3. How are our lottery sales and transfer to the General Fund performing as compared to our anticipated projections for FY 2015? How was performance for FY 2014? How does this compare with FY 13 performance? What was the actual revenue loss for FY14 as a result of not having an instant ticket contract in place?

DCLB's FY'15 year to date transfer (as of January 31, 2015) is \$18 million which is on target for its projected \$55 million. The FY'14 transfer totaled \$54.9 million compared to the \$68.3 million transferred in FY'13. The lack of an instant ticket contract was a major contributing factor that led to the \$13.4 million or 19.6% decrease in the transfer to the General Fund.

Total lottery sales for FY'15 through February 17th total nearly \$76.8 million as compared to \$81.1 million through the same period last year. While our numbers games sales are up from last year by nearly \$7 million our instant ticket sales are down by over \$11 million. The return of instant tickets to our game portfolio has already begun to narrow the sales gap between this year and last year.

4. What new games were introduced in FY2014? Are any new games planned for FY15? How are any new games performing? What games were retired, if any, in FY14 and FY15 to date?

In FY'14 the DCLB introduced four new Tap N Play (TNP) games and eight new Fast Play games. We also introduced a new add-on feature for DC3 and DC4 called Lucky Sum. The new games launched in FY'14 are performing well. In FY'15 we are planning approximately six new Tap N Play games and eight new Fast Play games. Both the Tap N Play and Fast Play product lines have seen strong growth trends. In FY'15 the Lottery also participated in the national roll-out of the Monopoly Millionaires Club game, which underperformed sales expectations in all participating states. Ticket sales of this game were suspended in December as the participating lotteries reevaluate the game. On February 15, 2015 the Lottery launched a brand new multi-state draw game called Lucky for Life. The Lottery expects this game to be popular with our players as it features an exciting top prize of \$1,000 a day for life. We are also planning about 20 new instant scratch tickets for the remainder of this fiscal year.

5. What is the status of instant tickets? Please provide a complete chronology to date from the start of the posting of solicitation CFOPD-13-R-003 to the present.

Please see attachment 6

6. How is the lottery store at Union Station performing? What were projected sales goals and revenue for FY 14 compared to actuals? What are the sales goals and revenue for FY15 and actuals to date?

Since its opening in December 2012, the Official DC Lottery Store at Union Station has continued to see year over year increases in sales performance. The comparison between FY'14 projected and actual numbers is no exception. Projected sales for FY'14 were forecast to perform at an increase of 15% over FY'13 sales which were \$1,833,107. Sales surpassed that goal, realizing a sizable 25.6% increase and totaling \$2,302,009. For FY'15, we have ambitiously set the bar for a projected increase of 15% in sales over FY'14. Sales to date for FY'15 total \$923,065, a 7.7% increase over sales at this time last year which were \$856,686. With onsite player incentives, exclusive promotions, and revenue generated from the agency's continuing sales events at Union Station, we expect another banner year at this location. The Official DC Lottery Store at Union Station has come to be known as a 'winning destination,' and is the only exclusively DC Lottery store in our corps of DC Lottery agent retail locations.

The Union Station Lottery Store is a showcase for the DC Lottery easily accessible to visitors from all over the country. It operates as a flagship location, is home to many promotions and one-of-a-kind events and is uniquely situated for growing sales and favorable publicity.

7. How is the "Lucky Lottery Mobile" performing?

The Lucky Lottery Mobile (LLM) is performing well. Mobile sales for the last three years were approximately \$141,000. During the winter months the LLM hibernates, but is now gearing up for spring. The truck is currently undergoing a new look for our loyal players and those new to the lottery. Come the beginning of April, the truck is expected to hit the streets as a new "Awareness Mobile" by making more appearances in the community. Going mobile was a positive thing to do for our brand. It permits DCLB to easily showcase and sell products, educate players about our mission while raising revenue for the vital city services and programs we support. Players in all eight wards get a chance to have a little lottery fun and brighten their day.

The lottery is in the process of securing a CBE for mobile services. The CBE will be responsible for staffing the truck's daily operation.

8. What are any other actions the Lottery has taken or is pursuing to become more competitive with Maryland and Virginia? We've previously discussed the idea of working with WMATA in metro stations. Is there any update on that effort?

The Lottery has spent the last several years trying to maintain a competitive position in a very crowded gaming landscape. Being surrounded by two very large and successful lotteries as well as many other gaming entities (casinos) has made our task very challenging. Opening in July 2016, the MGM casino will be knocking right at our backdoor, but we are optimistic that the return of a full portfolio of scratch tickets will lessen the impact. We also hold the competitive edge (not currently being offered in MD/VA) for the recent launch of the brand new multi-state draw game, Lucky for Life.

WMATA has not been responsive over the years. They have exhibited no interest in partnering with us for the sales of our product. As a result, we have focused on other more productive ways to promote our program and increase sales.

9. How many establishments in Washington, DC sell lottery tickets? Do you feel this is a sufficient amount, and sufficient locations? How does this compare to the past five years? How many outlets are planned or anticipated for FY15 and the next five years?

Currently, in the District of Columbia we have 486 establishments that sell DC Lottery tickets. While this represents an increase since 2010, growth in recent years has slowed. We've added many new locations, but many other existing locations have disappeared due to redevelopment and natural attrition. Nevertheless, the District's growing population provides the lottery with an opportunity to expand its presence in social settings (bars, restaurants, lounges etc.). These settings are prime venues for the sale of our tickets. To that end, we are in the process of acquiring a CBE to begin a major recruitment effort for new lottery locations. We expect to have between 550 and 600 lottery sales locations within the next five years.

10. How is Mega Millions performing? How is Powerball performing? How have these products impacted the transfer to the general fund? Have they impacted the lottery in other ways- please explain?

Sales for the Mega Millions multi-state lottery game saw a dramatic increase in FY'14 compared to FY'13 numbers. FY'14 sales totaled \$7.5 million, compared to only \$4.9 million in FY'13. This increase is attributed to sales spikes that accompany higher jackpots. FY'15 sales for this game are currently lower by 30% compared to the same time last year. This trend is not unique to the District. Lotteries nationally are feeling the impact of lower jackpots on Mega Million sales.

Powerball sales in FY'14 totaled \$9.8 million, a decrease of \$6.4 million or 39.6% from last year's sales of \$16.2 million. Again, this decline is wholly due to smaller jackpots available for players in FY'14. Thus far in FY'15, Powerball sales are tracking slightly ahead of last year due to the recent high jackpot—\$564 million—the third highest jackpot in the history of the Powerball game.

15. Please provide a copy of any updates to DC Lottery rules and regulations, and provide a brief description of the nature of the update.

Please see attachment 9

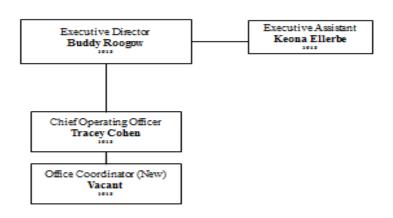

16. What has the agency done in the past year to make the activities of the agency more transparent to the public? In addition, please identify ways in which the activities of the agency and information retained by the agency could be made more transparent.

DCLB always tries to be transparent with our operation. We continue to invite the public to view our daily lottery drawings. We also rebroadcast our draw numbers via TV and radio daily and post the draws to the website within 30 minutes of the actual drawing. At our Union Station and Verizon Center locations, we have money machine events where players can get the opportunity to play for a chance to win up to \$10 thousand. We are on sight with our draw team and auditors each time we have a money machine event. The second chance draw is witnessed live by our Players to elevate the excitement and to show the integrity of our process. We update and post daily, via our website, prizes remaining for all our instant tickets. As a result, players can see what prizes are still available to be won. DCLB also produces and uploads our annual report. In addition, as a positive element of communication we always publish the names and faces of our many happy—winners. This—technique illustrates that the lottery is both credible and winnable.

Background

- In the case of instant ticket contract, only three companies in the U.S. produce instant tickets and are not located within the District. None of the companies qualifies as a CBE.
 - o The three companies are Scientific Games (Georgia), Pollard Banknote (Michigan), GTECH Printing (Florida).
 - Entire production of tickets takes place outside the District, and as a result, there are a reduced amount of subcontracting opportunities associated with instant ticket contracts.
