Background Check Process

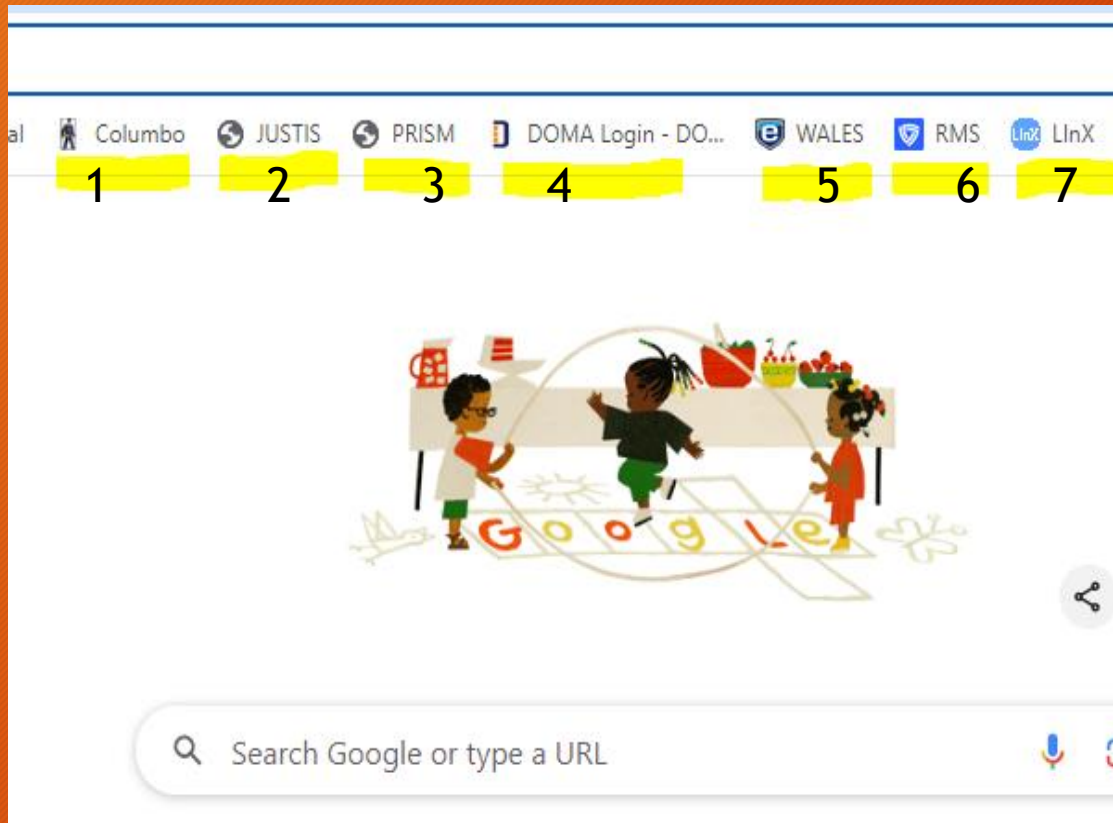

- Background checks are conducted in the same manner regardless of the type. The differences lie in the type of information captured.
- The goal of this training is to explain how to conduct a background check as effectively and efficiently as possible.

Background Check Systems

- The systems reflected here are listed in order of priority.
 - Background checks are primarily used as a tool for searching criminal histories associated with an arrest.
 - Each system leverages a unique identifier (e.g. PDID issued upon arrest) to conduct the search.

 2. Justice
 3. Prism
 4. DOMA
 5. WALES
 6. RMS
 7. LINX

Computer Password Save Features

- Improve security and efficiency by taking advantage of your computer's password manager to auto-fill required information online.

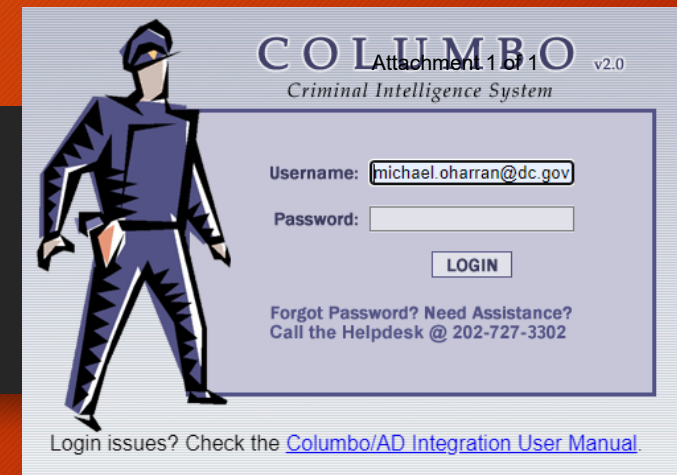

The Copy - Paste Search Method

- Also improve efficiency by simply copy and pasting text rather than retyping it. Remember to highlight the text you wish to copy and either:
 - Right click and select paste; or
 - Press Control C (Copy) and Control V (Paste) on your keyboard

1. COLUMBO

- Key things to know
 - DC-based arrest system
 - Only requires input of name and date of birth
 - Results are retrieved almost instantaneously
 - The most accurate system; yields the fewest Soundex* hits

** Note: A Soundex hit is when some personal information results in a different person's identity appearing, possibly as an alias for the applicant. Each identity returned during the investigation process, must be deemed the applicant or a Soundex hit and ruled out.*
