Summary of Requirement

In addition to the requirements of 40 CFR § 261.5, on or before March 1 of each year, each conditionally exempt small quantity generator shall complete and submit to the Director, on forms provided by the Department, an annual self-certification of compliance that addresses compliance with the requirements of 40 CFR § 261.5, as modified by this subsection (20 DCMR § 4261.7), during the preceding twelve (12) months, and, where necessary, a return-to-compliance plan. The generator shall also address: (1) Any measures taken during the previous year to reduce the volume and toxicity of hazardous waste generated; and, (2) To the extent such information is available, any changes in the volume and toxicity actually achieved during the year in comparison to previous years.

On or before March 1 of each year: Each conditionally exempt small quantity generator shall pay an annual permit fee of \$ 200 for each generating site; Each small quantity generator of 100 to 1000 kilograms of hazardous waste per calendar year shall pay an annual permit fee of \$500 for each generating site; and Each large quantity generator shall pay an annual permit fee of \$1,000 for each generating site. to the DC Dept. of Environment, Hazardous Material & Toxic Substance Division

Annually and at any other time the Department of Employment Services may require or prescribe, each self-insurer shall submit each of the following reports: (a) a sworn itemized statement of the self-insurer's assets and liabilities, or a balance sheet; (b) A sworn statement showing by classification the payroll of employees of the self insurer who are engaged in employment within the purview of the Act or similar provisions of prior law; and (c) A sworn statement covering the preceding twelve (12) month period, listing all death and injury cases, which have occurred during the period, together with a report of the status of all outstanding claims.

Each Self-Insurer is required to submit to the Department of Employment Services, a report to include the amount of compensation and medical payments made pursuant to the D.C. Workers Compensation Act during the reporting period. The report shall be filed within thirty (30) days after each quarter ends.

Preparation of multi-year, independent annual capital and operating expenditure and appropriation budget. The Board shall annually develop, adopt, and submit to the Mayor a multiyear financial plan for capital and operating expenses encompassing at least the forthcoming 5 fiscal years. The plan shall be submitted to the Mayor no less than 90 days prior to the beginning of each District government fiscal year.

The Board shall prepare, within 120 days after the end of each District government fiscal year, a detailed annual report setting forth a description of the Authority's operations and accomplishments during the year and shall transmit copies of the report to the Mayor and the Council.

Reporting requirements for DC Water emergency events – defined to include extreme weather event, major service interruption, and Tier 1 public notice event.

- (1) DC Water must report general information within 5 days of the emergency event, and
- (2) DC Water must provide a comprehensive report describing the scope of the event, damage caused, and remediation efforts undertaken within 30 days.

DC Water transmits to the Council and publicly post on the Authority's website a report that includes the following information from the preceding fiscal year: "(A) The average impervious area charge for residential customers:

(1) District-wide; and By ward; and

(2) Efforts made by the Authority to publicize the availability of financial assistance through the Clean Rivers Impervious Area Charge Assistance Fund, including a description of the total amount of expenditures by the Authority on such efforts.

Within 60 days after the end of the fiscal year, the District of Columbia Water and Sewer Authority ("DC Water") shall transmit to the Mayor and the Council and publicly post on the DC Water website a report that includes the following information for the preceding fiscal year:

(1) For the lead water service line replacements under § 34-2158(a)(2); and

(2) For the lead water service line replacement payment assistance program established by § 34-2159

Beginning on November 1, 2021, and ending on February 1, 2022, the District of Columbia Water and Sewer Authority ("DC Water") shall report monthly to the DC Water Board of Directors and to OPC the number of customers, by zip code and customer class, that have entered payment plans, that have had service suspended or disconnected for non-payment, or that are in arrears.

DCCR Performance Oversight Question 53 – Feb 2022

53. Please provide an update on the progress of the Clean Rivers Project, including:

- For each component of the Project, including Tunnel development and Green Infrastructure installation:
 - A description.
 - A status report, including a timeframe for completion.
 - The amount of capital funds spent and available.
 - Planned remaining spending each year until completion in 2032.
 - Annual maintenance costs for any completed projects.
 - The expected maintenance costs per year once the projects are complete.

Response

The purpose of the DC Clean Rivers Project is to control combined sewer overflows (CSOs) to District waters. In the older sections of the District, there is a single combined sewer pipe in the street which handles both stormwater runoff and sanitary sewage from homes and businesses. During dry weather, sewage is conveyed to DC Water's Advanced Wastewater Treatment Plant at Blue Plains (Blue Plains), located in the southwestern part of the District on the east bank of the Potomac River. When the capacity of a combined sewer pipe is exceeded during storms, the excess flow, which is a mixture of sewage and stormwater runoff, is discharged to the Anacostia and Potomac Rivers, Rock Creek, and tributary waters. This excess flow is called CSO and there are 47 potentially active CSO outfalls in the District's combined sewer system.

The Clean Rivers Project consists of deep tunnels, targeted sewer separation and green infrastructure (GI) designed to reduce CSO discharges to District waters. The project is necessary to bring CSOs into compliance with the District's water quality standards. After completion, the volume of CSO discharges in an average year of rainfall will be reduced by 96% system-wide, with the following reductions for each receiving water: 98% reduction to the Anacostia; a 93% reduction to the Potomac; and a 90% reduction to Rock Creek. US EPA and the District Department of the Environment have determined that the plan will bring CSOs into compliance with the District's water quality standards, subject to post-construction monitoring.

The project is required by a Federal Consent Decree signed by US EPA, the Department of Justice, the District and DC Water. The Consent Decree dictates a schedule for implementation and includes many interim milestones. Stipulated penalties can be assessed for failure to meet Consent Decree deadlines. The project is on schedule to meet the Consent Decree deadlines to place projects in operation to control CSOs. The major milestones in the Consent Decree are as follows:

- March 23, 2018 – The Anacostia River Tunnel system from Blue Plains to Robert F. Kennedy (RFK) Stadium including a new Wet Weather Treatment System at Blue Plains was required to be placed in operation by this date. DC Water met this deadline by placing this portion of the tunnel system in service on March 20, 2018. From March 20, 2018, through January 31, 2022, the system has performed exceptionally well, capturing more than 12.5 billion gallons of CSO and removing more than 7,982 tons of trash and debris, preventing it from being discharged to the Anacostia River.
- March 23, 2025 – The Northeast Boundary Tunnel which runs from RFK Stadium to 6th and R Streets NW is required to be placed in operation by this date. The project has

been accelerated to provide early flood relief to the Northeast Boundary area including Bloomingdale and LeDroit Park and is scheduled to be placed in operation in 2023.

- February 8, 2030 – The Potomac Tunnel which addresses the major Potomac River CSOs is required to be placed in operation by this date.

The Consent Decree was amended in 2016 to include green infrastructure for the Potomac River and Rock Creek and to extend the time required to implement the projects from 2025 to 2030. The modification required DC Water to construct initial green infrastructure projects in the Potomac and Rock Creek sewersheds and to evaluate these projects to determine their practicability. If green infrastructure is determined to be practicable, then the remaining green infrastructure projects would be constructed, otherwise gray infrastructure projects would be implemented. DC Water has completed the practicability assessments and determined the following:

- For Rock Creek, DC Water determined that full scale implementation of GI was impracticable primarily due to high cost to ratepayers over the long term. Instead, DC Water recommended a hybrid approach, combining the best of both green and gray infrastructure to optimize the benefits of each. The hybrid approach comprises constructing GI to manage 92 impervious acres and a 4.2 million gallon storage facility to control CSO 049 in Piney Branch. EPA approved this approach, and a nonmaterial modification of the Consent Decree was signed by the parties in December 2020.
- For Potomac CSOs 027, 028 and 029, green infrastructure is impracticable due to cost and community/approval agency concerns about constructing green infrastructure in the historic district. Per the Consent Decree, DC Water will therefore extend the Potomac Tunnel to intercept CSO 027, 028 and 029. EPA approved this in February 2021.

Status Report, Capital Funds Spent and Available, Planned Remaining Spending

Table 1, below, includes a status report on components of the Clean Rivers Project, the amount of capital funds spent and available, and the planned remaining spending.

Operation and Maintenance Costs

- Completed Projects
 - The Anacostia River Tunnel system from Blue Plains to RFK Stadium including a new Wet Weather Treatment System at Blue Plains was placed in operation March 20, 2018. Estimated operation and maintenance costs for tunnels and appurtenances is approximately \$600,000 per year, while the cost of the Tunnel Dewatering Pumping Station and Wet Weather Treatment Facilities at Blue Plains is approximately \$5, 800,000 per year.
 - The first Potomac and Rock Creek green infrastructure projects manage approximately 32 impervious acres at 1.2" of rain. Maintenance costs are approximately 480,000 per year.
- Future Projects
 - The estimated operation and maintenance costs for tunnels and appurtenances when the tunnel system is complete is approximately \$1.35 million per year (2020 dollars), while the cost of the Tunnel Dewatering Pumping Station and Wet Weather Treatment Facilities at Blue Plains is approximately \$8,750,000 per year when the future tunnel system are complete. The increase is primarily due to increase in anticipated flows that will be captured in the entire tunnel systems. It

also assumes that we will not be required to increase the capacity of the WWTF. Note that many of the facilities have not been designed or constructed yet and these costs may change as the facilities are developed.

- For green infrastructure, the ultimate build-out will comprise GI managing 92 impervious acres in Rock Creek and along with approximately 8 impervious acres of the GI demonstration project in the Potomac sewershed equates to a total of 100 managed acres. We estimate the annual operation and maintenance cost to be about \$1.5 million per year in year 2020 dollars when all acres are complete.

Anacostia River Projects																				
A	Blue Plains Tunnel	The Blue Plains Tunnel is a 23-foot inside diameter tunnel, approximately 24,000 feet long from Blue Plains to Main Pumping Station near the National Stadium. The tunnel includes 5 shafts and provides approximately 73 million gallons of storage to provide CSO control and to reduce peak flows in wet weather to Blue Plains to enable more economical nutrient removal for the Chesapeake Bay. Voted “2016 Project of the Year” by Engineering News Record.	358.5	0	The project is complete (started in 2011, completed in 2016)															
B	Tingey Street Diversion Sewer	Division B consists of two chambers which divert flows from existing CSO 013 and 014 sewers into a new sewer along Tingey Street. The sewer connects to the Blue Pains Tunnel at Main Pumping Station. The purpose of the project is to intercept CSO 013 and 014 and convey the captured CSO to the tunnel.	16.5	0	The project is complete (started in 2012, completed in 2014) Worked closely with DMPED and completed project prior to the grand opening of Harris Teeter and other commercial establishments in the Navy Yard area.															
C	CSO 019 Overflow and Diversion Structures	This project consists of a diversion structure to intercept CSO 019 overflow near RFK stadium, the largest CSO in the system. The project also includes an overflow structure that relieves flow to the Anacostia River when the capacity of the tunnel is exceeded.	31.0	0	The project is complete (started in 2011, completed in 2013)															
D	JBAB Overflow and Diversion Structures	The JBAB Overflow and Diversion Structures captures flow from the Potomac Outfall Sewers and conveys it to the Blue Plains Tunnel for treatment at Blue Plains. The overflow structure provides a relief for CSOs when the capacity of the tunnel is exceeded. The project also includes installation of monitoring instrumentation at multiple sites throughout the city.	60.9	0.5	The project is complete. (started in 2014 and completed in 2019)															
E	M Street Diversion Sewer	The M Street Diversion Sewer intercepts CSO 015, 016 and 017 near the Navy Yard and conveys them to the Anacostia River Tunnel for treatment at Blue Plains. Worked closely with DDOT on their 11 th Street Bridge project and access over the CSO Virginia Avenue Tunnel Project.	38.9	0	The project is complete (started in 2012, completed in 2015)															
G	CSO 007 Diversion Structure and Diversion Sewer	This project consists of a diversion structure to intercept CSO 007 and a sewer constructed in the tunnel under the approach ramps of the 11th Street bridge. The purpose of the project is to intercept CSO 007 and convey the captured CSO to the Anacostia River Tunnel for treatment at Blue Palins	5.5	0	The project is complete (started in 2012, completed in 2013)															
H	Anacostia River Tunnel	The Anacostia River Tunnel (ART) is a 23-foot inside diameter tunnel, approximately 12,000 feet long from Poplar Point to CSO 019 near RFK Stadium. The tunnel provides approximately 38 million gallons of storage to provide CSO control for CSO 005, CSO 007, CSO 017, CSO 018, and CSO 019.	265.4	0	The project is complete. (started in 2013, completed in 2018)

I	Main Pumping Station Diversions	Diversion structures and appurtenances to intercept CSOs 009, 011a and 012 have been built at Main Pumping Station near National Stadium. Other work accomplished includes relocation of the Low Area Sewer, surge storage tank and weir, shaft internal structures, and air management facilities.	53.3	0	The project is complete (started in 2014, completed in 2018)															
J	Northeast Boundary Tunnel (NEBT)	The Northeast Boundary Tunnel is a 23-foot inside diameter tunnel, approximately 27,000 feet long from RFK Stadium to 6 th and R Streets NW. The tunnel will provide storage for CSO controls as well as conveyance to relieve chronic flooding in the Northeast Boundary Area. Sewer diversion facilities will serve five chronic flood areas: Mt. Olivet Road, Rhode Island Metro Station, Bloomingdale, 6th Street NW and R Street NW. The First Street Tunnel will be connected to the Northeast Boundary Tunnel as part of this project.	632.1	142.8	The design-build project was awarded in September 2017. Work in the field is underway with project completion in 2023.	86,888	55,913													
P	First Street Tunnel	The First Street Tunnel serves the Bloomingdale and LeDroit Park neighborhoods around First Street NW and Rhode Island Avenue. The project schedule and scope were altered to meet the goals of the Mayor's Task Force on Flood Prevention in Bloomingdale and LeDroit Park and the Northeast Boundary Neighborhood Protection Project. The project includes a 20-foot inside diameter tunnel approximately 2,700 feet in length. Three diversion chambers divert flow from existing trunk sewers to the tunnel through drop shafts. The tunnel was constructed and in service several years before completion of the Northeast Boundary Tunnel, which will convey flow from the First Street Tunnel to Blue Plains. Until the NEBT is constructed, First Street Tunnel will be used for storage and will be pumped out after use.	175.3	0	The project is complete (started in 2013, completed in 2016)															
U	Northeast Boundary Tunnel Utility Relocations	Utility relocations prior to the Northeast Boundary Tunnel construction.	27.1	0	The project is complete (started in 2016, completed in 2017)															
Z	Poplar Point Pumping Station Replacement	The 55 million gallons-per-day Poplar Point Pumping Station was constructed to replace the existing pumping station.	70.2	0	The project is complete (started in 2015, completed in 2018)															
Potomac River Projects																				
PR-A	Potomac River GI Project A	Multiple green infrastructure facilities were constructed, including bioretention facilities and porous pavement, to manage stormwater at the source to control CSOs. This project was used, along with others, to assess the practicability of green infrastructure for controlling Potomac River CSOs 027, 028 and 029. GI was determined to be impracticable, so the Potomac Tunnel will be used to control CSO 027, 028 and 029.	7.9	0	The project is complete (started in 2018, completed in 2019)															

Division	Title	Description	Capital Budget as of 2/14/2022 (\$ M)	Remaining Capital Funds incl. DCW labor (unspent) as of 2/14/2022 (\$ M) ¹	Status Report	Planned Spending including DCW Labor (\$ K)

PR-B	CSO 021 Diversion Facility	CSO 021 is located on property controlled by the Kennedy Center for the Performing Arts. This project involved constructing the diversion chamber and shaft for the future Potomac Tunnel at the same time the Kennedy Center constructed an expansion of their facility. In the future, these facilities will be connected to the Potomac Tunnel. This will minimize disruption to the Kennedy Center and reduce costs and risks to DC Water.	34.9	0	The project is complete (started in 2016, completed in 2018)															
PR-C	CSO 025/026 Separation	Separation of Potomac sewershed’s tributary to two small CSOs along the Georgetown waterfront.	10.1	7.9	Construction was awarded in January 2021. Work in the field is underway with completion in 2023.	5,586	2,394													
PRT-A	Potomac Tunnel Utility Relocations	The purpose of this project is to prepare future Potomac River Tunnel project sites by installing necessary infrastructure in advance of the tunnel. The construction of a high voltage electrical duct bank will occur along Independence Avenue SW from West Potomac Park, near Ohio Drive SW, eastward to 14th Street SW. The project also includes the construction of electrical duct banks at five sites along the future alignment of the Potomac Tunnel.	16.6	17.2	Construction contract was awarded in September 2021. Work in the field is underway with completion in 2023.	12,054	5,166													
PRT-B	Potomac River Tunnel ²	Currently in the design stage, the Potomac River Tunnel will control CSOs along the Potomac River from the Lincoln Memorial to Georgetown. Diversion structures and drop shafts will be constructed to divert CSO flows to a deep underground storage and conveyance tunnel, which will convey captured flows via gravity to Blue Plains.	592.2	600.5	Working on the development of 100% Request for Proposal (RFP) documents. Based on the schedule in the Consent Decree, construction is currently planned for 2023 to 2030.															
Rock Creek Projects																				
RC-A	Rock Creek GI Project 1 (Project A)	Multiple green infrastructure facilities were constructed, including bioretention facilities and porous pavement, to manage stormwater at the source to control CSOs. This project was used, along with others, to assess the practicability of green infrastructure for controlling Rock Creek CSO 049.	30.2	0	The project is complete. (started in 2017, completed in 2018)															
--	Design Challenge Green Infrastructure Sites	Implement creative designs to construct green infrastructure facilities at two Triangle Parks and one Block Streetscape in NW DC. The GI practices implemented through this project included bioretention (rain gardens), permeable parking lanes, permeable sidewalk pavers, landscape infiltration gaps, new street trees and stormwater related educational art.	3.4	0	The project is complete. Work performed by DDOT contractor.															
RC-B	Rock Creek Project B (GI)	This project involves construction of green infrastructure facilities, including bioretention facilities and porous pavement, to manage stormwater at the source to control CSOs.	14.4	16.2	Construction contract was awarded in December 2021. Work in the field is underway with completion in 2024.	5,639	9,316	1,229

FY 2021 DC Water – Significant Performance Accomplishments from Across the Authority

Program/Projects Title & Start Period	Executive Sponsor & Program Lead(s)	Purpose of the Project	Benefit to the Authority	Benefit to Our Ratepayers
High Performing Senior Executive Leadership Team - Spring 2021	David L. Gadis (CEO & GM) Lisa Stone, (Chief People and Inclusion Officer, EVP)	Advance the CEO’s drive towards a high performing executive team by bringing additional focus and attention to the significance of communications and stakeholder engagement within the Senior Executive Team. Bring organizational focus and operational strategy to the Office of the CEO with the addition of the Chief of Staff.	Mr. Gadis continues to recognize opportunities to attract and retain executive leadership talent for his team. The multi-year effort has led to the advancement of Mr. Keith Lindsey to Chief of staff with the purpose of bringing strategic and administrative leadership to the Office of the CEO ensuring operational effectiveness and efficiency. Recognizing the increasing significance of communications and stakeholder engagement for the authority, Mr. Gadis created the executive level position of Chief of Communications and Stakeholder Engagement and attracted the talented Ms. Kirsten Williams. Ms. Williams has a steep background in utility operations, communications, and stakeholder engagement bringing leadership and expertise to the Office of Marketing and Communications.	With the vision to be known for superior service to advance the health and well-being of the workforce and communities, the importance of being responsive and engaging is in the best interest of our staff, immediate ratepayers and the broader stakeholder groups impacted by the Authorities' operations. Value is created with these efforts by building trust, credibility, and confidence with our stakeholders.

Program/Projects Title & Start Period	Executive Sponsor & Program Lead(s)	Purpose of the Project	Benefit to the Authority	Benefit to Our Ratepayers
Blueprint 2.0 Strategic Planning & Performance Management-Fall 2020	Wayne Griffith (<i>Chief, Strategy & Performance</i>), Matt Ries (<i>Director, Strategic Leadership & Sustainability</i>)	Develop the Authority's strategic plan for the period of FY2022 through 2027. Take the necessary steps to help the Authority better align resources and systems to meet strategic objectives.	Organizational alignment around strategic imperatives, themes, goals, and formal structures established to promote, track, and report strategic advancement. Collaborative, inter-departmental engagement promoted via cross-functional teams serves to break down organizational silos for more efficient workgroups. This resulted in publishing Blueprint 2.0, setting the strategic direction for the Authority.	Continuous improvement in efficiency and effectiveness of the overall services we provide to our customers and the region. By establishing and tracking co-created goals, overall outcomes from the organization improve, leading to better and more efficient ways of providing service to the community and managing resources.
Lead Free DC-Fall 2020	David L. Gadis (<i>CEO & GM</i>) Kishia Powell (<i>COO</i>)	Remove all lead services lines in the District of Columbia by 2030 by accelerating the replacement of more than 28,000 lead service lines, updating pipe material in the service line inventory, and aligning DC Water's replacement programs to incorporate new District law	Bundling DC Water-initiated CIP projects, replacement assistance funding for homeowners, and customer-initiated replacement programs offers opportunities for efficiencies and synergies to achieve the program goals. The program brings focus to the funding needs beyond what is currently including in DC Water's 10-year Capital Improvement Plan. And finally the program aligns the Authority's resources to deliver on Blueprint 2.0 organizational imperatives of Reliable and Equitable. DC Water Completed 846 lead service line replacements in FY2021.	The program prioritizes lead service line replacement projects for vulnerable populations most impacted by lead, e.g., children, and for historically underserved areas that experience disproportionately poorer health outcomes compared with other parts of the city.
Establish Water Equity as an Organizational Priority-Fall 2020	Kishia Powell (<i>COO</i>) Sheryl Ude (<i>Sr. Advisor to the COO</i>)	DC Water's engagement in the U.S. Water Equity Roadmap process provides guidelines to DC Water teams working to advance equity in their programs and initiatives as guided by the Blueprint 2.0.	Through the roadmap, we will continue to uplift and share our current equity programs with our community, partner cities, and ensure that we advance our current solutions as well as inform and influence	Through coordinating and advancing equity-focused efforts as an Authority, we strive to use the roadmap to address how we factor equity into our overall programming and prioritize our capital

Program/Projects Title & Start Period	Executive Sponsor & Program Lead(s)	Purpose of the Project	Benefit to the Authority	Benefit to Our Ratepayers
		The roadmap will inform equitable approaches and strategy and help to influence tactics needed to drive project and program implementation.	new initiatives that raise the bar on equitable approaches to serving our most marginalized residents, businesses, and vulnerable infrastructure and systems.	improvement planning efforts; drive a deeper understanding of community and neighborhood level needs; and bring awareness to how we conduct outreach and partner with our communities most impacted by water investments and systems.
Energy and Equity Opportunities Portfolio-Winter 2021	Executive Sponsor Kishia Powell (COO), Co-Leads: Matt Ries <i>(Director, Strategic Leadership & Sustainability)</i> , Sheryl Ude <i>(Sr. Advisor to the COO)</i>	Working within the AEG Challenge framework, DC Water is addressing major obstacles the District faces in its resilience and equity goals while decarbonizing critical infrastructure. A multi-stakeholder process is creating a unified portfolio of project opportunities prioritized (by cost/benefit, resilience, carbon, vulnerability, and equity goals).	This process is based on cost-benefit analyses to make informed, expedient, and equitable decisions. Leading with community as its focus, the Task Force: 1) collectively defined equity within Challenge's context; 2) developed scoring tools across equity, carbon, and resilience goals; and 3) assessed value and effort considerations for each project opportunity. This is influencing enterprise-wide efforts to operationalize equity and enhance day-to-day, programmatic decision making.	This process has allowed us to proactively demonstrate how, through a crowdsourcing process, we can create District-wide opportunities that are not just environmentally sound, but also socio-economically just. We have used this opportunity to create a model for how we prioritize our ratepayers and focus on the district's human landscape while strengthening our approaches to both climate and social crises.
Water Infrastructure Finance & Innovation (WIFIA) Loan-Fall 2021	Ivan Boykin <i>(Director, Finance)</i>	The Comprehensive Infrastructure Repair, Rehabilitation and Replacement Program will protect public health by improving drinking water distribution through upgrades to water mains and pumps throughout the system. The project will also provide water quality benefits to local rivers and streams by upgrading stormwater	(1) Provides low-cost, flexible financing to DC Water to advance critical infrastructure projects on a varied timeframe by allowing substitution of projects within the WIFIA loan program. (2) Improves drinking water system condition and reliability.	Re-execution of the WIFIA loan in December 2021 saves DC Water ratepayers an additional \$17 million.

		management systems and collecting and treating wastewater at the Blue Plains Treatment Plant. The program includes a combination of 20 drinking water and wastewater projects to rehabilitate, upgrade, and/or replace aging infrastructure throughout the system.	(3) Protects water quality of the local watershed by preventing sewage contamination of nearby rivers and streams. (4) Saves the DC Water an estimated \$30 million from financing with a WIFIA loan.	
Budget & Planning System (BAPS) Deployment Start Period-Fall 2020	Lola Oyeyemi (Director, Budget) Stacey Johnson (Senior PM, Budget Administration)	To modernize, automate and integrate DC Water's business processes for budget formulation, monitoring, forecasting and reporting and reduce manual effort and lead-time to achieve improved efficiency, data integrity and productivity.	1) Replaces previous MS-Excel workbook and email-based budget collection and approval processes which required substantial manual workload. 2) Leverages robust workflows and approvals to guide reviews at business unit, department, cluster and division levels; integration with Microsoft products using Smart Views. 3) Provides departments with ability to collect, submit, review, and approve budgets at detailed levels as well as roll-up capabilities to higher levels of control for reporting and analysis of operating and capital budgets 4) Integration of personnel planning, operating and capital budgets with Oracle Projects, General Ledger and HR systems 5) Improves the authoring of the Budget Book and report generation processes with application automations and controls 6) Shortens overall budget cycle from 18 months prior to the start of a fiscal year to 15 months.	Improved processes and efficiencies translate to cost savings and better productivity as people spend less time on data validation. This enables more staff time on forecasting and trend analysis which are critical for the review, prioritization, scoring and decision-making process that supports the budget proposal. With centralized financial data, multiple departments can easily access and collaborate on customer needs for faster response times and improved data delivery and accuracy.

Program/Projects Title & Start Period	Executive Sponsor & Program Lead(s)	Purpose of the Project	Benefit to the Authority	Benefit to Our Ratepayers
Promoting Wellness and Advancing Training in a COVID Posture-Fall 2020	Lisa Stone (<i>Chief People and Inclusion Officer, EVP</i>)	Our People and Talent department needed to quickly pivot our workforce into a virtual environment while maintaining physical and mental well-being.	People and Talent pivoted to virtual training, in response to the pandemic and the hybrid teleworking posture. Last year, alone, People and Talent provided, 60 wellness classes, over 1,200 hours of virtual training to our employees, offering 24 development workshops, launching a new diversity and inclusion interactive experience, Mentoring Circles, and provided \$405,065 of Tuition Assistance. These efforts focused on maintaining our team culture and connections, even while part of the workforce worked "apart."	As we navigate through this unprecedented time, People and Talent, continues to respond to the Authority's needs, providing new policies and an inclusive workforce strategy, where every employee can thrive knowing that they can bring their authentic selves to work and build a world-class water utility, providing high-quality customer service to our ratepayers every day.
Stakeholder Engagement, Virtual – Fall 2020 & In-Person - Summer 2021	David L. Gadis (<i>CEO and GM</i>) Keith Lindsey (<i>Chief of Staff</i>) Kirsten Williams (<i>Chief Communications and Stakeholder Engagement Officer</i>)	Provide opportunities for high-quality workforce engagement through a robust internal communications strategy. Two sessions of employee all-hands Town Hall meetings were conducted in October 2020 and July 2021. The October 2020 employee town hall was virtual, highlighting accomplishments, challenges, and addressing topics that were requested by employees. The July 2021 employee town hall was primarily in person with a virtual option, introducing Blueprint 2.0 to staff and outlining the process for return-to-work sites for teleworking employees.	Town hall meetings provide increase lines of communication and opportunities for awareness and real-time engagement. Regular engagement with the workforce by the Authority's executives promotes alignment, increases transparency, and recognizes the voice of the employee and the contributions they make and the issues they face.	Employees are the face of DC Water. The workforce lives our values and helps to achieve the Authority's mission of providing high quality water services in a safe, environmentally friendly, and efficient manner.

Program/Projects Title & Start Period	Executive Sponsor & Program Lead(s)	Purpose of the Project	Benefit to the Authority	Benefit to Our Ratepayers
Utility Discount Program Equitable Cost Sharing-Fall 2021	Marc Battle (<i>Chief Legal Officer</i>) Barbara Mitchell (<i>Assistant General Counsel</i>)	The purpose of the Utility Discount Program (UDP), which is managed by DOEE, is to provide a one-stop shop for the marketing and management of the various customer assistance programs offered by the utilities including Washington Gas, PEPCO, and DC Water. This effort was focused on the reallocation of cost to reimburse DOEE for expenses it incurs in managing the UDP. While DC Water was paying 33% of the not-fixed expenses, the Authority's customers represented only 13 to 15% of those served by the program.	The PSC issued a ruling supporting the Authority's position, reducing the cost share from 33% to 15% representing a reduction in operating expenses.	While this ruling may not represent a significant share of the operating budget, it is notable for the Authority and its ratepayers because it is now a more equitable cost share. Additionally, the monies can be used for programs or operations that impact customers.
Making CAP 2 Permanent-Fall 2021	Meisha Lorick, (<i>Director, Customer Service (Acting)</i>) Marcus McKenzie (<i>Manager, Revenue Assurance</i>)	To make the CAP 2 Customer Assistance a permanent assistance offering.	Ability to provide consistent affordability assistance to a larger customer base	Consistent program that will offer assistance to a larger base of customers, since the eligibility tier was increased to assist more customers
Multi-family Assistance Program & Carryover from FY21 to FY22-Fall 21	Meisha Lorick, (<i>Director, Customer Service (Acting)</i>) Syed Khalil (<i>Director, Revenue & Rates</i>)	To assist customers that do not directly pay a water bill but may have been struggling during the pandemic. The assistance is transferred through the property owners water bill to the tenant as rent reduction.	Ability to provide more equitable and affordability options to our customers, and to assist more customers during the pandemic.	District residents who rent in multi-family buildings, like apartments or low-income condominium associations that do not directly pay their water charges to DC Water, but instead their water charges are part of their rent, or HOA dues will finally be able to receive assistance from DC

Program/Projects Title & Start Period	Executive Sponsor & Program Lead(s)	Purpose of the Project	Benefit to the Authority	Benefit to Our Ratepayers
	Marcus McKenzie (Manager, Revenue Assurance)			Water. It is one of the few programs in the nation designed to aid customers who do not pay their water and sewer bills directly.
Business Diversity & Inclusion Advisory Council-Spring 2021	David Gadis (CEO & GM) Jonathan Carpenter (VP, Industry & Gov't Affairs) Korey Gray (Director, Compliance & Business Development) Linda Fennell (Sr. Compliance Officer)	The DC Water Business Diversity and Inclusion Advisory Council (Advisory Council) was formed in 2021, to be a broad coalition of partners to provide advice and suggested best practices on issues relevant to DC Water's certified business utilization and contractor workforce programs. The 38-member Advisory Council, was organized to reflect the knowledge and interest of major affected constituencies, including: • Commercial / Industrial • Engineering/Construction • Government • Non-Profit Organizations • Certified Businesses • Academia	With Mr. Gadis as Chairman and DC Water employees as staff managers, the objective of the Advisory Council is to search for inclusive solutions and build sustainable agreements based on a variety of views and interests. This includes: 1. Providing independent advice to DC Water on a variety of programs and policies – based on a factual and thoughtful review of information. 2. Review certified business utilization reports and proposed initiatives and offer advice to further program objectives. 3. Increase the business community's understanding of DC Water's procurement process by supporting DC Water's training and outreach initiatives. 4. Propose ways to continue effective and efficient long-term involvement in its procurements. 5. Provide input on major policy decisions based upon best practices that enhance the economic viability of diverse suppliers.	The Advisory Council was established to support the needs of the community through a number of means including: 1. Further demonstrating DC Water's commitment to create an environment that welcomes diverse suppliers to participate in every aspect of its purchasing program; 2. Establishing a forum where leaders within the supplier diversity community partners with DC Water to find solutions to removing barriers into DC Water's procurement programs; and 3. Promoting a better relationship between DC Water, diverse suppliers and the broader business community to understand the capacity and development needs of new and existing vendors.

Further, educating the community about the purpose and function of their local water utility helps to improve overall understanding of the need to maintain our infrastructure and care for the environment.
Resilience & Readiness: Carbon Footprint Model-Fall 2020	Aklile Tesfaye (VP, Wastewater Operations), Chris Peot (Director, Resource Recovery)	Track our organizational carbon footprint to show annual changes and use the model to evaluate future projects carbon impacts.	The model shows that our Digester Project reduced DC Water's carbon footprint by 38%. This represents the equivalent to removing nearly 14,000 cars annually from the DC Metro area roads.	Comfort in knowing their service is provided by leaders in the field who choose projects with carbon reduction in mind in efforts to reduce local air pollution.
Brentwood Reservoir Community Solar Project-Summer 2020	Maureen Holman (VP, Shared Services)	Partner with the National Housing Trust (NHT) and Urban Ingenuity (UI) (together as NHT Ingenuity Power LLC or NHTIP) to develop a solar project at Brentwood Reservoir in a manner that provides affordable power to low-income District residents while enhancing the environmental sustainability and resilience of the regional electricity grid.	With no capital investment and limited risks, this project meets several DC Water objectives and represents a win-win for our low-income ratepayers. It is a new source of guaranteed non-ratepayer revenue over 20 years. It improves sustainability and resiliency for DC Water operations and the community we serve. It aligns with District and regional goals to combat climate change and reduce the carbon footprint, while supporting vulnerable communities.	The project was awarded \$1,746,000 in Solar for All funding to incentivize the development of the 1,800 kW DC project. The Solar for All award means that 100% of the electricity produced will be provided free for 514 low to moderate income families in the District, a savings of \$600 per year per household. Brentwood Reservoir Solar is the largest 2022 Solar for All project.

Blue Plains Solar Phase 1-Spring 2020	Aklile Tesfaye (VP, Wastewater Ops), Chris Peot (Director, Resource Recovery)	Look for ways to harness energy from uncommon sources to benefit the environment and our customers and reduce greenhouse gas emissions.	DC Water authorized a 20- year solar power purchasing agreement at Blue Plains. This helps reduce our reliance on fossil fuels and supports our efforts to reduce long-term operating costs.	This solar effort, combined with our green power from turbines that are fueled with our digester gas, steam made from heat recovered from the turbines, and facilities heated and cooled with our wastewater effluent, has Blue Plains, the world's largest advanced wastewater treatment facility, at over 50% renewable energy use.
MD Legislation to allow DCW to sell REC's in Maryland with an estimated annual revenue impact of \$1.2M-Spring 2021	Marc Battle (Chief Legal Officer) Jonathan Carpenter (VP, Industry Relations) Saul Kinter (Program Manager, Resource Recovery), Ernest Jolly (Energy Chief, Wastewater Treatment)	Enable DCW to start selling our sewer heating and cooling RECs in MD. Although these RECs are eligible for sale in DC, we have saved the digester HEX RECs for the past year in anticipation of this approval because the MD pricing is higher. The two applications approved were for digester cooling and the SHARC at HQO, application for the cooling at CHP will be made soon.	Wastewater thermal energy is a new and growing source of renewable energy that is highly efficient and adds another choice to fight climate change. Benefits include a positive return on investment based on cost avoidance, improved efficiencies, and new capabilities with financial benefits.	Cost savings and benefits from project outcomes that help offset future rate increases and the effects associated with climate change.
Establish an Enterprise Program Management Office (EPMO)-Fall 2020	Wayne Griffith (Chief, Strategy & Performance), Francis Cooper (Director, Enterprise Program Management Office(EPMO))	Create an operational environment where programs and projects are managed in a consistent manner to attain predictable results and deliver strategic objectives as described in Blueprint 2.0.	The EPMO is operationally positioned to support business leaders by aligning organizational performance with Blueprint 2.0 and its corresponding goals, objectives, and programs. Additionally, the EPMO is tasked with forging links between strategic and operational goals. Reducing ambiguity in work assignments and mobilizing organizational resources more efficiently and effectively further rounds out the EPMO's role at DC Water.	Improved strategic alignment and more collaborative decision making realized via the EPMO's leadership of enterprise-level programs have resulted in the successful mobilization of strategic programs which includes but are not limited to Lead Free DC; the Enterprise Resource Planning (ERP) implementation; DCRA PE Compliance Initiative; mobilization of the Blueprint 2.0 and Innovation; and the design and implementation of DC Water's first

				Enterprise Risk Management Program.
Establish an Enterprise Risk Management (ERM) Program	Wayne Griffith (<i>Chief Strategy & Performance</i>), Francis Cooper (<i>Director, Enterprise Program Management Office(EPMO)</i>)	Develop and implement a consistent and systematic approach to proactively identify uncertainties, with a focus towards the most significant enterprise risks and opportunities that are most impactful to DC Water's ability to execute on its Strategic Plan, achieve its performance objectives, and support its Core Values.	Driven by the EPMO, the Authority has developed and implemented several key ERM program milestones: a) Drafted an initial ERM policy to be institutionalized across the enterprise. b) Expanded the current Board authorized Audit Committee to the Audit and Risk Committee. c) Fostered collaboration with internal stakeholders to develop an ERM framework built upon existing ad-hoc risk management activities.	The current ERM scope is far broader and more strategic, operating across the enterprise to produce improved decision making and performance of the organization as it endeavors to meet its mission and achieve its strategies and business objectives.
Launch of Innovation Refresh Program-July 2021	Wayne Griffith (<i>Chief Strategy & Performance Officer</i>) Robert Bornhofen (<i>Director, Innovation</i>)	Achieve greater efficiency and effectiveness compared to past performance through the implementation of new ways of serving ratepayers with the refresh of the Innovation Program. The ideas that emerge will influence a more sustainable, more resilient, more reliable, and more equitable water utility.	Led by a dedicated Innovation Director (new hire), the aim is to enable the Strategic Imperatives that define the Blueprint 2.0. Benefits include a positive return on investment based on solving key problems where expected benefits include cost avoidance, improved efficiencies, and new capabilities with financial benefits. The Authority also expects to strengthen its work culture as more diverse types of employees get engaged across all sectors of DC Water when sharing and acting on ideas to solve key problems.	Two primary types of benefits from innovation programs currently under implementation/evaluation: (1) fewer disruptions from unplanned water and sewer events, and (2) cost savings and benefits from project outcomes that provide value to our customers.
