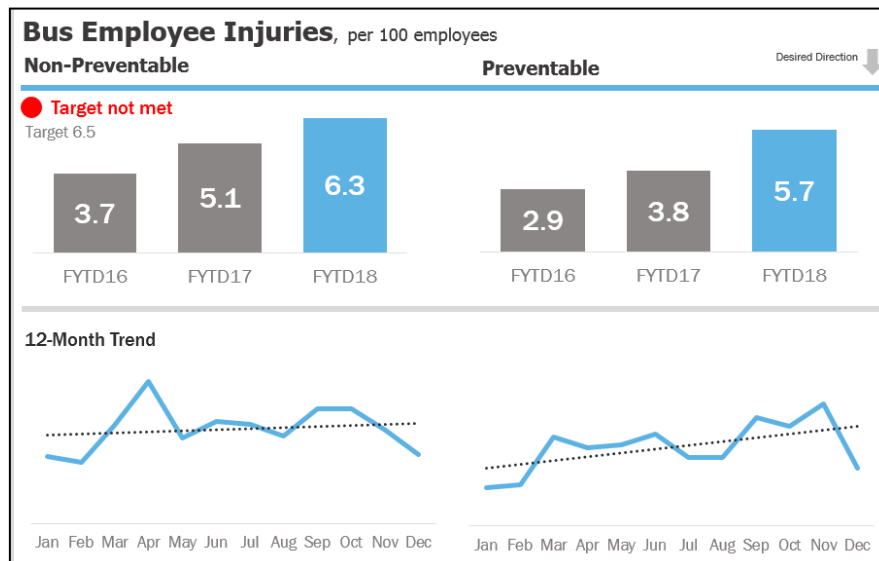

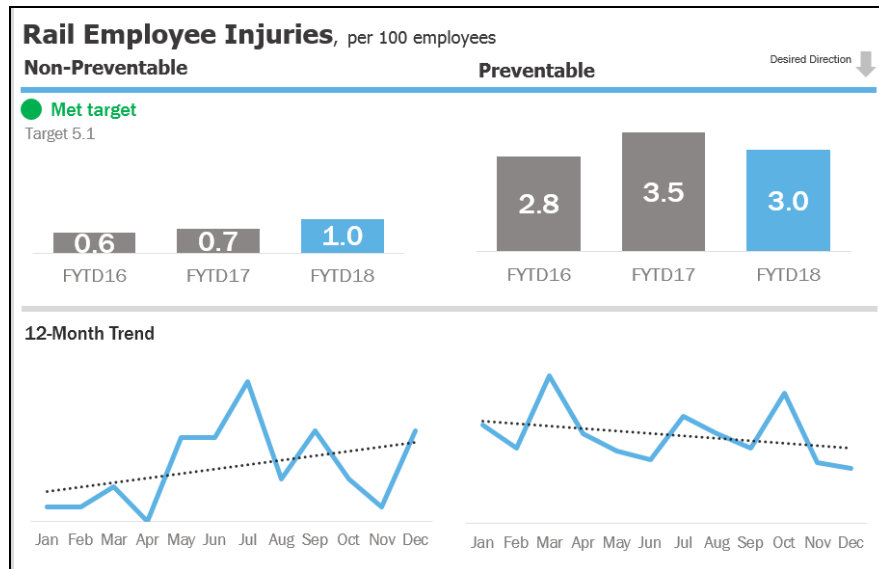

## Employee Injuries – Employee Injury Rate (EIR)

Through the second quarter of FY18, 384 WMATA employees experienced an OSHA-recordable injury, which are those injuries that result in lost time, medical treatment beyond first aid, or other significant injuries. The total Employee Injury Rate (EIR) was nearly seven injuries per hundred full-time employees, which is above the target of 5.1. Through the same time period of FY2017, 335 employees were injured (approximately six injuries per hundred employees).

For FYTD, the most common injuries were related to vehicle collisions (93), ergonomics (65), slips/trips/falls and stress/assault (64 injuries each). Ergonomic injuries involve lifting, pushing/pulling as well as repetitive motions, such as operating a bus or train.

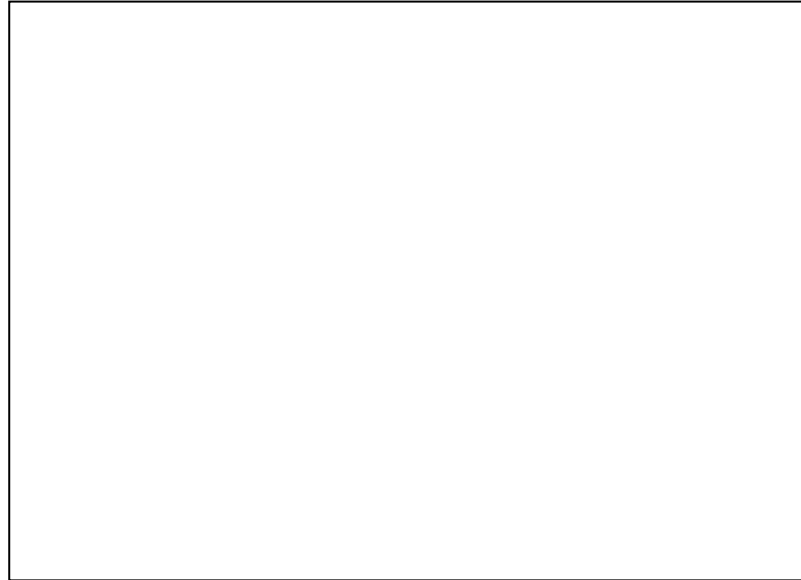

The following graphs provide the breakdown of Bus and Rail employee injuries.

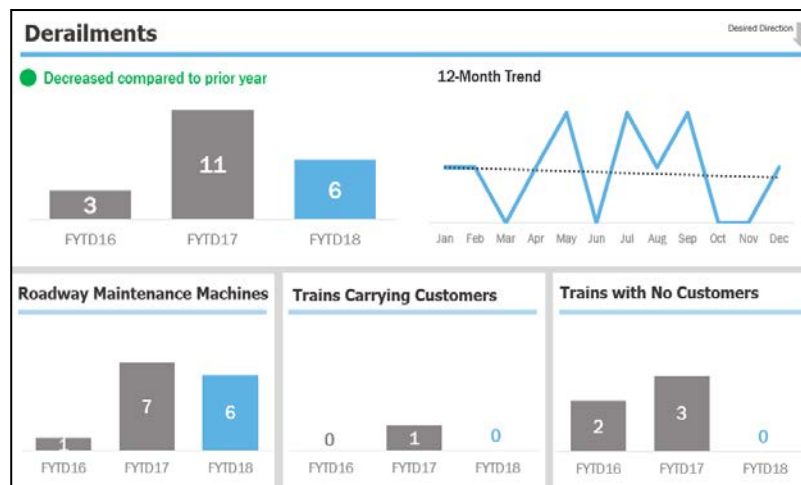

## Fires

Through Q2 of FY2018, fire incidents increased by nine percent, from 47 in FY2017 to 51 incidents through December 2017. Of the FY2018 fire incidents, 41 percent were related to arcing insulators, which included a monthly high of nine in July, and a low of zero in November and December. Debris-related fires decreased by eight percent over the same time period. There were two incidents related to arcing track components (i.e., not insulators) in FY2018 that occurred at the Shady Grove Rail Yard, and were due to a stray current issue that has since been resolved.

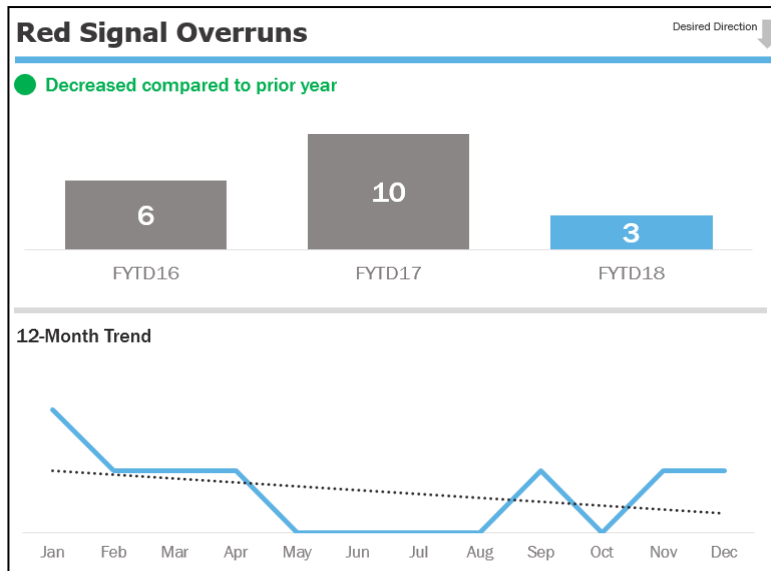

## Derailments

Through December 2017, there have been six derailments reported. This represents a 45 percent reduction from the same period of FY2017. All six incidents involved roadway maintenance machines (RMMs), including three that were hi-rail contractor pickup trucks. There were no derailments in October and November 2017. Four of the six derailments occurred in rail yards at low speeds.

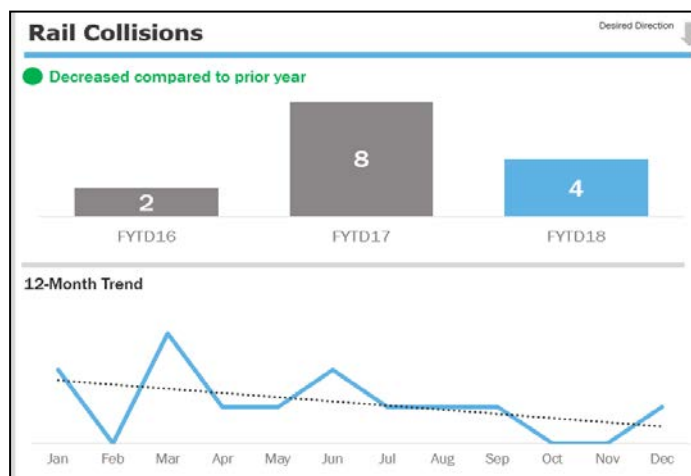

## Red Signal OVERRUNS

Train and equipment operators had 70 percent fewer red signals than during the first six months of FY2017, with three reported incidents between July and December. When comparing calendar years, 2017 had the lowest monthly average of red signal overruns since 2012, with 0.7 violations per month. Two of the three FYTD 18 violations occurred during a turnback move in single-tracking areas. Turnback operations are special moves that can involve “double-ending” a train with a second operator in the trailing car and require additional levels of communication and coordination between the two operators and the Rail Operations Control Center (ROCC).

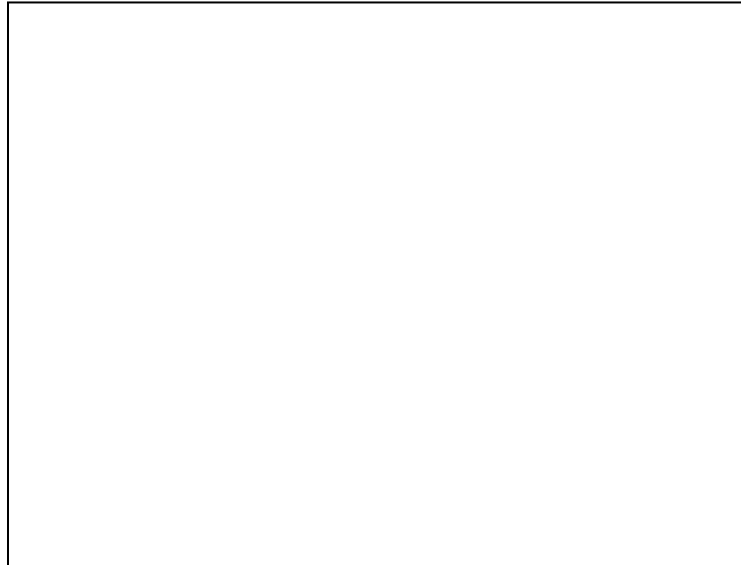

## Rail Collisions

Operational rail collisions decreased by 50 percent compared to Q2 FY2017. Of the four collisions in FY2018, three occurred in rail yards and included contact with a bump post, striking a rail car while moving in the rail car shop, and striking a maintenance facility’s shop door. The one mainline collision involved improperly stored material on a RMMs striking a component of the tunnel infrastructure.

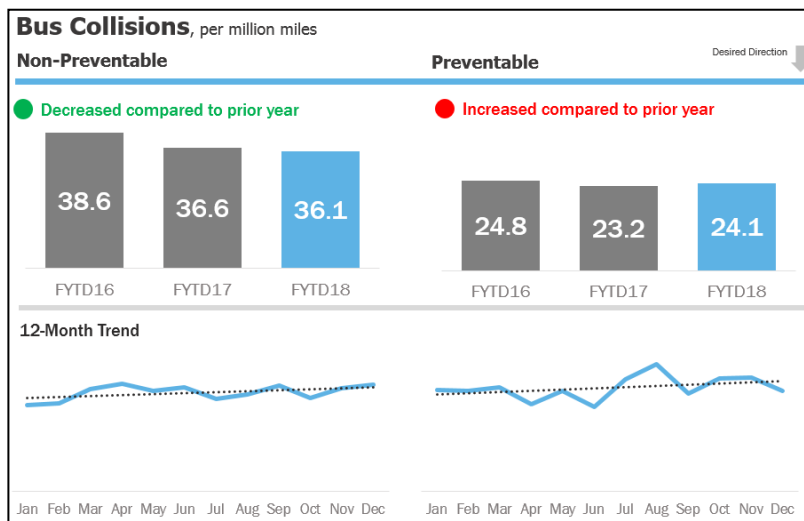

## Bus Pedestrian Strikes

There have been seven pedestrian strikes through Q2 of FY2018, two fewer than were struck and transported from the scene during FY2017. Of the seven incidents in FY2018, two involved bicyclists and three occurred while the bus was attempting to make a turn. There was no correlation between routes or bus divisions, as all seven incidents occurred on different routes. Four of the seven incidents occurred at an intersection.

## Bus Collision Rate

Despite incurring 76 fewer collisions, the bus collision rate increased by less than one percent compared to the first six months of FY2017. The primary factor in the increased collision rate, was a four percent increase in the preventable collision rate. Over half of the collisions were classified as sideswipes, hit while stopped, and fixed or moving object collisions.

28. Please provide the last five years of crime statistics. How has crime trends in 2017 compared to the previous four years?

**Answer:**

(See Attachment #28 Crime Overview)

29. What is the current staffing level for Metro Transit police?

**Answer:**

Authorized: 462 sworn; 144 Special Police Officers; 88 civilians

30. What is the Fiscal Year 2018 budget for Metro Transit police?

**Answer:**

Operating:       \$64,645,330  
Capital:         \$ 1,000,000

31. What has WMATA done in FY2017 and FY2018 to date to minimize customer and employee injuries and accidents?

**Answer:**

**Customer Injuries**

Bus services continues to install deceleration lights on the rear of buses and strobe lights on the lead end of the bus to make the bus more visible to pedestrians and oncoming traffic, which would reduce collision related injuries for both employees and customers. In addition, management continues to maintain a visible presence in the field; making verbal contact with operators on lines where incidents are increasing or more prevalent.

MetroAccess continues to see benefits from engaging with an occupational therapist in developing/modifying existing work instructions. In addition, MetroAccess took feedback from its customers and made modifications to the existing fleet vehicles (e.g., increased space in the passenger compartment, moved grab bars/stanchions) in an ongoing effort to continue the downward trend.

Rail operations continues to work on enhancing visibility on the rail platforms. In addition, flashing edge light replacement is underway and optimal boarding location signage is being installed at select stations to assist disabled customers in boarding the train, as well as cameras being installed at train operators' position at two stations to enhance platform observations.

## **Employee Injuries**

WMATA continues to perform Job Hazard Analyses with the operational groups in order to identify hazards, confirm good work practices, and conformance to existing work instructions.

Bus services conducted an APTA Peer Review to gather best practices and evaluate its existing methods to reduce bus operator assaults, in addition to partnering with the Metro Transit Police Department on conflict resolution and scenario-driven training for bus operators, as well as instituting fare announcements, humanizing campaigns, and the use of shields to reduce employee assaults.

32. How many video cameras are currently deployed throughout the system to monitor safety? How many cameras were installed or replaced in FY2017 and FY2018 to date? Are there plans to deploy more and/or upgrade this technology?

### **Answer:**

This is a security issue that we would be more than happy to discuss at a secured facility.

33. What steps has WMATA taken in FY2017 and FY2018, to date to improve customer communications during service disruptions and safety and security emergencies?

### **Answer:**

Over the past few years, Metro has taken several actions to improve customer communications during service disruptions and safety and security emergencies, including the major radio and cellular infrastructure replacement project underway, improved railcar and station audio announcements, increased social media customer assistance, and much more:

- Metro's radio and cellular infrastructure replacement project, which began in FY2017, will provide a new state-of-the-art Metro Area Radio System for the Authority, a new Public Safety Radio System for the local jurisdictions' first responders, and new cellular infrastructure in the underground tunnel system for wireless providers. These upgrades will improve radio communications for Metro employees and first responders, and result in better coordination and communication for customers during safety and security emergencies.

At the beginning of 2018, 60 percent of the cable management system had been installed throughout Metro's underground tunnels, 39 percent of the cables had been installed, and 15 percent of the system is on air with cellular service. All of this work must be completed in the tunnels when trains are not in service. Wireless voice and data service is now available for customers on the Blue, Orange and Silver lines between Metro Center and Stadium-

Armory, as well as on the Red Line between Glenmont and Silver Spring. As a result, riders now have access to uninterrupted use of wireless text, voice and data services for communication during service disruptions or safety and security emergencies.

- Metro has hired a team of social media customer service representatives responsible for responding directly to customers on Twitter. The social media team is active weekdays from 7 a.m. to 7 p.m., responding immediately to customers and providing updates to Metro's Rail Operations Control Center, Bus Operations Control Center and Media Relations offices, which quickly resolve the issues at hand. Customers can now directly communicate with Metro customer service employees to share information during service disruptions or safety and security emergencies, and vice versa.
- As the oldest and least reliable railcars (1000-, 4000- and 5000-series) are replaced with new 7000-series cars, customers are more likely to be riding on a train that provides clearer, more consistent messages during service disruptions or emergencies. The 7000-series railcars allow train operators to use preprogrammed messages during service disruptions, leading to clearer announcements that are easier to understand compared to speakers on the older railcars. In addition, a review of on-board operator announcements is underway to improve the information train operators provide in the event of a service disruption or emergency.
- Metro has also worked to improve its in-station customer communications. New text-to-speech station announcement software provides increased clarity as well as a consistent audio level and announcement style for customers. In addition, customers are benefitting from improved information on Passenger Information Displays (PIDS) at rail station entrances and on platforms. Based on customer feedback, Metro has addressed a previous limitation where the arrival prediction time on the PID is blank due to a train that is holding for a routine schedule adjustment or more significant service disruption. Customer research told us that riders would prefer the sign to display "DLY." In response, we've updated the signs accordingly along with several improvements. For example, PIDS display improved arrival predictions in single-tracking zones and at stations farther down the line from a single-tracking zone, providing customers with better information in the event that single-tracking is necessary.
- An internal review of emergency shuttle bus stops resulted in updated stop locations in the event of a service disruption. The shuttle bus stops are included on each individual "Station Area Map" at all 91 stations, and employees have been instructed to announce this information when an emergency shuttle bus operation is underway.

34. Please describe any other current or planned initiatives to improve Metro safety for riders and operators.

**Answer:**

To reduce right of way fires, drain cleaning and debris removal activities continue. In addition, all mainline cable connectors (orange boots) have been retrofitted to meet design standards and reduce the chance of water infiltration, which leads to premature failures. All positive third rail cables in the underground sections of the system have been elevated off the ground to reduce arc tracing incidents. All porcelain insulators have been removed from the underground sections as well.

To reduce derailments, the following activities have occurred: a hi-rail (road-rail) vehicle inspection and approval process is being developed, and tie and base of rail scanning is being conducted to provide data for analysis for rail conditions.

Efforts to reduce red signal violations include, but are not limited to, signal head upgrades (LED bulbs, new lenses, and name plates) to increase conspicuity, sign maintenance (cleaning/replacement), yard safety briefings on each shift by interlocking operators, right-side signal configurations, diverging route signal consistency, line familiarization for train and equipment operators, and improved communications for roadway maintenance machines (RMMs).

To reduce rail collisions, Rail Operations is enforcing safe work practice in rail yards and conducting efficiency testing (e.g., speed compliance, yard safety stops, shop/yard moves). Additional efforts include improved communications for RMMs, revitalized line familiarization training for train and equipment operators, and a new training program for RMM flagman, which includes anyone that may perform flagging duties on an RMM.

To reduce pedestrian strikes, Bus Services continues to install front-end strobe/marker lights to increase bus visibility to pedestrians in an effort to reduce pedestrian collisions. Bus management also continues to review DriveCam and other bus data to identify unsafe operations.

To reduce bus collisions, line observations by Bus Operations and SAFE personnel are being conducted to ensure proper bus operation. The deceleration light and strobe installations will also decrease bus collisions as a result of enhanced bus awareness. There is a mirror adjustments/lowering campaign that is aimed to reduce bus collisions against fixed objects (e.g., street signs, tree branches) and eliminate blind spots. Finally, SMS and DriveCam data is being used for trending and analysis, with an emphasis on hot spot identification.
